This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology

Refiguring Anthropology David Hurst Thomas,1986 Introductory text which explores the quantitative techniques of probability statistics as they apply to are used by anthropologists *The Human Bone Manual* Tim D. White, Pieter A. Folkens,2005-11-08 Building on the success of their previous book White and Folkens The Human Bone Manual is intended for use outside the laboratory and classroom by professional forensic scientists anthropologists and researchers The compact volume includes all the key information needed for identification purposes including hundreds of photographs designed to show a maximum amount of anatomical information Features more than 500 color photographs and illustrations in a portable format most in 1:1 ratio Provides multiple views of every bone in the human body Includes tips on identifying any human bone or tooth Incorporates up to date references for further study *Statistics for Archaeologists* Robert D. Drennan,2013-06-29 This book is intended as an introduction to basic statistical principles and techniques for the

archaeologist It grows primarily from my experience in teaching courses in quantitative analysis for undergraduate and graduate students in archaeology over a number of years The book is set specifically in the context of archaeology not because the issues dealt with are uniquely archaeological in nature but because many people find it much easier to understand quantitative analysis in a familiar context one in which they can readily understand the nature of the data and the utility of the techniques The principles and techniques however are all of much broader applicability Physical anthropologists cultural anthropologists sociologists psychologists political scientists and specialists in other fields make use of these same principles and techniques The particular mix of topics the relative emphasis given them and the exact approach taken here however do reflect my own view of what is most useful in the analysis of specifically archaeological data It is impossible to fail to notice that many aspects of archaeological information are numerical and that archaeological analysis has an unavoidably quantitative component Standard statistical approaches are commonly applied in straightforward as well as unusual and ingenious ways to archaeological problems and new approaches have been invented to cope with the special quirks of archaeological analysis The literature on quantitative analysis in archaeology has grown to prodigious size in the past 25 or 30 years

The Archaeologist's Laboratory E.B. Banning, 2006-04-11 This text reviews the theory concepts and basic methods involved in archaeological analysis with the aim of familiarizing both students and professionals with its underlying principles Topics covered include the nature and presentation of data database and research design sampling and quantification analyzing lithics pottery faunal and botanical remains interpreting dates and archaeological illustration A glossary of key terms completes the book

Centuries of Decline during the Hohokam Classic Period at Pueblo Grande David R. Abbott, 2016-12-01 In the prehispanic Southwest Pueblo Grande was the site of the largest platform mound in the Phoenix basin and the most politically prominent village in the region It has long been held to represent the apex of Hohokam culture that designates the Classic period New data from major excavations in Phoenix however suggest that little was classic about the Classic period at Pueblo Grande These findings challenge views of Hohokam society that prevailed for most of the twentieth century suggesting that for Pueblo Grande it was a time of decline rather than prosperity a time marked by overpopulation environmental degradation resource shortage poor health and social disintegration During this period the Hohokam in the lower Salt River Valley began a precipitous slide toward the eventual abandonment of a homeland that they had occupied for more than one thousand years This volume is a long awaited summary of one of the most important data recovery projects in Southwest archaeology synthesizing thousands of pages of data and text published in seven volumes of contract reports The authors all leading authorities in Hohokam archaeology who played primary roles in this revolution of understanding here craft a compelling argument for the eventual collapse of Hohokam society in the late fourteenth century as seen from one of the largest and seemingly most influential irrigation communities along the lower Salt River Drawing on extremely large and well preserved collections the book reveals startling

evidence of a society in decline as reflected in catchment analysis archaeofaunal assemblage composition skeletal studies burial assemblages artifact exchange and ceramic production The volume also includes a valuable new summary of the archival reconstruction of the architectural sequence for the Pueblo Grande platform mound With its wealth of data interpretation and synthesis Centuries of Decline represents a milestone in our understanding of Hohokam culture It is a key reference for Southwest archaeologists who seek to understand the Hohokam collapse and a benchmark for anyone interested in the prehistory of Arizona

Probability and Social Science Daniel Couteau, 2012-02-22 This work examines in depth the methodological relationships that probability and statistics have maintained with the social sciences from their emergence It covers both the history of thought and current methods First it examines in detail the history of the different paradigms and axioms for probability from their emergence in the seventeenth century up to the most recent developments of the three major concepts objective subjective and logicist probability It shows the statistical inference they permit different applications to social sciences and the main problems they encounter On the other side from social sciences particularly population sciences to probability it shows the different uses they made of probabilistic concepts during their history from the seventeenth century according to their paradigms cross sectional longitudinal hierarchical contextual and multilevel approaches While the ties may have seemed loose at times they have more often been very close some advances in probability were driven by the search for answers to questions raised by the social sciences conversely the latter have made progress thanks to advances in probability This dual approach sheds new light on the historical development of the social sciences and probability and on the enduring relevance of their links It permits also to solve a number of methodological problems encountered all along their history

Meaning and Ideology in Historical Archaeology Heather Burke, 2012-12-06 Focusing on the city of Armidale during the period 1830 to 1930 this book investigates the relationship between the development of capitalism in a particular region New England Australia and the expression of ideology within architectural style The author analyzes how style encodes meaning and how it relates to the social contexts and relationships within capitalism which in turn are related to the construction of ideology over time

Field Methods in Archaeology Thomas R Hester, Harry J Shafer, Kenneth L Feder, 2016-09-16 Field Methods in Archaeology has been the leading source for instructors and students in archaeology courses and field schools for 60 years since it was first authored in 1949 by the legendary Robert Heizer Left Coast has arranged to put the most recent Seventh Edition back into print after a brief hiatus making this classic textbook again available to the next generation of archaeology students This comprehensive guide provides an authoritative overview of the variety of methods used in field archaeology from research design to survey and excavation strategies to conservation of artifacts and record keeping Authored by three leading archaeologists with specialized contributions by several other experts this volume deals with current issues such as cultural resource management relations with indigenous peoples and database management as well as standard methods of archaeological

data collection and analysis *Confronting Scale in Archaeology* Gary Lock, Brian Molyneaux, 2007-11-15 Without realizing most archaeologists shift within a scale of interpretation of material culture Material data is interpreted from the scale of an individual in a specific place and time then shifted to the complex dynamics of cultural groups spread over time and place This book discusses the cultural social and spatial aspects of scale and its impact on archaeology and shows how an improved awareness of scale offers new and exciting interpretations *Mixed Methods in Ethnographic Research* Pertti J. Peltto, 2017-03-03 Mixed Methods in Ethnographic Research Historical Perspectives captures the dynamic history and development of mixed methods research in a narrative of personal discovery growth and experience Distinguished ethnographer and methodologist Pertti Peltto who first called for the integration of qualitative and quantitative research methods nearly half a century ago establishes a direct line between the earliest examples of ethnographic research and the ongoing mixed method discussions in academic institutions throughout the world By bringing together such distinct historical perspectives with his own reflections on mixed methods research Peltto offers a rare and endlessly enriching account that will satisfy the ever growing need for a better quality of practical data gathering and give researchers a foundation for promoting mixed methods in the future *New Insights into the Iron Age Archaeology of Edom, Southern Jordan* Erez Ben-Yosef, Thomas E. Levy, Mohammad Najjar, 2014-12-31 Situated south of the Dead Sea near the famous Nabatean capital of Petra the Faynan region in Jordan contains the largest deposits of copper ore in the southern Levant The Edom Lowlands Regional Archaeology Project ELRAP takes an anthropological archaeology approach to the deep time study of culture change in one of the Old World s most important locales for studying technological development Using innovative digital tools for data recording curation analyses and dissemination the researchers focused on ancient mining and metallurgy as the subject of surveys and excavations related to the Iron Age ca 1200 500 BCE when the first local historical state level societies appeared in this part of the eastern Mediterranean basin This comprehensive and important volume challenges the current scholarly consensus concerning the emergence and historicity of the Iron Age polity of biblical Edom and some of its neighbors such as ancient Israel Excavations and radiometric dating establish a new chronology for Edom adding almost 500 more years to the Iron Age including key periods of biblical history when David Solomon and the Egyptian pharaoh Shoshenq I are alleged to have interacted with Edom Included is a 7 gigabyte DVD with over 55 000 files of additional data and photographs from the project *A Lithic Technological Analysis of the Nunnery Collection Bifaces from the Toby-Thornhill Site in Lauderdale County, MS* Justin P. Rego, Masters Thesis *Perspectives on the Archaeology of Pipes, Tobacco and other Smoke Plants in the Ancient Americas* Elizabeth Anne Bollwerk, Shannon Tushingham, 2015-12-20 This volume presents the most recent archaeological historical and ethnographic research that challenges simplistic perceptions of Native smoking and explores a wide variety of questions regarding smoking plants and pipe forms from throughout North America and parts of South America By broadening research questions utilizing new analytical methods

and applying interdisciplinary interpretative frameworks this volume offers new insights into a diverse array of perspectives on smoke plants and pipes

Neanderthals in the Levant Donald O. Henry, 2003-10-01 The volume traces the controversy that revolves around the bio cultural relationships of Archaic Neanderthal and Modern humans at global and regional Levantine scales The focus of the book is on understanding the degree to which the behavioral organization of Archaic groups differed from Moderns To this end a case study is presented for a 44 70 000 year old Middle Paleolithic occupation of a Jordanian rockshelter The research centering on the spatial analysis of artifacts hearths and related data reveals how the Archaic occupants of the shelter structured their activities and placed certain conceptual labels on different parts of the site The structure of Tor Faraj is compared to site structures defined for modern foragers in both ethnographic and archaeological contexts to measure any differences in behavioral organization The comparisons show very similar structures for Tor Faraj and its modern cohorts The implications of this finding challenge prevailing views in the emergence of modern human controversy in which Archaic groups are thought to have had inferior cognition and less complex behavioral social organization than modern foragers And it is generally thought that such behaviors only emerged after the appearance of the Upper Paleolithic dated some 10 20 000 years later than the occupation of Tor Faraj

Bioarchaeology of Southeast Asia Marc Oxenham, Nancy Tayles, 2006-04-20 Bioarchaeology of Southeast Asia focuses uniquely on the physical remains of the prehistoric peoples of this region

Ancestral Zuni Glaze-decorated Pottery Deborah L. Huntley, 2008 In the Pueblo IV period 1275 1600 potters began to make distinctive polychrome vessels which have been linked by archaeologists to new ideologies and religious practices in the area This research examines interaction networks along settlement clusters in the Zuni region of west central New Mexico in the thirteenth and fourteenth centuries using analytical techniques such as INAA sourcing of ceramic pastes
