Fish for All Michael J. Chiarappa, Kristin M. Szylvian, 2003

The contentious claims of groups seeking to use Lake Michigan's fisheries resources were at the center of modern America's emerging environmental politics in the middle of the twentieth century. Going beyond the chronicling of past events, *Fish for All* contextualizes the shared experiences that shape each group's collective memory and presents their historical narratives as discourse that legitimizes their current claims to the resource. *Fish for All* highlights the historically charged consciousness of fishing communities and points to the evolving

communication that will take place between them fisheries historians fisheries anthropologists scientists and policymakers
