Collections Bernard S. Schlessinger, 2019-12-05 This book first published in 1982 offers an examination of the special nature of biochemistry collections It focuses on the production control and use of the literature diverse in nature and analysed here by specialist contributors *Biochemistry Collections, a Cross-disciplinary Survey of the Literature* Bernard S.

Schlessinger, 1982 **Selected Topics in the History of Biochemistry. Personal Recollections. Part III** G. Semenza, R.

Jaenicke, 2012-12-02 As in Volumes 35 and 36 the chapters in this new volume complement with personal recollections the History of Biochemistry that was covered in the Comprehensive Biochemistry Series Volumes 30-33 by M Florkin and Volume 34A by P Laszlo The biographical and autobiographical chapters will convey to the reader a lively albeit at times subjective view of the scientific and social environment in which the authors have worked resulting in new concepts and theories on the biological sciences **Designs for Life** Soraya de Chadarevian, 2002-05-30 An important study on the making of molecular

biology and its cultural contexts **Experiences in Biochemical Perception** L Ornston, 2012-12-02 Experiences in Biochemical Perception discusses the breadth of contributions of I C Gunsalus a versatile biochemist in the field of biochemistry This book explores the mechanism of electron transport to protein structure and documents the interface between the Gunsalus laboratory and the physicists Organized into five parts encompassing 27 chapters this book starts with a description of metabolic processes and the study of pyruvate oxidation This text then illustrates how studies of microbial respiration led to the discovery of pyridoxal phosphate Other chapters review dehydrogenases that participate in the dissimilation of branch chain aromatic acids This book further discusses the phosphorus nitrogen bond in phosphorylated proteins and the inactivation of glutamine synthetase The final chapter describes the elucidation of the function of the coenzyme biotin and generalizes about the use of bacteria in nutritional studies This book is a valuable resource for readers and researchers engaged in the study of genetics enzymology microbiology chemistry and spectroscopy **Nobel**

Laureates in Medicine or Physiology Daniel M. Fox, Marcia Meldrum, Ira Rezak, 2019-01-15 Originally published in 1990 Nobel Laureates in Medicine or Physiology is a biographical reference work about the recipients of Nobel Prizes in Medicine or Physiology from 1901-1989 Each article is written by an accomplished historian of medicine or science The book is designed to be accessible to students and general readers as well as to specialists in medical science and history Each article combines personal and scientific biography and each has an extensive bibliography to guide further reading and research

The Pentose Phosphate Pathway Terry Wood, 2012-12-02 The Pentose Phosphate Pathway aims to explore the pentose phosphate cycle and the practical techniques applied in its investigation The main focus of the book is the pentose phosphate cycle in animals as well as microorganisms and does not discuss the one related to photosynthesis The book covers the formulation of the pathway its types and its alternative formulations the preparation processes and analysis of the pathway and the enzymes involved Also covered in the book are the intermediates in intact cells and tissues distribution of enzymes

among different tissues and species the operation regulation and overall control of the pathway and the clinical nutritional and metabolic aspects of the pathway The text is recommended for biologists and biochemists who would like to understand further the pentose phosphate pathway and the processes related to it

The Life of a Virus Angela N. H. Creager, 2002 We normally think of viruses in terms of the devastating diseases they cause from smallpox to AIDS But in *The Life of a Virus* Angela N H Creager introduces us to a plant virus that has taught us much of what we know about all viruses including the lethal ones and that also played a crucial role in the development of molecular biology Focusing on the tobacco mosaic virus TMV research conducted in Nobel laureate Wendell Stanley's lab Creager argues that TMV served as a model system for virology and molecular biology much as the fruit fly and laboratory mouse have for genetics and cancer research She examines how the experimental techniques and instruments Stanley and his colleagues developed for studying TMV were generalized not just to other labs working on TMV but also to research on other diseases such as poliomyelitis and influenza and to studies of genes and cell organelles The great success of research on TMV also helped justify increased spending on biomedical research in the postwar years partly through the National Foundation for Infantile Paralysis's March of Dimes a funding priority that has continued to this day

Structures of Life Basil Achilladelis, Mary Ellen Bowden, 1989 A companion book to the CHF travelling exhibit by the same name Describing first the instruments and then the molecules it shows how instrumentation has helped chemistry and biology merge in the science of molecular biology
