 lure of mountains in German literature philosophy film music and culture from the Middle Ages to the twenty first century
 Mountains have always stirred the human imagination playing a crucial role in the cultural evolution of peoples around the
 globe and becoming infused with meaning in the process Beyond their geographical geological significance mountains affect
 the topography of the mind whether as objects of peril or attraction of spiritual enlightenment or existential fulfillment of
 philosophical contemplation or aesthetic inspiration This volume challenges the oversimplified assumption that human
 interaction with mountains is a distinctly modern development one that began with the empowerment of the individual in the
 wake of Enlightenment rationalism and Romantic subjectivity These essays by European and North American scholars
 examine the lure of mountains in German literature philosophy film music and culture from the Middle Ages to the present
 with a focus on the interaction between humans and the alpine environment The contributors consider mountains not as mere
 symbolic tropes or literary metaphors but as constituting a tangible reality that informs the experiences and ideas of writers
 naturalists philosophers filmmakers and composers Overall this volume seeks to provide multiple answers to questions
 regarding the cultural significance of mountains as well as the physical practice of climbing them Contributors Peter Arnds
