Reflections On Humanitarian Action Principles Ethics And Contradictions:

Reflections on Humanitarian Action HSU, Humanitarian Studies Unit, 2001-04-20 Humanitarian action has become a subject for serious debate in light of recent conflicts across the globe. The debacle in Somalia, the policy of intervention in Bosnia and domestic conflicts in the West over intervention in Kosovo have given rise to many complex questions surrounding humanitarian action. The contributors to this volume provide a systematic overview of the issues involved from a wide range of viewpoints. The book examines the central problems of humanitarian action: the judicial question and the right to humanitarian assistance, the ethical framework of humanitarian action, the challenge of coordination of all the actors involved in humanitarian action, the recipients in the aid chain, the link between aid development and emergency action, the role of the media and a practical evaluation of Operation Lifeline Sudan. *Reflections On Humanitarian Action*

Humanitarian Studies Unit, 2001-04-20 A critical account of the politics of aid giving. Humanitarian Action Andrej Zwitter, Christopher K. Lamont, Hans-Joachim Heintze, Joost Herman, 2015 The laws governing humanitarian action stand at the intersection of several fields of international law: regional agreements, soft law and domestic law. Through in-depth case studies and analysis, expert scholars and practitioners shed light on the subject and make sense of the various elements involved. The Law of International Humanitarian Relief in Non-International Armed Conflicts Matthias

Vanhullebusch, 2021-10-05 This book comprehensively covers the entire scope of conflicting rights and duties of the fighting parties and international humanitarian relief actors in non-international armed conflicts, namely from the moment of the initiation of international humanitarian relief actions till their authorisation and throughout the consecutive stages of the delivery of relief. From the practice of frontline humanitarian negotiations, this book reconceptualizes how those rights and duties are coming into being and how compliance with agreements on humanitarian access and other international humanitarian law and international human rights norms can be ensured and/or their normativity can be strengthened.

Totten, 2008-03-31 This volume is comprised of over 2,300 annotations on a wide array of issues and topics germane to the subject of preventing the atrocities of genocide and managing these conflicts when they do arise. Samuel Totten brings together in one comprehensive collection the research and findings in various fields such as political science, sociology, history and psychology to enable specialists in genocide studies, peace studies and conflict resolution to benefit from the

insights of a diverse range of scholars and foster an understanding of how the various components of genocide studies connect. Among the topics included are key conventions, international treaties and covenants, genocide, early warning signals and forecasting risk, data bases, sanctions, peacekeeping missions, conflict resolution, the International Criminal Court, realpolitik vis-à-vis the issue of genocide prevention and intervention, key non-governmental agencies, key governmental and UN bodies working on these important issues. In addition to the annotations, Totten frames the bibliography with a major essay that introduces the reader to the subject of prevention and intervention of genocide, raising a host of critical issues regarding the strengths, weaknesses and limitations of various approaches germane to issues of managing these conflicts.

The Ethics of Military Privatization David M. Barnes, 2016-08-25. This book explores the ethical implications of using armed contractors taking a consequentialist approach to this multidisciplinary debate. While privatization is not a new concept for the US military, the public debate on military privatization is limited to legal, financial and pragmatic concerns. A critical assessment of the ethical dimensions of military privatization in general is missing. More specifically, in light of the increased reliance upon armed contractors, it must be asked whether it is morally permissible for governments to employ them at all. To this end, this book explores four areas that highlight the ethical implications of using armed contractors: how armed contractors are distinct from soldiers and mercenaries, the commodification of force, the belligerent equality of combatants and the impact of armed contractors on the professional military. While some take an absolutist position wanting to bar the use of private military altogether, this book reveals how these absolutist arguments are problematic and highlights that there are circumstances where turning to private force may be the only option. Recognising that outsourcing force will continue, this book thus proposes some changes to account for the problems of commodification, belligerent equality and the challenge to the military profession. This book will be of interest to students of private security, military studies, ethics, security studies and IR in general.

Disaster Relief Aid Bimal Kanti Paul, 2018-05-07. *Disaster Relief Aid: Changes and Challenges* provides a comprehensive analysis of disaster relief efforts undertaken globally during the last several decades and examines the changes and challenges that have emerged over time. The book evaluates the current state of disaster relief and discusses how it may be improved. The author examines salient features of disaster relief operations and provides an overview of the development of global humanitarian assistance programs. The book also explores how disaster aid is channelled from non-affected areas to affected areas. Using five major natural and man-made disasters as case studies, the book analyses the nature and extent of emergency relief efforts undertaken for each. The final chapter covers the post-disaster convergence phenomenon, outlines the major challenges of international disaster relief operation and finally posits recommendations on how to improve future disaster relief efforts. This is an essential interdisciplinary text on disaster response for both undergraduate and graduate students as well as an invaluable resource for disaster researchers, managers and numerous international and national non-governmental organizations, NGOs and international agencies.

Education, Conflict and

Development Julia Paulson, 2011-05-16 Under various names education and conflict education and fragility education and insecurity etc the understanding of linkages between education and violent conflict has emerged as an important and pressing area of inquiry Work and research by practitioners and scholars has clearly pointed to the negative potential of education to contribute to and entrench violent conflict This work has highlighted the struggle for education during and following periods of instability and demonstrated the degree to which communities affected by conflict prioritize educational opportunities It has also offered powerful normative arguments for the importance of quality education for peacebuilding reconciliation postconflict reconstruction and development In many instances however these important insights are derived less from rigorous research and scholarship in the social sciences than from the delivery and evaluation of educational programming in situations affected by conflict This volume therefore seeks to broaden enquiry into education and conflict by exploring through conceptual and empirical work its linkages to broader theories and practices of development and peacebuilding The volume begins with a conceptual and theoretical section followed by a series of international case studies before closing with three chapters focused on the case of Northern Uganda Contributors present a diverse set of studies that together deepen understandings of the ways the education functions in various situations affected by conflict and the ways in which it might best be mobilized to contribute towards peacebuilding and development New Perspectives in Information Systems and Technologies, Volume 1 Álvaro Rocha, Ana Maria Correia, Felix . B Tan, Karl . Mertus, 2013-06-17 It has become routine for the U S government to invoke human rights to justify its foreign policy decisions and military ventures But this human rights talk has not been supported by a human rights walk Policymakers consistently apply a double standard for human rights norms one the rest of the world must observe but which the U S can safely ignore Based on extensive interviews with leading foreign policymakers military officials and human rights advocates Mertus tells the story of how America s attempts to promote human rights abroad have paradoxically undermined those rights in other countries The second edition brings the story up to date including new sections on the second half of the Bush administration and the Iraq War and updates on Afghanistan The first edition of Bait and Switch won the American Political Science Association s 2005 Best Book on Human Rights *Last Mile Logistics for Disaster Relief Supply Chain*
