Reflective Teacher Development In Primary Science:

Reflective Teacher Development in Primary Science Peter Ovens, 2005-08-10 Dominant theories about primary science contend that knowledge is the key Ovens challenges this view showing through case studies that inquiry and reflection play a significant part in the learning process This applies to pupils teachers and teacher educators Taking curiosity as a pre condition for good learning Ovens shows that it is possible to increase the desire to learn more and learn better to improve confidence in the ability to inquire to imbue pupils with the courage to seek improvement to place trust in collaborative processes to raise awareness of significant detail and to encourage open mindedness

Using Digital Video in Initial Teacher Education John McCullagh, 2025-02-28 A research based critical yet practical exploration of the benefits of using digital video in teacher education Digital video is easy to use and student teachers find it incredibly helpful Since Dwight Allen first used microteaching five decades ago video has been recognised as an ideal medium for capturing the complex nature of teaching Through its accurate and honest representation of reality it reveals both the cognitive and affective aspects of learning to teach This book serves as a theory related rationale and a practice informed critical guide for teacher educators considering how best to use video within their programmes It explores how video technology can be used to enrich learning in both higher education and school settings enhancing the continuity of the learning experience Using evidence based examples of best practice and critical discussions relating theory and policy to practice it encourages teacher educators to engage with the use of video technology and explore how it meets the needs of learners and the current requirements of initial teacher education

Reflective Theory and Practice in Teacher Education Robyn Brandenburg, Kathryn Glasswell, Mellita Jones, Josephine Ryan, 2017-03-30 This book offers a detailed examination of reflective practice in teacher education In the current educational context where reflective practice has been mandated in professional standards for teachers in many countries it analyses research based evidence for the power of

reflective practice to shape better educational outcomes The book presents multiple theoretical and practical views of this often taken for granted practice so that readers are challenged to consider how factors such as gender and race shape understandings of reflective practice Documenting approaches that enhance learning the contributions discuss reflective practice across the globe with a focus on pre service in service and university teachers At a time when there is pressure to measure teachers work through standardised tests the book highlights the professional thinking that is integral to teaching and demonstrates ways it can be encouraged in beginning teachers Aimed at the international community of teacher educators in schools and universities it also includes a critical examination of methodological issues in analysing and evaluating reflective practice and showcases the kind of reflective practice that empowers teachers and pre service teachers to make a difference to students

Reconstructing Teacher Education John Elliott, 2012 This book maps out a new paradigm of teacher education and by implication professional education generally The book opens with two alternative theories of teacher education and training and explains the concepts and assumptions on which they rest including beliefs about the nature and role of education in society It then proposes a natural science paradigm and its implications for establishing a coherent view of teacher education Subsequent chapters indicate the professional implications of such a model
