Personnel Clearances: Key Factors for Reforming the Security Clearance Process Brenda S. Farrell, 2008-10 Efforts to reform personnel security clearance processes should consider among other things the following four key factors 1 a strong requirements determination process 2 quality in all clearance processes 3 metrics to provide a fuller picture of clearance processes and 4 long term funding requirements of security clearance reform In February 2008 GAO noted that a sound requirements process is important because requesting a clearance for a position in which it will not be needed or in which a lower level clearance would be sufficient will increase both costs and investigative workload unnecessarily For example the cost of obtaining and maintaining a top secret clearance for 10 years is approximately 30 times greater than the cost of obtaining and maintaining a secret clearance for the same period Also changing a position's clearance level from secret to top secret increases the investigative workload for that position about 20 fold
