reform Guardiancich employs a historical institutionalist framework to analyze the policies actors and institutions that characterized the period between the collapse of socialism and the global financial crisis of 2008 2011 He argues that viable pension reforms should not be seen simply as an event but rather as a continuing process that must be fiscally socially and politically sustainable In particular the primary goal of a pension scheme is to reduce poverty provide adequate retirement income and insure against the risks of old age within given fiscal constraints and this will happen only if the scheme enjoys continuing political support at all levels To this end the author individuates those institutional characteristics of countries that increase the consistency of reforms and lower the likelihood of policy reversals in time Pension Reforms in Central Eastern and Southeastern Europe will be of interest to students and scholars of political science political economy social policy and economics
