Subject Guide to Books in Print ,1971 **American Education** ,1984 *Reclaiming the Teaching Discourse in Higher Education* Ian M. Kinchin,2025-02-20 This book examines university teaching to encourage a move away from the singular lens of neoliberalism towards more a pluralistic stance that inspires a healthy diversity of theories and practices University teaching is dominated by neoliberal cultures of measurement consumerism and deficit generating a monocultural narrative that disenfranchises the higher education teaching community Collaborative communities of support are now perceived as performative regimes of surveillance and existing injustices in the education system have been amplified by institutional responses to the COVID 19 pandemic This book offers a reappraisal of the current state of university teaching and re imaginings of potential futures Inspired by emerging perspectives in educational research and building upon Biesta s notion of the rediscovery of teaching the book encourages an escape from accepted wisdom liberating teaching from the bonds of reductive binary and linear thinking and accepting the need for a plurality of theoretical perspectives While universities use popular terms such as student centredness global excellence active learning and so on and will highlight key performance metrics such as student satisfaction or teaching excellence awards the reality is that much current teaching practice is rather traditional teacher centred passive and content heavy Despite managerial emphasis on best practice and evidence based practice teaching is not reducible to a simple set of competencies and student learning is not adequately summarised as a list of graduate attributes Teaching is relational and highly context dependent and our discussion of teaching should recognise this The performative culture pervading many campuses can dampen down large scale innovation leaving marginalised pockets of subversive collaboration and experimentation to operate below the corporate radar Here the contributors give voice to some of those emerging ideas and challenge neoliberal orthodoxy **Reclaiming Community** Bianca J. Baldrige,2019-05-28 Approximately 2 4 million Black youth participate in after school programs which offer a range of support including academic tutoring college preparation political identity development cultural and emotional support and even a space to develop strategies and tools for organizing and activism In *Reclaiming Community* Bianca Baldrige tells the story of one such community based program Educational Excellence EE shining a light on both the invaluable role youth workers play in these spaces and the precarious context in which such programs now exist Drawing on rich ethnographic data Baldrige persuasively argues that the story of EE is representative of a much larger and understudied phenomenon With the spread of neoliberal ideology and its reliance on racism marked by individualism market competition and privatization these bastions of community support are losing the autonomy that has allowed them to

embolden the minds of the youth they serve Baldrige captures the stories of loss and resistance within this context of immense external political pressure arguing powerfully for the damage caused when the same structural violence that Black youth experience in school starts to occur in the places they go to escape it
