Religion in Modern Europe Grace Davie,2000 This work examines religion as a form of collective memory a memory held in place by Europe s institutional churches but under increasing pressure due to rapid social and economic change

Religion in Modern Europe Grace Davie,2023 This work examines religion as a form of collective memory a memory held in place by Europe s institutional churches but under increasing pressure due to rapid social and economic change

Religion in Modern Europe Grace Davie,2000 *Religion in Modern Europe* Grace Davie,2000-08-03 Religion in Modern Europe examines religion as a form of collective memory This is a memory held in place by Europe s institutional churches educational systems and the mass media all of which are themselves responding to rapid social and economic change Europe s religious memory is approached in the following ways as vicarious a particularly European characteristic as precarious especially among young people and as it is portrayed by the media The memory may fragment be disputed and in extreme cases disappear Alternatives may emerge The challenge for European societies is to affirm healthy mutations in religious memory and discourage others The book also examines the increasing diversity of Europe s religious life European Societies Series Series Editor Colin Crouch Very few of the existing sociological texts which compare different European societies on specific topics are accessible to a broad range of scholars and students The European Societies series will help fill this gap in the literature and attempt to answer questions such as Is there really such a thing as a European model of society Do the economic and political integration processes of the European Union also imply convergence in more general aspects of social life like family or religious behaviour What do the societies of Western Europe have in common with those further to the east This series will cover the main social institutions although not every author will cover the full range of European countries As well as surveying existing knowledge in a way that will be useful to students each book will also seek to contribute to our growing knowledge of what remains in many respects a sociologically unknown continent **The**

Politics of Secularism in International Relations Elizabeth Shakman Hurd,2009-01-10 Conflicts involving religion have returned to the forefront of international relations And yet political scientists and policymakers have continued to assume that religion has long been privatized in the West This secularist assumption ignores the contestation surrounding the category of the secular in international politics The Politics of Secularism in International Relations shows why this thinking is flawed and provides a powerful alternative Elizabeth Shakman Hurd argues that secularist divisions between religion and politics are not fixed as commonly assumed but socially and historically constructed Examining the philosophical and historical legacy of the secularist traditions that shape European and American approaches to global politics she shows why this matters for contemporary international relations and in particular for two critical relationships the United States and Iran and the European Union and Turkey The Politics of Secularism in International Relations develops a new approach to religion and international relations that challenges realist liberal and constructivist assumptions that religion has been

excluded from politics in the West The first book to consider secularism as a form of political authority in its own right it describes two forms of secularism and their far reaching global consequences *Modernities, Memory and Mutations* Abby Day, Mia Lövheim, 2016-03-03 Grace Davie one of the world's most influential scholars in contemporary sociology of religion has furthered a tradition developed by David Martin and others in comparative sociology of religion and modernity in European and international perspective Davie's writings on belief and belonging particularly in a context outside active Church participation have contributed important understandings of the cultural role of religion as memory and practice in contemporary European societies Through her most recent work on new roles of religion in relation to the political legal and welfare sectors of society she has addressed debates on the resurgence of religion and the post secular condition *Modernities Memory and Mutations* presents an overview and critical engagement with contemporary themes in the sociology of religion which will inform current and forthcoming generations of scholars Reflecting on how Grace Davie's contributions have influenced their own work and wider debates in the field leading international scholars engage with themes Davie has critically explored across religious studies and mainstream sociology evolving a new research agenda for sociology of religion

Welfare and Religion in 21st Century Europe Anders Bäckström, Grace Davie, Ninna Edgardh, Per Pettersson, 2016-02-24 Historically European churches have played a large part in the provision of welfare Responsibility however has gradually shifted to the state a shift that forms an integral part of the process of secularization and one that has been readily accepted by European populations But what happens when the state itself begins to recede a process that is occurring in most if not all European societies for a wide variety of reasons The implications for welfare are considerable not least for the role of the churches which begin to resume the responsibilities previously shed but in new and different ways This book looks at the connections between religion and welfare in Europe exploring in detail eight European societies Finland Norway Sweden England Germany France Italy and Greece The different theological traditions different church state relationships and different welfare regimes are all examined The analysis is based on first hand empirical research which considers not only the changing situation on the ground but attitudes towards this within a range of different constituencies the churches local government and the general public Particular attention is paid to the significance of gender in both the process of change and in attitudes towards this *Welfare and Religion in 21st Century Europe* Volume 1 represents comparative research at its best and highlights key policy implications for the future A companion book *Welfare and Religion in 21st Century Europe* Volume 2 explores thematically the changing nature of religion and welfare and the new relationships that are emerging between the religious and the secular and between church and state in the 21st century **The Social Significance of Religion in the Enlarged Europe** Olaf Müller, 2016-02-24 Engaging with some of the central issues in the sociology of religion this volume investigates the role and significance of churches and religion in contemporary Western and Eastern Europe Based on an extensive international research project it offers case studies of various countries including Finland

Ireland Portugal Germany Poland Russia Estonia Hungary and Croatia as well as cross country comparisons Researching more precisely the present social relevance of church and religion at different levels The Social Significance of Religion in the Enlarged Europe raises and responds to both descriptive and explanatory questions Can we observe tendencies of religious decline in the various Western and Eastern European countries Are we witnessing trends of religious individualization To what extent has there been a religious upswing in the last few years And what are the factors causing the observed processes of religious change Marked by its broad range of data and a coherent conceptual framework in accordance with which each chapter assesses the extent to which three important theoretical approaches in the sociology of religion secularization theory the market model of religion and the individualization thesis are applicable to the data this book will be of interest to scholars of sociology politics and religion exploring religious trends and attitudes in contemporary Europe

Memory and Religion from a Postsecular Perspective Zuzanna Bogumił, Yuliya Yurchuk, 2022-02-27 The book argues that religion is a system of significant meanings that have an impact on other systems and spheres of social life including cultural memory The editors call for a postsecular turn in memory studies which would provide a more reflective and meaningful approach to the constant interplay between the religious and the secular This opens up new perspectives on the intersection of memory and religion and helps memory scholars become more aware of the religious roots of the language they are using in their studies of memory By drawing on examples from different parts of the world the contributors to this volume explain how the interactions between the religious and the secular produce new memory forms and content in the heterogeneous societies of the present day world These analyzed cases demonstrate that religion has a significant impact on cultural memory family memory and the contemporary politics of history in secularized societies At the same time politics grassroots movements and different secular agents and processes have so much influence on the formation of memory by religious actors that even religious ecclesiastic and confessional memories are affected by the secular This volume is ideal for students and scholars of memory studies religious studies and history

Youth in Europe: An international empirical study about the impact of religion on life orientation Hans-Georg Ziebertz, William K. Kay, 2005 This book draws upon empirical data collected from 10 000 adolescent young people in 10 European countries The first volume of this project was about young people's life perspectives and the second about their religious attitudes and practices The current and final volume of this cross cultural study connects both research dimensions The analyses make clear that the influence of religion on values life orientation and politics differs strongly between different groups within Christianity and between Christians Jews and Muslims Many findings contain obvious surprises because they refute mainstream opinion on many topics The book gives detailed and new insights in the public relevance of the religiosity of young people across Europe All three volumes together are indispensable for scholars who work in public religious and educational contexts

The Sixties and Beyond Nancy Christie, Michael Gauvreau, 2013-01-01 In the decades following the Second World War North America and Western

Europe experienced widespread secularization and dechristianization many scholars have pinpointed the 1960s as a pivotally important period in this decline *The Sixties and Beyond* examines the scope and significance of dechristianization in the western world between 1945 and 2000 A thematically wide ranging and interdisciplinary collection *The Sixties and Beyond* uses a framework that compares the social and cultural experiences of North America and Western Europe during this period The internationally based contributors examine the dynamic place of Christianity in both private lives and public discourses and practices by assessing issues such as gender relations family life religious education the changing relationship of church and state and the internal dynamics of religious organizations *The Sixties and Beyond* is an excellent contribution to the burgeoning scholarship on the 1960s as well as to the history of Christianity in the western world

Migration and Religion in Europe Ester Gallo, 2016-04-22 Religious practices and their transformation are crucial elements of migrants identities and are increasingly politicized by national governments in the light of perceived threats to national identity As new immigrant flows shape religious pluralism in Europe longstanding relations between the State and Church are challenged together with majority faith traditions and societies ways of representing and perceiving themselves With attention to variations according to national setting this volume explores the process of reformulating religious identities and practices amongst South Asian communities in European contexts Presenting a wide range of ethnographies including studies of Hinduism Sikhism Jainism and Islam amongst migrant communities in contexts as diverse as Norway Italy the UK France and Portugal *Migration and Religion in Europe* sheds light on the meaning of religious practices to diasporic communities It examines the manner in which such practices can be used by migrants and local societies to produce distance or proximity as well as their political significance in various host nations Offering insights into the affirmation of national identities and cultures and the implications of this for governance and political discourse within Europe this book will appeal to scholars with interests in anthropology religion and society migration transnationalism and gender

The Critical Study of Non-Religion Christopher R. Cotter, 2020-07-09 This book acts as a bridge between the critical study of religion and empirical studies of religion in the real world Chris Cotter presents a concise and up to date critical survey of research on non religion in the UK and beyond before presenting the results of extensive research in Edinburgh s Southside which blurs the boundary between religion and non religion In doing so Cotter demonstrates that these are dynamic subject positions and phenomena can occupy both at the same time or neither depending on who is doing the positioning and what issues are at stake This book details an approach that avoids constructing religion as in some way unique whilst also fully incorporating non religious subject positions into religious studies It provides a rich engagement with a wide variety of theoretical material rooted in empirical data which will be essential reading for those interested in critical sociological and anthropological study of the contemporary non religious landscape

Religion, Politics and Law in the European Union Lucian N. Leustean, John T.S. Madeley, 2013-09-13 EU enlargement to countries in Central and Eastern Europe in 2004 the inclusion of Bulgaria and

Romania in 2007 and increasing debates on Turkey's membership has dramatically transformed the European Union into a multi religious space Religious communities are not only shaping identities but are also influential factors in political discourse This edited volume examines the activities of religious actors in the context of supranational European institutions and the ways in which they have responded to the idea of Europe at local and international levels By bringing together scholars working in political science history law and sociology this volume analyses key religious factors in contemporary EU architecture such as the transformation of religious identities the role of political and religious leaders EU legislation on religion and the activities of religious lobbies This book was published as a special issue of Religion State and Society *The Oxford Handbook of Religion and Europe* Grace Davie, Lucian Leuștean, 2022 Features contributions from leading scholars providing crucial insight into the role of religious ideas structures and institutions in the making of Europe Introduces the building blocks of Europe's religious and the part that they played in the formation of the continent Explores the relationship between religious communities and ideologies in the twentieth century connections that play out very differently in East and West Europe Examines the role of religion in the construction of the European Union from the end of the Second World War until the present day Assesses the relationship between the major world religions and the idea of Europe Book jacket

Faith in the Familiar Kim Knibbe, 2013-06-20 Faith in the Familiar is an ethnography of religious change in the Netherlands a country that has moved from strongly pillarized to strongly secularist in the space of fifty years This book shows how people look back on this but also how Catholic rituals continue to play a role in the reproduction of place Furthermore it shows how forms of spiritualism and new age have become part of a pluralistic local religious landscape and are used to create new ways of relating to religious authority and to reshape personal relationships Situating itself within general theories of religious change in Western Europe it offers a contribution to this discussion from an angle that is often neglected focusing on locality rather than on globalization on what happens to old religion rather than on new religious trends on popular forms of spirituality rather than on middle class and highbrow spirituality **Religion and**

Democratizations Jeffrey Haynes, 2013-09-13 This book examines key debates on religion and democratization from three main perspectives Religious traditions have core elements which are more or less conducive to democratization and democracy Religious traditions may be multi vocal but at any moment there may be dominant voices more or less receptive to and encouraging of democratization Religious actors rarely if ever determine democratization outcomes However they may in various ways and with a range of outcomes be of significance for democratization The contributions are divided into two sections 1 Religion democratization and democracy and 2 Secularization democratization and democracy Overall they examine the three assertions in the bullet points above The book's starting point is that in general around the world religions have left their assigned place in the private sphere This means they have in many cases become recognisably politically active in various ways and with assorted outcomes This re emergence from political marginality dates back until at least the

1980s At that time the US sociologist Jose Casanova noted that what was new and became news was the widespread and simultaneous refusal of religions to be restricted to the private sphere This involved a remodelling and re assumption of public roles by religion which theories of secularisation had long condemned to social and political marginalisation This book was published as a special issue of Democratization

The Decline of Christendom in Western Europe, 1750-2000

Hugh McLeod, Werner Ustorf, 2003-07-17 Christendom lasted for over a thousand years in Western Europe and we are still living in its shadow For over two centuries this social and religious order has been in decline Enforced religious unity has given way to increasing pluralism and since 1960 this process has spectacularly accelerated In this 2003 book historians sociologists and theologians from six countries answer two central questions what is the religious condition of Western Europe at the start of the twenty first century and how and why did Christendom decline Beginning by overviewing the more recent situation the authors then go back into the past tracing the course of events in England Ireland France Germany and the Netherlands and showing how the fate of Christendom is reflected in changing attitudes to death and to technology and in the evolution of religious language They reveal a pattern more complex and ambiguous than many of the conventional narratives will admit

Religion and Politics in Europe, the Middle East and North Africa Jeffrey Haynes, 2009-10-16 This book examines the political activities of selected religious actors in Christian Muslim and Judaist contexts in Europe and the Middle East It explores the challenges these religious actors face in terms of citizenship democracy and secularisation

The Routledge Handbook of Religion and Politics in Europe Effie Fokas, Alberta Giorgi, 2025-12-30 The Routledge Handbook of Religion and Politics in Europe is an outstanding reference source to this engaging subject area A number of developments at the intersection between religion and politics in Europe including the terrorist attacks echoing that of 9 11 the rise of the far right and populism linked to anti Islamic rhetoric in the context of migration of Muslims into Europe and a series of controversies to do with free speech and hate speech have served as a catalyst for a surge in interdisciplinary scholarship The relationships between religion and politics are increasingly recognised as central to our understanding of contemporary European life and are investigated from a growing variety of approaches and perspectives Comprising 31 chapters by a team of international contributors this handbook is divided into three parts Theoretical underpinnings and methodological perspectives Actors policies and institutions Emerging themes and current debates Within these sections central issues debates and problems to religion and politics are examined including migration religion in the city digital religion environmentalism humour celebrity and leadership activism authority citizenship mediatisation secularism judicialisation marketisation political economy security European parliament human rights party politics populism feminism political violence hate speech bioethics pandemics and health cults race equality and inequality The Routledge Handbook of Religion and Politics in Europe is essential reading for students and researchers in religious studies and politics This handbook will also be very useful for those in related fields such as cultural studies media studies anthropology and sociology
