Religion On Trial:

Religion on Trial Craig A. Parton, 2008-07-28 In a concise and devastating style Craig Parton an experienced trial lawyer versed in the laws of legal evidence argues that religions uniformly fail the simplest tests of admissibility for their respective claims Few religions even bother to make testable assertions relying instead at best on subjective and existential appeals The stunningly few historical and thus verifiable claims of a precious few religions can be swiftly sorted out and the result is an astounding vindication of the central nonhearsay claims of the first century eyewitnesses to the life and work of Jesus Christ This work challenges the prevailing viewpoint that all religions are making the same or even similar allegations More troubling than this prevailing view is that the religions of the world remain diametrically opposed on the issues of the nature of humanity the reality of evil the nature of history and the way of salvation Sorting out the clashing claims of religions is the task of this book and a trial lawyer well schooled in the laws of admissible evidence brings insight and clarity to matters normally thought to be solely in the domain of philosophers and theologians *God in the Courtroom* Brian

Bornstein, Monica Miller, 2009-10-29 The authors review legal developments and behavioural science research concerning the effects of religion on legal practice decision making processes of various actors and trial outcomes Chapters address jury selection and bias attorneys use of religion in legal movements judges religious belief and much more *Religion on Trial*

Phillip E. Hammond, David W. Machacek, Eric Michael Mazur, 2004 The free exercise of conscience is under threat in the United States Already the conservative bloc of the Supreme Court is reversing the progress of religious liberty that had been steadily advancing And this danger will only increase if more conservative judges are nominated to the court This is the impassioned argument of *Religion on Trial* Against Justices Scalia Thomas and Chief Justice Rehnquist the authors argue that what the First Amendment protects is the freedom of individual conviction not the rights of sectarian majorities to inflict their values on others Beginning with an analysis of the origins of the Constitution and then following the history of significant church state issues *Religion on Trial* shows that the trajectory of American history has been toward greater freedoms for more Americans freedom of religion moving gradually toward freedom of conscience regardless of religion But in the last quarter century conservatives have gained political power and they are now attempting to limit the ability of the Court to protect the rights of individual conscience Writing not just as scholars but as advocates of church state separation Hammond Machacek and Mazur make the strong case that every American needs to pay attention to what is happening on the Supreme Court or risk losing the liberties of conscience and religion that have been gained so far ***Religion on Trial***

James John Jurinski, 2003-12-02 From colonial times to the present an insightful examination of how courts have determined the extent to which religion is accommodated in American public life From the internationally renowned Scopes Monkey Trial of 1925 which pitted a public school teacher arrested for teaching evolution against the state of Tennessee *Religion on Trial* chronicles key court cases that have shaped the tumultuous relationship between church and state throughout U S history

This volume chronicles such groundbreaking cases as the 1991 decision ordering blood transfusions for children of Christian Scientists in *Norwood Hospital v Munoz* and the infamous case *Engel v Vitale* that banned prayer in schools and ignited calls for Chief Justice Earl Warren's impeachment. The work addresses such inflammatory contemporary disputes as prayer in schools, allegiance to the flag and the display of religious symbols on public property and the impact they have had on American society.

Religion on Trial Craig A Parton, 2015-06-25 Craig Parton argues that religions fail the simplest tests of admissibility for their respective claims and few religions bother to make testable assertions relying instead at best on subjective and existential appeal. This work challenges the prevailing viewpoint that all religions are making the same or even similar allegations. More troubling than this prevailing view is that the religions of the world remain diametrically opposed on the issues of the nature of humanity, the reality of evil, the nature of history and the way of salvation. The author succeeds in sorting out the clashing claims of religions and in bringing insight and clarity to matters normally thought to be solely in the domain of philosophers and theologians.

Religion on Trial: An Essay on Deliberalism Astrid von Busekist, 2025-09-30 The book deals with three specific encounters between the law and religious commandments: separationism, composition and cooperation, homeschooling, circumcision, the Get laws and how legal practitioners handle hard cases on a pragmatic basis. Its distinctiveness might be summarized as follows: The book is based on 3 empirical real life scenarios (see Introduction) involving confrontations between religious commandments and secular law, conflicts between fundamental principles of different normative orders. Instead of asking how liberal constitutionalism should normatively handle these cases as the books and articles of my competitors listed below do, I suggest that the threshold between permissible compatible religious practices is moving and should be treated contextually and pragmatically. My main claim is that there is not one single version of secularism or *laïcité* in the French context but a multiplicity of possible dialogues between representatives of faith communities and representatives of the legal political community. My scenarios show that decisions are guided by a context specific balance between democratic values, foremost equality and freedom. Sometimes these cardinal values conflict and judges must rank them. The articulation between religion and politics is not stable, not written in advance, not subsumable under a clear rule. Legal principles are not hierarchically ordered *a priori* as all my cases show: even first order principles, freedom, equality, must sometimes be weighed against each other. I try to theorize each of these pragmatic interactions under the umbrella concept of deliberalism and show that my scenarios display three different types of interaction between orders that range from a strong separation to outright cooperation. The counterintuitive dimension of my book is to say that even in a very well documented field, Church and state relations, secularism is not a thick concept, not a theory but a practice.
