Constitutions, Religion and Politics in Asia Dian A. H. Shah, 2017-10-26 As religious polarisation in society deepens political actors and policy makers have begun to struggle with questions on the role of the dominant religion and how religion influences constitutional commitments and development By focusing on Indonesia Malaysia and Sri Lanka Constitutions Religion and Politics in Asia demonstrates how constitution making and the operation of constitutional arrangements involving religion cannot be separated from the broader political dynamics of society Although constitutions establish legal and political structures of government institutions and provide tools for rights protection they do not operate in a vacuum divorced from the games of power and the political realities surrounding them Here Shah sets out how constitutions operate and evolve and demonstrates how constitutional provisions can produce unintended consequences over time A vital new source of scholarship for students and scholars of law and religion and comparative constitutional law and those interested in issues of constitutionalism and legal and political history in Asia Between State and Synagogue Guy Ben-Porat, 2013-03-25 A thriving yet small liberal component in Israeli society has frequently taken issue with the constraints imposed by religious orthodoxy largely with limited success However Guy Ben Porat suggests in recent years in part because of demographic changes and in part because of the influence of an increasingly consumer oriented society dramatic changes have occurred in secularization of significant parts of public and private lives Even though these fissures often have more to do with lifestyle choices and economics than with political or religious ideology the demands and choices of a secular public and a burgeoning religious presence in the government are becoming ever more difficult to reconcile The evidence which the author has accrued from numerous interviews and a detailed survey is nowhere more telling than in areas that demand religious sanction such as marriage burial the sale of pork and the operation of businesses on the Sabbath Sub-State Governance through Territorial Autonomy Markku Suksi, 2011-07-17 This study focuses on territorial autonomy which is often used in different conflict resolution and minority situations Four typical elements are identified on the basis of the historical example of the Memel Territory and the so called Memel case of the PCIJ distribution of powers participation through elections and referendums executive power of territorial autonomy and international relations These elements are used for a comparative analysis of the constitutional law that regulates the position of six currently existing special jurisdictions the land Islands in Finland Scotland in the United Kingdom Puerto Rico in the United States of America Hong Kong in China Aceh in Indonesia and Zanzibar in Tanzania The current sub state entities examined can be arranged in relation to Memel in a manner that indicates that Hong Kong and the land conform to the typical territorial autonomy while Puerto Rico and Aceh should probably not be understood as territorial autonomies proper At the same time the territorial autonomies can be distinguished from federally organized sub state entities **Rights, Religious Pluralism and the Recognition of Difference** Dorota Anna Gozdecka, 2015-08-27 Human rights and their principles of interpretation are the

leading legal paradigms of our time Freedom of religion occupies a pivotal position in rights discourses and the principles supporting its interpretation receive increasing attention from courts and legislative bodies This book critically evaluates religious pluralism as an emerging legal principle arising from attempts to define the boundaries of freedom of religion It examines religious pluralism as an underlying aspect of different human rights regimes and constitutional traditions It is however the static and liberal shape religious pluralism has assumed that is taken up critically here In order to address how difference is vulnerable to elimination rather than recognition the book takes up a contemporary ethics of alterity More generally and through its reconstruction of a more difference friendly vision of religious pluralism it tackles the problem of the role of rights in the era of diverse narratives of emancipation

War and Religion in the Secular Age Davis Brown, 2019-11-12 Is religion a factor in initiating interstate armed conflict and do different religions have different effects Breaking new ground in political science this book explores these questions both qualitatively and quantitatively concluding that the answer is yes Previous studies have focused on conflict within states or interstate aggression with overtly religious motivations in contrast Brown shows how religion affects states propensities to militarize even disputes that are not religious in nature Different religions are shown to have different influences on those propensities and those influences are linked to the war ethics inculcated in those religions The book analyses and classifies war ethics contained in religious scripture and other religious classics teachings of religions contemporary epistemic communities and religions historical narratives Using data from the new Religious Characteristics of States dataset project qualitative studies are combined with empirical measurements of governments institutional preferences and populations cultures This book will provide interesting insights to scholars and researchers in international security studies political science international law sociology and religious studies

The SAGE Handbook of the Sociology of Religion James A Beckford, Jay Demerath, 2007-10-29 In their introduction to this Handbook the editors affirm Many sociologists have come to realise that it makes no sense now to omit religion from the repertoire of social scientific explanations of social life I wholeheartedly agree I also suggest that this wide ranging set of essays should become a starting point for such enquiries Each chapter is clear

comprehensive and well structured making the Handbook a real asset for all those engaged in the field Grace Davie University of Exeter Serious social scientists who care about making sense of the world can no longer ignore the fact that religious beliefs and practices are an important part of this world This Handbook is a valuable resource for specialists and amateurs alike The editors have done an exceptionally fine job of incorporating topics that illuminate the range and diversity of religion and its continuing significance throughout the world Robert Wuthnow Princeton University At a time when religions are increasingly affecting and affected by life beyond the narrowly sacred sphere religion everywhere seems to be caught up in change and conflict In the midst of this contention and confusion the sociology of religion provides a rich source of understanding and explanation This Handbook presents an unprecedentedly comprehensive assessment of the field both where it has been and where it is headed Like its many distinguished contributors its topics and their coverage are truly global in their reach The Handbook s 35 chapters are organized into eight sections basic theories and debates methods of studying religion social forms and experiences of religion issues of power and control in religious organizations religion and politics individual religious behaviour in social context religion self identity and the life course and case studies of China Eastern Europe Israel Japan and Mexico Each chapter establishes benchmarks for the state of sociological thinking about religion in the 21st century and provides a rich bibliography for pursuing its subject further Overall the Handbook stretches the field conceptually methodologically comparatively and historically An indispensable source of guidance and insight for both students and scholars Choice Outstanding Academic Title 2009

and spirituality Implications are considered for three school contexts the spiritual and moral dimension to the general curriculum in public and independent schools religious education in religious schools and state based Religion Studies courses Reasons for Living makes a much needed contribution to the philosophy of education by discussing the links between education and young people s spiritual and moral development It also provides new insights and approaches to values education and religious education Areas of fundamental importance in Australian education have long been held back not only by the gap between theory and practice but also by the very complexities of young people s personal development in contemporary Western Culture Reasons for Living offers a constructive and practical way forward

State-Religion Relationships and Human Rights Law Jeroen Temperman,2010 This book presents a human rights based assessment of the various modes of state religion identification and of the various forms of state practice that characterize these different state religion models This book makes a case for the recognition of a state duty to remain impartial with respect to religion or belief in all regards so as to comply with people s fundamental right to be governed at all times in a religiously neutral manner As this book demonstrates through the various case studies there is increasing interest and concern at the manner in which questions concerning the enjoyment of the right to the freedom of religion or belief bear upon key questions concerning the governance of democratic society Issues raised involve matters concerning employment education expression association and more generally the interface between religion and political life The existing literature often traces these concerns back to the need to consider the place of religion in contemporary society but leaves matters there Another body of academic literature explores the theoretical dimensions of that relationship but fails to connect it to the practice of states in order to test out the propositions which are the product of these reflections The great virtue of this work is that it seeks to unite these various enterprises and engages head on with the challenges which this produces The aim is to demonstrate and illustrate the key contention that there is an emergent right to religiously neutral governance and that this is incompatible with the continuation of systems which offer preference to particular forms of belief system religious or otherwise A chief virtue of this book is that it works through the consequences of this claim in a fearless fashion posing challenges for those states which continue to use their legal frameworks to offer support directly or indirectly for historical dominant or favoured forms of religion or belief It challenges received assumptions and by driving the logic of contemporary human rights thinking to the foundations of state religion relationships performs a valuable service for those engaging with this most difficult and timely of questions Malcolm D Evans Professor of Public International Law University of Bristol
