Requejo, Klaus-Jürgen Nagel, 2014-12-17 There are numerous examples of how religion and nationalism intertwine In some cases a common religion is the fundamental marker of a nation's identity whereas in others secular nationalism tries to hold together people of different religious beliefs This book examines the link between religion and nationalism in contemporary polities By exploring case studies on India Russia Israel Canada Chechnya Bosnia Herzegovina Belgium Northern Ireland Scotland Sri Lanka Catalonia and the Basque Country it seeks to understand the relationship between these two key societal forms of diversity and assess the interaction between religious and nationalist perspectives Expert contributors examine a variety of phenomena including secular nationalism secessionism and polities in which religious pluralism is evolving This book will be of interest to students and scholars of political science religion and politics nationalism federalism secession political philosophy racial and ethnic politics and comparative politics **The State, Ethnicity, and Gender in Africa**

Weapon of Peace Nilay Saiya, 2018-08-01 Religious terrorism poses a significant challenge for many countries around the world Extremists who justify violence in God's name can be found in every religious tradition and attacks perpetrated by faith based militants have increased dramatically over the past three decades Given the reality of religious terrorism today it would seem counterintuitive that the best weapon against violent religious extremism would be for countries and societies to allow for the free practice of religion yet this is precisely what this book argues Weapon of Peace investigates the link between terrorism and the repression of religion both from a historical perspective and against contemporary developments in the Middle East and elsewhere Drawing upon a range of different case studies and quantitative data Saiya makes the case that the suppression and not the expression of religion leads to violence and extremism and that safeguarding religious freedom is both a moral and strategic imperative

After Secularism E. Wilson, 2011-11-22 Having destabilized dominant assumptions about the nature of religion there is now a need to develop new ways of thinking about this ever present phenomenon in global politics This book outlines a new approach to understanding religion and its relationship with politics in the West and globally for International Relations

Why Do People Discriminate against Jews? Jonathan Fox, Lev Topor, 2021-06-17 Jonathan Fox and Lev Topor provide a new and innovative approach to answering the age old question of why people discriminate against Jews They examine anti Jewish discrimination using a two pronged approach First they combine and integrate ideas and theories from classic studies of anti-Semitism with social science theories on the causes of discrimination Second they use previously unavailable data on discrimination against Jews in 76 countries with significant Jewish minority populations to analyse the patterns and causes of discrimination They focus on three potential causes Religious causes anti Zionism and belief in conspiracy theories about Jewish power and world domination

Hate Spin Cherian George, 2016-09-30 How right wing political entrepreneurs around the world use religious offense both given and taken to mobilize supporters and marginalize opponents In the United States elements of the religious right fuel fears of an existential Islamic threat spreading anti Muslim rhetoric into mainstream politics In Indonesia Muslim absolutists urge suppression of churches and minority sects fostering a climate of rising intolerance In India Narendra Modi's radical supporters instigate communal riots and academic censorship in pursuit of their Hindu nationalist vision Outbreaks of religious intolerance are usually assumed to be visceral and spontaneous But in Hate Spin Cherian George shows that they often involve sophisticated campaigns manufactured by political opportunists to mobilize supporters and marginalize opponents Right wing networks orchestrate the giving of offense and the taking of offense as instruments of identity politics exploiting democratic space to promote agendas that undermine democratic values George calls this strategy hate spin a double sided technique that combines hate speech incitement through vilification with manufactured offense taking the performing of righteous indignation It is deployed in societies as diverse as Buddhist

Myanmar and Orthodox Christian Russia George looks at the world's three largest democracies where intolerant groups within India's Hindu right America's Christian right and Indonesia's Muslim right are all accomplished users of hate spin He also shows how the Internet and Google have opened up new opportunities for cross border hate spin George argues that governments must protect vulnerable communities by prohibiting calls to action that lead directly to discrimination and violence But laws that try to protect believers' feelings against all provocative expression invariably backfire They arm hate spin agents offense taking campaigns with legal ammunition Anti discrimination laws and a commitment to religious equality will protect communities more meaningfully than misguided attempts to insulate them from insult

Exploring Religious Diversity and Covenantal Pluralism in Asia Dennis R. Hoover, 2022-12-26 This book examines the growing diversity of religions and worldviews across South Central Asia and the factors affecting prospects for covenantal pluralism in these regions Going beyond banal appeals for mere tolerance the theory of covenantal pluralism calls for a constitutional order of religious freedom and equal treatment combined with a culture of practical religious literacy and everyday virtues of engagement across lines of religious difference According to the Pew Religious Diversity Index half of the world's most religiously diverse countries are in Asia The presence of deep religious worldview difference is often seen as a potential threat to socio-political cohesion or even as a source of violent conflict Yet in Asia as elsewhere the degree of this diversity is not consistently associated with socio-political problems Indeed while religious difference is implicated in some social challenges there are also many instances of respectful multi-faith engagement practical collaboration and peaceful debate Volume II offers a pioneering exploration of the prospects for this robust and non-relativistic type of pluralism in South Central Asia Volume I examined East Southeast Asia The chapters in these volumes originally appeared as research articles in a series on covenantal pluralism published by The Review of Faith International Affairs

The Ashgate Research Companion to Modern Theory, Modern Power, World Politics Nevzat Soguk, Scott G. Nelson, 2016-04-28 Deliberately eschewing disciplinary and temporal boundaries this volume makes a major contribution to the de-traditionalization of political thinking within the discourses of international relations Collecting the works of twenty-five theorists this Ashgate Research Companion engages some of the most pressing aspects of political thinking in world politics

today The authors explore theoretical constitutions critiques and affirmations of uniquely modern forms of power past and present Among the themes and dynamics examined are textual appropriation and representation materiality and capital formation geopolitical dimensions of ecological crises connections between representations of violence and securitization subjectivity and genderization counter globalization politics constructivism biopolitics post colonial politics and theory as well as the political prospects of emerging civic and cosmopolitan orders in a time of national religious and secular polarization Radically different in their approaches the authors critically assess the discourses of IR as interpretive frames that are indebted to the historical formation of concepts and to particular negotiations of power that inform the main methodological practices usually granted primacy in the field Students as well as seasoned scholars seeking to challenge accepted theoretical frameworks will find in these chapters fresh insights into contemporary world political problems and new resources for their critical interrogation

Peace and Conflict in Inter-Group Relations Agnes Katalin Koós, 2014-11-18 The book ventures into the explanation of intra state communal conflict more narrowly of the conflict between majority and minority communal groups and develops arguments that highlight the causal impact of intergroup economic inequality Its quest for empirical support has led to the compilation of three large inter related datasets typifying the condition of minorities worldwide They are mainly based on the Ethnic Power Relations Minorities at Risk and Quality of Government data yet also involve information from a multitude of other sources such as national statistics cross national demographic surveys and the World Directory of Minorities and Indigenous Peoples The group level data featuring 860 communal groups show that an impressive forty five percent of the world s population do not belong to the majority communal group in their country As reasonably feared minorities are in general politically less empowered than their pluralities and also poorer Results from multivariate regression analysis corroborate the deleterious impact of horizontal economic inequality on inter group hostility measured either as group grievance or violent conflict The double measurement substantiates the intuition that not all low to medium strength hostility is doomed to develop into violent conflict In fortunate conditions intergroup disputes can be solved or compromises may be reached without turning to violence Part of the analytical efforts have been directed towards detecting the differences between the causes of communal and non communal social conflicts and also towards deciphering which institutional conditions aggravate and which mitigate communal conflicts A large number of variables in the regression models attempt to operationalize constellations that influence the evolution of conflicts either toward peaceful solutions or toward armed collision The policy implications of the findings are not trivial Positive discrimination which in the United States is known as Affirmative Action is often resisted by denying the unfortunate facts that make it necessary In addition currently the policies recommended for heterogeneous societies are also fiercely debated between advocates of power sharing arrangements and those who would like to facilitate the communal homogenization of each state This latter type of constitutional engineering is at variance with the political empowerment of minorities a

El-Ansary,D. Linnan,2010-11-26 This book explores A Common Word Between Us and You a high level ongoing Christian Muslim dialogue process The Common Word process was commenced by leading Islamic scholars and intellectuals as outreach in response to the Pope s much criticized Regensburg address of 2007 **Democracy Protests** Dawn Brancati,2016-09-08 This book presents a rich analysis of modern democracy protests globally using qualitative and quantitative evidence to describe trends in causes and consequences **Scriptures, Shrines, Scapegoats, and World Politics** Zeev Maoz,Errol A Henderson,2020-03-19 The effect of religious factors on politics has been a key issue since the end of the Cold War and the subsequent rise of religious terrorism However the systematic investigations of these topics have focused primarily on the effects of religion on domestic and international conflict Scriptures Shrines Scapegoats and World Politics offers a comprehensive evaluation of the role of religion in international relations broadening the scope of investigation to such topics as the relationship between religion and cooperation religion and conflict and the relationship between religion and the

quality of life Religion is often manipulated by political elites to advance their principal goal of political survival Zeev Maoz and Errol A Henderson find that no specific religion is either consistently more bellicose or consistently more cooperative than other religions However religious similarity between states tends to reduce the propensity of conflict and increase the opportunity for security cooperation The authors find a significant relationship between secularism and human security
