Religious Education As Social Transformation:

Religious Education as Social Transformation Allen J. Moore, 1980 *The Bloomsbury Handbook of Religious Education in the Global South* Yonah Hisbon Matemba, Bruce A. Collet, 2022-02-10 The Bloomsbury Handbook of Religious Education in the Global South presents new comparative perspectives on Religious Education RE across the Global South Including 23 chapters written by scholars from the Global North and South this is the first authoritative reference work on the subject The handbook is thematically organised into seven sections The first three sections deal with provision response to changes in contemporary society and decolonizing RE The next four sections explore young people and RE perspectives on teachers RE in higher education and finally challenges and opportunities for RE The term Global South is used here primarily to signify the deep economic divide with the Global North but the concept is also examined in historical geographical political social and cultural terms including the indelible influence of religion in all four broadly defined regions Exploring RE from local cross national as well as regional and sub regional perspectives the handbook examines RE from its diverse past present realities and envisioned future revealing not only tensions contestations injustices and inequalities of power but importantly how inclusive forms of RE can help solve these problems **Grounding a Religious Education Approach to Social**

Transformation Michael Andrew Kelly, 1995 **Grounding a religious education approach to social transformation** Michael Andrew Kelly, 1992 **International Handbook of Inter-religious Education** Kath Engebretson, Marian de Souza, Gloria Durka, Liam Gearon, 2010-08-17 This Handbook is based on the conviction of its editors and contributing authors that understanding and acceptance of as well as collaboration between religions has essential educational value The development of this Handbook rests on the further assumption that interreligious education has an important role in elucidating the global demand for human rights justice and peace Interreligious education reveals that the creeds and holy books of the world's religions teach about spiritual systems that reject violence and the individualistic pursuit of economic and political gain and call their followers to compassion for every human being It also seeks to lead students to an awareness that the followers of religions across the world need to be and to grow in dialogical relationships of respect and understanding An essential aim of interreligious education is the promotion of understanding and engagement between people of different religions and therefore it has great potential to contribute to the common good of the global community Interreligious education has grown from the interfaith movement whose beginning is usually identified with the World Parliament of Religions held in Chicago in 1893 This was the first time in history that leaders of the eastern and western religions had come together for dialogue and to consider working together for global unity **The Laity as Participants in the Mission of the Church** Humphrey C. Anameje, 2017-06-05 The church is made up of both the clergy and the laity And for it to properly fulfill the mission for which it was instituted by Christ all its members each according to his or her God given gift must contribute both to the upbuilding of the church and to its mission On the part of the laity their active participation in the

general mission of the church ad intra and ad extra has been a great challenge in the life and practice of the church throughout its history The Second Vatican Council in its spirit of *aggiornamento* makes some positive difference This work critically examines the conciliar documents some relevant postconciliar documents and theological reflection of some theologians And finally it proffers solutions that will enhance the active participation of the laity in the mission of the church in general and the church in Southeast Nigeria in particular

Pragmatism and Modernities ,2010-01-01 Pragmatism belongs at least to a certain degree to the Protestant based reaction towards the economic social and political developments of the time in the US and it is no coincidence that the pragmatists all came from religious families if not even theologian families But these life conditions have changed over the course of the last century as much as the Protestant self assurance has been questioned more and more The question discussed in this book by international scholars is as to whether the possible modernity of pragmatism of around and after 1900 can still be labeled modern today in the modernity or post modernity around and after 2000 Has philosophy and philosophy of education found better alternatives Have the alternatives of the time around 1900 proven to be better Were the contemporary critics of pragmatism right These questions are discussed in fourteen chapters clustered in three larger parts The first part deals with pragmatism and modernity around 1900 the second part discusses contemporary alternatives to pragmatism and critics of pragmatism and the third and last part of the book deals with the modernity of pragmatism today Intended audience philosophers philosophers of education historians historians of education religious educators historians of sociology cultural historians political scientists postmodernists
