Religious Challenge To The State:

State and Politics in Religious Peacebuilding Tale Steen-Johnsen, 2016-11-16 In this book Tale Steen Johnsen explains how religious peacebuilders are limited by both formal and more subtle political strategies aimed at regulating civil society. Political authorities have a vested interest in keeping social and religious movements under control which limits the opportunities religious leaders have to diminish violent conflicts between religious groups. This volume offers empirical examples of these connections in Ethiopia, Kenya, Zanzibar, and Tanzania. It is a valuable resource for both scholars and development practitioners interested in how politics and religion become conflated when religious actors engage to build peace.

Global Rebellion Mark Juergensmeyer, 2008-05-16 A new religious activism has seized the imaginations of political rebels around the world. In providing a road map through this complex terrain, the author bases his discussion on interviews with militant activists and case studies of rebellious movements.

Challenges to the Cohesion of the Arab State Asher Susser, 2008 The relative weakness of the Arab state system and the spread of radical Islam threaten to undermine the cohesion of some key Arab states. How are they coping with these challenges? To what extent are their efforts succeeding in maintaining cohesion of the Arab States? This work seeks to examine these crucial questions.

Religion, Modernity, and Politics in Hegel Thomas A. Lewis, 2011-07-28 This study analyzes Hegel's philosophy of religion in relation to ongoing debates about the relation between religion and politics as well as the history of their conceptualization in the modern West. Lewis argues that recent non-traditional, more Kantian interpretations of Hegel's project open up a new understanding of his treatment of religion.

Institutional Origins of Islamist Political Mobilization Quinn Mecham, 2017-02-01 Muslim countries experience wide variation in levels of Islamist political mobilization, including such political activities as protest, voting, and violence. *Institutional Origins of Islamist Political Mobilization* provides a theory of the institutional origins of Islamist politics, focusing on the development of religious common knowledge, religious entrepreneurship, and coordinating focal points as critical to the success of Islamist activism. Examining Islamist politics in more than 50 countries over four decades, the book illustrates that Islamist political activism varies a great deal, appearing in specific types of institutional contexts. Detailed case studies of Turkey, Algeria, and Senegal demonstrate how diverse contexts yield different types of Islamist politics across the Muslim world.

Encyclopedia of Education Law Charles J. Russo, 2008-06-27 CHOICE Outstanding Academic Title for 2009 A welcome addition to any public or academic library, this set would also be of use in a law library where educational law might need to be explored and reviewed at a more basic level than other legal texts. Sara Rofofsky, Marcus, Queensborough Community College, Bayside, NY. Smaller educational legal summaries exist, and a couple of texts deal with Supreme Court cases about education, but this set provides a unique combination of general educational legal issues and case-specific information. It should be a welcome addition to academic and large public libraries. Also available as an ebook. Booklist. The *Encyclopedia of Education Law* is a compendium of information drawn from the various dimensions of

education law that tells its story from a variety of perspectives The entries cover a number of essential topics including the following Key cases in education law including both case summaries and topical overviews Constitutional issues Key concepts theories and legal principles Key statutes Treaties e g the Universal Declaration on Human Rights Curricular issues Educational equity Governance Rights of students and teachers Technology Biographies Organizations In addition to these broad categories anchor essays by leading experts in education law provide more detailed examination of selected topics The Encyclopedia also includes selections from key legal documents such as the Constitution and federal statutes that serve as the primary sources for research on education law At the same time since education law is a component in a much larger legal system the Encyclopedia includes entries on the historical development of the law that impact on its subject matter Such a broadened perspective places education law in its proper context in the U S legal system **The Politics of**

Buddhist Organizations in Taiwan, 1989-2003 André Laliberté, 2013-08-21 Lalibert looks at a relatively unexplored aspect of modern Taiwan the influence of religion on politics This book offers a detailed survey of three of the most important Buddhist organizations in Taiwan the Buddhist Association of the Republic of China BAROC the Buddha Light Mountain or Foguanshan monastic order and the Buddhist Compassion Relief Tzu Chi Association or Ciji It examines their contrasting approaches to three issues state supervision of religion the first presidential election of 1996 and the establishment of the National Health Insurance This study analyzes the factors that explain the diverse paths the three organizations have taken in the politics of Taiwan Based on an in depth examination of Buddhist leaders behaviour The Politics of Buddhist Organizations in Taiwan compels us to question conventional views about the allegedly passive aspect of religious tradition deference to authority in societies influenced by Confucian culture and the adverse legacy of authoritarian regimes

Transnational Religion And Fading States Susanne H Rudolph, 2018-02-07 Focusing on the dilution of state sovereignty this book examines how the crossing of state boundaries by religious movements leads to the formation of transnational civil society Challenging the assertion that future conflict will be of the clash of civilization variety it looks to the micro origins of conflicts which are as likely to arise between states sharing a religion as between those divided by it and more likely to arise within rather than across state boundaries Thus the chapters reveal the dual potential of religious movements as sources of peace and security as well as of violent conflict Featuring an East West North South approach the volume avoids the conventional and often ethnocentric segregation of the experience of other regions from the European and American Contributors draw examples from a variety of civilizations and world religions They contrast self generated movements from below such as Protestant sectarianism in Latin America or Sufi Islam in Africa with centralized forms of organization and patterns of diffusion from above such as state certified religion in China Together the chapters illustrate how religion as bearer of the politics of meaning has filled the lacuna left by the decline of ideology creating a novel transnational space for world politics **Supreme Court's School Choice Decision and Congress' Authority to Enact**

Religion and Space Lily Kong, Orlando Woods, 2016-02-11 This is the first study to bring space into conversation with religious competition conflict and violence in the contemporary world Lily Kong and Orlando Woods argue that because space is both a medium and an outcome of religious activity it is integral to understanding processes of religious competition conflict and violence The book explores how religious groups make claims to both religious and secular spaces and examines how such claims are managed negotiated and contested by the state and by other secular and religious agencies It also examines how globalisation has given rise to new forms of religious competition and how religious groups strengthen themselves through the development of social resilience as well as contribute to resilient societies Throughout the book case studies from around the world are used to examine how religious competition and conflict intersect with space The case studies include topical issues such as competing claims to the Temple Mount Haram el Sharif in Jerusalem opposition to the Ground Zero mosque in New York City and the regulation of religious conversion in India and Sri Lanka By helping readers develop new perspectives on how religion works in and through space Religion and Space Competition Conflict and Violence in the Contemporary World is an innovative contribution to the study of religion

Theology in Global Context Amos Yong,Peter G. Heltzel,2016-10-06 Robert Cummings

Neville has been a consistent advocate for the necessity of global theology. Early in his career he realized that the philosophical framework of the West alone was inadequate for a truly global theology. Since then he has sought to develop theology creatively and responsibly within the world context. The original essays in this volume written in his honour by fellow theologians participate in and model the kind of dialogical global theology embodied in Neville's work. *Religion and Society in Qajar Iran* Robert Gleave, 2004-11-23. Gleave brings together studies by experts in the area of religion in nineteenth century Iran in order to present new insights into Qajar religion, political and cultural history. Key topics covered include the relationship between religion and the state, the importance of archival materials for the study of religion, the developments of Qajar religious thought, the position of religious minorities in Qajar Iran, the relationship between religion and Qajar culture, and the centrality of Shi'ite hierarchy and the state. **The Emancipation of Europe's Muslims** Jonathan Laurence, 2011-12-19. The Emancipation of Europe's Muslims traces how governments across Western Europe have responded to the growing presence of Muslim immigrants in their countries over the past fifty years. Drawing on hundreds of in-depth interviews with government officials and religious leaders in France, Germany, Italy, the Netherlands, the United Kingdom, Morocco, and Turkey, Jonathan Laurence challenges the widespread notion that Europe's Muslim minorities represent a threat to liberal democracy. He documents how European governments in the 1970s and 1980s excluded Islam from domestic institutions instead inviting foreign powers like Saudi Arabia, Algeria, and Turkey to oversee the practice of Islam among immigrants in European host societies. But since the 1990s, amid rising integration problems and fears about terrorism, governments have aggressively stepped up efforts to reach out to their Muslim communities and incorporate them into the institutional, political, and cultural fabrics of European democracy. The Emancipation of Europe's Muslims places these efforts, particularly the government-led creation of Islamic councils, within a broader theoretical context and gleans insights from government interactions with groups such as trade unions and Jewish communities at previous critical junctures in European state building. By examining how state-mosque relations in Europe are linked to the ongoing struggle for religious and political authority in the Muslim majority world, Laurence sheds light on the geopolitical implications of a religious minority's transition from outsiders to citizens. This book offers a much-needed reassessment that foresees the continuing integration of Muslims into European civil society and politics in the coming decades. Religion and Democratizations Jeffrey Haynes, 2013-09-13. This book examines key debates on religion and democratization from three main perspectives. Religious traditions have core elements which are more or less conducive to democratization and democracy. Religious traditions may be multi-vocal but at any moment there may be dominant voices more or less receptive to and encouraging of democratization. Religious actors rarely if ever determine democratization outcomes. However, they may in various ways and with a range of outcomes be of significance for democratization. The contributions are divided into two sections: 1. Religion, democratization and democracy; and 2. Secularization, democratization and democracy. Overall, they

examine the three assertions in the bullet points above The book's starting point is that in general around the world religions have left their assigned place in the private sphere This means they have in many cases become recognisably politically active in various ways and with assorted outcomes This re emergence from political marginality dates back until at least the 1980s At that time the US sociologist Jose Casanova noted that what was new and became news was the widespread and simultaneous refusal of religions to be restricted to the private sphere This involved a remodelling and re assumption of public roles by religion which theories of secularisation had long condemned to social and political marginalisation This book was published as a special issue of Democratization Religion in the 21st Century Lisbet Christoffersen, 2010 Religion in the 21st century is a phenomenon that cannot be taken for granted and is undergoing transformations that present us with new challenges both from a scholarly and societal perspective The nuanced and multifaceted way in which these features are analyzed in this book should be welcomed by all who are interested and concerned with the role of religion on the contemporary scene The combination of accessible scholarship and challenging positions makes this a book for everyone who is interested in religion in the secularized parts of the world The volume contributes to an understanding of how it is not after all a contradiction to be both fully modern and religious Jan Olav Henriksen Norwegian School of Theology Oslo Norway
