OSHA and the Politics of Health Regulation David P. McCaffrey, 2013-03-13 By way of introduction to this fascinating

book let me highlight two of its many contributions First it is a good example of something all too rare in sociology testing competing general theories Most of us either try to develop or refine theories about how the social world works and cite convenient data as support or we select and collect data that will fit some general theoretical position In the first case the data play a subordinate role bits of evidence for our view of life In the second the theory plays a subordinate role a way to make sense of the social behavior we have observed McCaffrey's position subsumes these two He has gathered data on an important social agency but with an implicit problem in mind which of the several theories about the social world he was exposed to in graduate school would do the best job of interpreting the data Or we might just as well turn it around In a graduate department such as Sociology at the State University of New York at Stony Brook there is a lively never ending debate about the truth of competing perspectives on the political and social world By selecting a data base and remaining alert to the kind of evidence each theory required McCaffrey circumvented the usual data for a theory vs a theory for the data dilemma that most of us live with

Farm Fresh Broadband Christopher Ali, 2021-09-21 An analysis of the failure of U S broadband policy to solve the rural urban digital divide with a proposal for a new national rural broadband plan As much of daily life migrates online broadband high speed internet connectivity has become a necessity The widespread lack of broadband in rural America has created a stark urban rural digital divide In *Farm Fresh Broadband* Christopher Ali analyzes the promise and the failure of national rural broadband policy in the United States and proposes a new national broadband plan He examines how broadband policies are enacted and implemented explores business models for broadband providers surveys the technologies of rural broadband and offers case studies of broadband use in the rural Midwest Ali argues that rural broadband policy is both broken and incomplete broken because it lacks coordinated federal leadership and incomplete because it fails to recognize the important roles of communities cooperatives and local providers in broadband access For example existing policies favor large telecommunication companies crowding out smaller nimbler providers Lack of competition drives prices up rural broadband can cost 37 percent more than urban broadband The federal government subsidizes rural broadband by approximately 6 billion Where does the money go Ali proposes democratizing policy architecture for rural broadband modeling it after the wiring of rural America for electricity and telephony Subsidies should be equalized not just going to big companies The result would be a multistakeholder system guided by thoughtful public policy and funded by public and private support

were growing faster every day By 1904 Indianapolis had opened the Traction Terminal which was widely acclaimed to be the largest and most impressive interurban station in the world Yet today there is only 90 mile remnant of this one great system still operating within Indiana Featuring over 90 illustrations and featuring contemporary accounts and newspaper articles from the period Electric Indiana is a biographical study of the rise and fall of a onetime important transportation technology that achieved its most impressive development within the Hoosier state
