Rethinking Music Nicholas Cook, Mark Everist, 1999 Academic musical studies have gone through a period of rapid change in recent years the musicological agenda has been expanded to include a broad range of sociological and ideological issues while the very status of music theory with its apparent dependence on the autonomous musical work has been thrown into doubt The time is ripe for a comprehensive re evaluation of our thinking about music in the light of such recent developments Rethinking Music is in two parts Part 1 focuses on approaches to musical texts covering such topics as the relationship of text and context concepts of unity and meaning in music and the role of empirical approaches together with

compositional and performance perspectives Underlying the volume as a whole is the question of how far and in what ways music theory can remain viable and valuable in a changing intellectual environment Part 2 sets out to reflect the nature of the discipline of musicology and the ways in which it has been and may be challenged and enriched The volume examines music history and cultural histories of music The status of the musical text is a subject that has clear resonances in Part 1 and themes developed in Part 2 include questions of ethics pedagogy performance and popular music as subjects for scholarly enquiry questions of reception canon gender and historiography The Ashgate Research Companion to Minimalist and Postminimalist Music Keith Potter, Kyle Gann, 2016-03-23 In recent years the music of minimalist composers such as La Monte Young Terry Riley Steve Reich and Philip Glass has increasingly become the subject of important musicological reflection research and debate Scholars have also been turning their attention to the work of lesser known contemporaries such as Phill Niblock and Eliane Radigue or to second and third generation minimalists such as John Adams Louis Andriessen Michael Nyman and William Duckworth whose range of styles may undermine any sense of shared aesthetic approach but whose output is still to a large extent informed by the innovative work of their minimalist predecessors Attempts have also been made by a number of academics to contextualise the work of composers who have moved in parallel with these developments while remaining resolutely outside its immediate environment including such diverse figures as Karel Goeyvaerts Robert Ashley Arvo Pärt and Brian Eno Theory has reflected practice in many respects with the multimedia works of Reich and Glass encouraging interdisciplinary approaches associations and interconnections Minimalism's role in culture and society has also become the subject of recent interest and debate complementing existing scholarship which addressed the subject from the perspective of historiography analysis aesthetics and philosophy The Ashgate Research Companion to Minimalist and Postminimalist Music provides an authoritative overview of established research in this area while also offering new and innovative approaches to the subject **Hans Werner Henze: Tristan (1973)** Stephen Downes, 2017-07-05 Hans Werner Henze is a prolific and internationally famous composer of the post Second World War period He is amongst the most frequently performed and recorded composers of his generation and has been the subject of numerous festivals in several continents But he is also a composer of controversy His music has stimulated a critical polemic of notable vigour Tristan 1973 Henze's large scale work for piano full orchestra and electronic tape explores Henze's creative stance with regard to Wagner The work represents a powerful contribution to the tradition of Tristan alluding twentieth century works those by Berg and Messiaen being amongst the best known Tristan has been heard as a piano concerto and as a symphonic poem and is a fine example of how a single piece can interrogate the styles expressions genres and aesthetics of major often conflictual trends in European culture In this book Stephen Downes begins by placing Henze's Tristan in its wider context and in the context of Henze's compositional output and writings He considers Henze's description of the genesis of the work by examining row tables and sketches draft and annotated parts and a full score with corrections and

conductor's annotations This analysis of form raises issues of genre harmony and melody temporality unity and intertextuality and places the work in the formal aesthetics characteristic of romanticism modernism and postmodernism Key concepts in the critical legacy of Tristan are discussed and the book concludes by considering Henze's later works placing the techniques and aesthetics of Tristan in the context of the composer's subsequent developments The book is accompanied by a CD containing the 1975 DG recording of Tristan conducted by Henze     The Classical Revolution John Borstlap, 2017-08-15 Essays by a prominent contemporary composer explore a current trend in classical music away from atonal characteristics and toward more traditional forms Topics include cultural identity musical meaning and the aesthetics of beauty     *Accenting the Classics* Deborah Mawer, Barbara L. Kelly, Rachel Moore, Graham Sadler, 2023 Brings new insights to the music of well known European composers by telling a fascinating little known story about French music publishing specifically through the lens of Jacques Durand's edition Classique French composers performers and musicologists acted as editors of eighteenth and nineteenth century European classics primarily for piano Among these editors were Faur Saint Saëns Debussy Ravel and Dukas the objects of their enquiries included core works by Rameau Bach Mozart Beethoven Mendelssohn Schumann and Chopin Presenting six composer editor case studies the volume shows that the French accent both musical and cultural upon this predominantly Austro-German music was highly varied Editorial responses range from scholarly approaches to those directed by performance or compositional agendas and from pan-European to strongly patriotic stances Intriguing intersections are revealed between old and new and between French and cross-European canons Beyond editing the book explores the edition's role in pedagogy and performance including by pianists Robert Casadesu and Yvonne Loriod and in the reassertion of contemporary French composition especially regarding innovation around neoclassicism It will interest a wide readership including musicologists performers and concertgoers cultural historians and other humanities scholars     Historical Abstracts Eric H. Boehm, 2000     **The Music of Michael Nyman** Pwyll ap Siôn, 2017-07-05 Nyman's rise to international prominence during the last three decades has made him one of the world's most successful living composers His music has nevertheless been criticized for its parasitic borrowing of other composers' ideas and for its relentless self-borrowing In this first book-length study in English Pwyll ap Siôn places Nyman's writings within the general context of Anglo-American experimentalism minimalism and post-minimalism and provides a series of useful contexts from which controversial aspects of Nyman's musical language can be more clearly understood and appreciated Drawing upon terms informed by intertextual theory in general appropriation and borrowing are first introduced within the context of twentieth-century art music and theory Intertextual concepts are explained and their terms defined before Nyman's musical language is considered in relation to a series of intertextual classifications and types These types then form the basis of a more in-depth study of his works during the second half of the book ranging from opera and chamber music to film Rather than restricting style and technique Nyman's intertextual approach on the contrary is shown to provide his music with

an almost infinite amount of variety flexibility and diversity and this has been used to illustrate a wide range of technical aesthetic and expressive forms He composes with his ear towards the past as if it were a rich quarry to mine working like a musical archaeologist uncovering artefacts and chiselling fresh and vibrant sonic edifices out of them      **Order and Disorder** Jonathan Dunsby, 2004 Order and Disorder is the result of the first International Orpheus Academy for Music Theory held in 2003 Its theme was 20th century music and theory especially after the 1950s Five guest lecturers discussed theoretical historical and philosophical aspects of this theme in six articles In Music Analytical Trends of the Twentieth Century Jonathan Dunsby discusses key features in the development of music analysis from prestructuralist to postmodern times Joseph N Straus describes different ways in which intervallic and motivic ideas of the musical surface in atonal music are projected over larger spans Yves Knockaert investigates the controllability of non intention in Cage s work the compositional approach of Morton Feldman s floating thoughts and the raw state of Wolfgang Rihm s music of the 1980s In Nature and the Sublime the Politics of Order and Disorder in Twentieth Century Music Max Paddison exposes a history of the concept of nature in relation to music with some references to literature and the visual arts Konrad Boehmer analyses several aspects of the political economy of music in Music and Politics In Towards a Terza Prattica he focuses on the perspectives of the paradigmatic change which electric music has caused      Music and the Crises of the Modern Subject Michael L. Klein, 2015-07-06 Departing from the traditional German school of music theorists Michael Klein injects a unique French critical theory perspective into the framework of music and meaning Using primarily Lacanian notions of the symptom that unnamable jouissance located in the unconscious and the registers of subjectivity the Imaginary the Symbolic Order and the Real Klein explores how we understand music as both an artistic form created by the subject and an artistic expression of a culture that imposes its history on this modern subject By creatively navigating from critical theory to music film fiction and back to music Klein distills the kinds of meaning that we have been missing when we perform listen to think about and write about music without the insights of Lacan and others into formulations of modern subjectivity      Writing through Music Jann Pasler, 2007-12-12 Drawing on a passion for music a remarkably diverse interdisciplinary toolbox and a gift for accessible language that speaks equally to scholars and the general public Jann Pasler invites us to read as she writes through music unveiling the forces that affect our sonic encounters In an extraordinary collection of historical and critical essays some appearing for the first time in English Pasler deconstructs the social moral and political preoccupations lurking behind aesthetic taste Arguing that learning from musical experience is vital to our understanding of past present and future Pasler s work trenchantly reasserts the role of music as a crucial contributor to important public debates about who we can be as individuals communities and nations The author s wide ranging and perceptive approaches to musical biography and history challenge us to rethink our assumptions about important cultural and philosophical issues including national identity and postmodern musical hybridity material culture the economics of power and the relationship between classical and

popular music Her work uncovers the self fashioning of modernists such as Vincent d'Indy Augusta Holm's Jean Cocteau and John Cage and addresses categories such as race gender and class in the early 20th century in ways that resonate with experiences today She also explores how music uses time and constructs narrative Pasler's innovative and influential methodological approaches such as her notion of question spaces open up the complex cultural and political networks in which music participates This provides us with the reasons and tools to engage with music in fresh and exciting ways In these thoughtful essays music whether beautiful or cacophonous reassuring or seemingly incomprehensible comes alive as a bearer of ideas and practices that offers deep insights into how we negotiate the world Jann Pasler's *Writing through Music* brilliantly demonstrates how music can be a critical lens to focus the contemporary critical cultural historical and social issues of our time

After the Rite Maureen A. Carr, 2014 *After the Rite* Stravinsky's Path to Neoclassicism 1914-1925 traces the evolution of Stravinsky's compositional style as he searched for his own voice in the explosive musical world of the early 20th century as he responded to harsh criticisms of his work
