[Renaissance of the Soul](#) Lois Snell, 2001-06-01 *Imagining the Soul in Premodern Literature* Abe Davies, 2021-06-28 This book is a study of ghostly matters of the soul in literature spanning the tenth century

and the age of Shakespeare All people according to John Donne constantly believe that they have an immortal soul But he also reflects that in fact there is nothing so well established as constrains us to believe both that the soul is immortal and that every particular man hath such a soul In understanding the question of man's disembodied part as at once fundamental and fundamentally uncertain he was entirely of his time and Imagining the Soul in Premodern Literature considers this fraught shifting yet uniquely compelling entity in the context of the literary forms and effects involved in its representation Gruesome medieval dialogues between damned souls and worm eaten bodies verse and prose works by Donne Ren Descartes Margaret Cavendish and Andrew Marvell a profusion of sonnet sequences sermons manuals of instruction and travelogues Hamlet and its natural philosophical thinking about the apparently disembodied soul haunting Elsinore these chapters range across all this and more offering a rigorous yet accessible account of an essential aspect of premodern literature that will be of interest to scholars students and the general reader alike

Transformations of Memory and Forgetting in

Sixteenth-Century France Nicolas Russell, 2011-04-29 This book proposes that in a number of French Renaissance texts produced in varying contexts and genres we observe a shift in thinking about memory and forgetting Focusing on a corpus of texts by Marguerite de Navarre Pierre de Ronsard and Michel de Montaigne it explores several parallel transformations of and challenges to traditional discourses on the human faculty of memory Throughout Classical Antiquity and the Middle Ages a number of influential authors described memory as a powerful tool used to engage important human concerns such as spirituality knowledge politics and ethics This tradition had great esteem for memory and made great efforts to cultivate it in their pedagogical programs In the early sixteenth century this attitude toward memory started to be widely questioned The invention of the printing press and the early stages of the scientific revolution changed the intellectual landscape in ways that would make memory less important in intellectual endeavors Sixteenth century writers began to question the reliability and stability of memory They became wary of this mental faculty which they portrayed as stubbornly independent mysterious unruly and uncontrollable an attitude that became the norm in modern Western thought as is illustrated by the works of Descartes Locke Freud Proust Foucault and Nora for example Writing in this new intellectual landscape Marguerite de Navarre Ronsard and Montaigne describe memory not as a powerful tool of the intellect but rather as an uncontrollable mental faculty that mirrored the uncertainty of human life Their characterization of memory emerges from an engagement with a number of traditional ideas about memory Notwithstanding the great many differences in concerns of these writers and in the nature of their texts they react against or transform their classical and medieval models in similar ways They focus on memory's unruly side the ways that memory functions independently of the will They associate memory with the fluctuations of the body the organic soul rather than the stability of the mind the intellectual soul In their descriptions of memory these authors both reflect and contribute to a modern understanding of and attitude towards this mental faculty Published by University of Delaware Press Distributed worldwide by Rutgers University Press The Sewanee Review ,1906

The Renaissance Soul: How to Make Your Passions Your Life Margaret Lobenstine, 2006 The Smoke of the Soul R. Sugg, 2013-11-13 What was the soul Christians agreed that it was the immortal core of each human being Yet there was no agreement on where the soul was what it was or how it could be joined to the body The Smoke of the Soul explores the anxieties and excitement generated by the mysterious zone where matter met spirit and where human life met eternity

Windows of the Soul Martin Porter, 2005-09-29 In late fifteenth century Florence Renaissance humanists rediscovered a secret natural language hidden in the visual wisdom of the proverb the eyes are the windows of the soul Through its magical prism the language of eyes faces voices laughs walks even stones plants and animals all became windows into the souls of other people of oneself of nature and ultimately of God Some saw in its words the perfect hieroglyphic language by which Adam had first named nature which when combined with the art of memory could bring about a form of inner writing or mystical self transformation Yet many others dismissed it as a collection of arbitrary conventions superstitious enigmas or gypsy riddles Embroiled in the religious persecution of the Reformation rejected as a science during the Scientific Revolution in the age of Enlightenment physiognomy came to be seen as nothing more than an amusing entertainment But with the dawn of Romanticism be it in the realms of science religion or poetry some began to see that physiognomy was no game and the flame of serious interest in physiognomy was once again rekindled Combining book history and visual history Dr Porter reconstructs this physiognomical eye interprets the way in which books on physiognomy were read and traces the wider intellectual social and cultural changes that contributed to the metamorphosis of this way of beholding oneself and the natural world from the Renaissance to the dawn of Romanticism

John Donne, Body and Soul Ramie Targoff, 2008-11-15 For centuries readers have struggled to fuse the seemingly scattered pieces of Donne s works into a complete image of the poet and priest In *John Donne Body and Soul* Ramie Targoff offers a way to read Donne as a writer who returned again and again to a single great subject one that connected to his deepest intellectual and emotional concerns Reappraising Donne s oeuvre in pursuit of the struggles and commitments that connect his most disparate works Targoff convincingly shows that Donne believed throughout his life in the mutual necessity of body and soul In chapters that range from his earliest letters to his final sermon Targoff reveals that Donne s obsessive imagining of both the natural union and the inevitable division between body and soul is the most continuous and abiding subject of his writing Ramie Targoff achieves the rare feat of taking early modern theology seriously and of explaining why it matters Her book transforms how we think about Donne Helen Cooper University of Cambridge
