Routledge Companion to Sixteenth Century Philosophy Henrik Lagerlund, Benjamin Hill, 2017-01-06 Sixteenth century philosophy was a unique synthesis of several philosophical frameworks a blend of old and new including but not limited to Scholasticism Humanism Neo Thomism Aristotelianism and Stoicism Unlike most overviews of this period The Routledge Companion to Sixteenth Century Philosophy does not simplify this colorful era by applying some traditional dichotomies such as the misleading line once drawn between scholasticism and humanism Instead the Companion closely covers an astonishingly diverse set of topics philosophical methodologies of the time the importance of the discovery of the new world the rise of classical scholarship trends in logic and logical theory Nominalism Averroism the Jesuits the Reformation Neo stoicism the soul's immortality skepticism the philosophies of language and science and politics cosmology the nature of the understanding causality ethics freedom of the will natural law the emergence of the individual in society the nature of wisdom and the love of god Throughout the Companion seeks not to compartmentalize these philosophical matters but instead to show that close attention paid to their continuity may help reveal both the diversity and the profound coherence of the philosophies that emerged in the sixteenth century The Companion's 27 chapters are published here for the first time and written by an international team of scholars and accessible for both students and researchers

Ending the War Between Humanity and Nature Patrick C. Lee, 2020-08-19 This book offers plausible explanations for people s puzzling unwillingness to address the human nature interactions that have led us to the precipice that is climate change today Humanity and nature are at war the evidence is all around us catastrophic weather events rising sea levels extinction of species famine wildfires melting polar ice millions of environmental refugees and toxic pollution of air water and soil The list goes on and on What is causing this war and how can it be stopped Is this war an unintended consequence of economic and environmental imperatives pulling in opposite directions This book takes the question and its answer to a deeper level It argues that the root cause of our war on nature might be found in the time honored historically deep myths narratives and stories we tell ourselves and have been telling

ourselves for centuries about humanity's place in or out of the natural world Scala Christus est Giovanni Tortoriello, 2023-05-09 Since the nineteenth century scholars have debated the controversial relationships between humanism the Renaissance and the Reformation Challenging the dominant narrative on the subject Giovanni Tortoriello reconstructs the debates that characterized the early Reformation movements He shows that Martin Luther's theology of the cross developed in reaction to the irenic tendencies of the Renaissance With the spread of Platonism Hermeticism and Kabbalah in the fifteenth century the identity of Christianity shifted and the boundaries between the different religions thinned In response to this attempt to minimize the differences among the various religions Luther reiterated the centrality and uniqueness of the salvific event of the cross Confessional biases and theological prejudices have obliterated the role that Platonism Hermeticism and Christian Kabbalah played in the early Reformation debates The author reconstructs these controversies and situates Luther's theology of the cross in this historical context *Routledge Revivals: Medieval Italy* (2004).
