La Maison de René Herbst René Herbst, Galerie de Beyrie, 1999 **Objects of Design from The Museum of Modern Art** Paola Antonelli, 2003 Rene Herbst Gillemette Delaporte, 2004-10-01

Rene Herbst's enduring furniture designs provide fundamental lessons for today's interior designers. A staunch modernist, Herbst was a founding member and later president of the Union des artistes modernes (UAM) in France, which sought to make domestic comfort accessible to all regardless of class. The diversity of his work is testament to his prolific and creative output, and his design is marked by its simplicity and functionality. The French architect-turned designer was nicknamed 'the man of steel' because he pioneered the use of the material for furniture years before mass production on a large scale was possible. In 1929, he created several versions of his celebrated Sandow Chair, which ignited his research into serial production and inaugurated the era of mass production. This book presents a selection of the best works from the Herbst Collection held by the library of the Musée des Arts Décoratifs in Paris and demonstrates how Herbst was the catalyst of a new style of living that spurred the birth of modernity.

Modern Architecture in Theatre A. Read, 2013-11-21. If the city is the theatre of urban life, how does architecture act in its many performances? This book reconstructs the spatial experiments of Art et Action, a theatre troupe active in 1920s Paris, and how their designs for theatre buildings show how the performance spaces interacted with actors and spectators according to their type.

History of Modern Design David Raizman, 2003. An exploration of the parallel development of product and graphic design from the 18th century to the 21st. The effects of mass production and consumption, man-made industrial materials, and extended lines of communication are also discussed.

A Cultural History of Furniture in the Modern Age Claire I. R. O'Mahony, 2022-02-24. Furniture is a unique witness to the transformations of private and public experience amidst the upheavals of the 20th century: how we work, rest, and play are determined by the embodied encounter with furniture, defining and projecting a sense of identity and status, responding to and exemplifying contrasting social conditions, political and economic motivations, aesthetic predilections, and debates. Assessing physical and archival evidence drawn from a spectrum of iconic and under-represented case studies, an international team of design historians collaborate in this volume to explore key methodological questions about how the production, consumption, and mediation of furniture reveal shifting cultural habits and histories across diverse contexts amidst modernity. Drawing upon a wealth of visual and textual sources, this volume of *A Cultural History of Furniture* presents essays that examine key characteristics of the furniture of the modern period on the themes of design and motifs, makers, making and materials, types, and uses, the domestic setting, the public setting, exhibition and display, furniture and architecture.

visual representations and verbal representations Elusive Archives Martin Brückner, Sandy Isenstadt, 2021-08-27 The essays that comprise *Elusive Archives* raise a common question how do we study material culture when the objects of study are transient evanescent dispersed or subjective Such things resist the taxonomic protocols that institutions such as museums and archives rely on to channel their acquisitions into meaningful collections What holds these disparate things together here are the questions authors ask of them Each essay creates by means of its method a provisional collection of things an elusive archive Scattered matter then becomes fixed within each author's analytical framework rather than within the walls of an archive's reading room or in cases along a museum corridor This book follows the ways in which objects may be identified gathered arranged conceptualized and even displayed rather than by discovering artifacts in an archive and then asking how they came to be there The authors approach material culture outside the traditional bounds of learning about the past Their essays are varied not only in subject matter but also in narrative format and conceptual reach making the volume accessible and easy to navigate for a quick reference or if read straight through build toward a new way to think about material culture *Part-Architecture* Emma Cheadle, 2017-07-20 *Part Architecture* presents a detailed and original study of Pierre Chareau's *Maison de Verre* through another seminal modernist artwork Marcel Duchamp's *Large Glass* Aligning the two works materially historically and conceptually the book challenges the accepted architectural descriptions of the *Maison de Verre* makes original spatial and social accounts of its inhabitation in 1930s Paris and presents new architectural readings of the *Large Glass* Through a rich analysis which incorporates creative projects into history and theory research the book establishes new ways of writing about architecture Designed for politically progressive gynaecologist Dr Jean Dalsace and his avant garde wife Annie Dalsace the *Maison de Verre* combines a family home with a gynaecology clinic into a free plan layout Screened only by glass walls the presence of the clinic in the home suggests an untold dialogue on 1930s sexuality The text explores the *Maison de Verre* through another radical glass construction the *Large Glass* where Duchamp's complex depiction of unconsummated sexual relations across the glass planes reveals his resistance to the marital conventions of 1920s Paris This and other analyses of the *Large Glass* are used as a framework to examine the *Maison de Verre* as a register of the changing history of women's domestic and maternal choices reclaiming the building as a piece of female social architectural history The process used to uncover and write the accounts in the book is termed *part architecture* Derived from psychoanalytic theory *part architecture* fuses analytical descriptive and creative processes to produce a unique social and architectural critique Identifying three essential materials to the *Large Glass* the book has three main chapters *Glass Dust and Air* Combining theory text creative writing and drawing each traces the history and meaning of the material and its contribution to the spaces and sexuality of the *Large Glass* and the *Maison de Verre* As a whole the book contributes important and unique spatial readings to existing scholarship and expands definitions of architectural design and history Risk and Uncertainty in the Art World Anna M. Dempster, 2014-04-10 This edited book offers the first complete

overview of risk in the art market by bringing together contributions from a wide range of international thought leaders on the topic both practitioners and leading scholars who investigate the specific types of uncertainty that exist in the art market as well as the dominant models used to manage the risks An essential read for both art world practitioners as well as scholars and students Risk and Uncertainty in the Art Market elucidates the dynamics and unique qualities of the art market as well as developing insights relevant to other sectors including sociology business and management economics and finance

Sculpture and the Vitrine JohnC. Welchman,2017-07-05 Vitrines and glass cabinets are familiar apparatuses that have in large part defined modern modes of display and visibility both within and beyond the museum They separate objects from their contexts group them with other objects both similar and dissimilar and often serve to reinforce their intrinsic or aesthetic values The vitrine has much in common with the picture frame the plinth and the gallery but it has not yet received the kind of detailed art historical and theoretical discussion that has been brought to these other modes of formal display The twelve contributions to this volume examine some of the points of origin of the vitrine and the various relations it brokers with sculpture first in the Wunderkammer and cabinet of curiosities and then in dialog with the development of glazed architecture beginning with Paxton s Crystal Palace 1851 The collection offers close discussions of the role of the vitrine and shop window in the rise of commodity culture and their apposition with Constructivist design in the work of Frederick Kiesler as well as original readings of the use of vitrines in Surrealism and Fluxus and in work by Joseph Beuys Paul Thek Claes Oldenburg and his collaborators Jeff Koons Mike Kelley Dan Graham Vito Acconci Damien Hirst and Josephine Meckseper among others Sculpture and the Vitrine also raises key questions about the nature and implications of vitrinous space including its fronts onto desire and the spectacle transparency and legibility and onto ideas and practices associated with the archive collecting preserving and ordering
