renovation *The Rise of China and the China-Russia Strategic Partnership* Lei Yu, 2025-02-08 This book argues that China's quest for a strategic partnership with Russia reveals the country's desire to create a geopolitical environment in favour of their country's re-emergence as a great power at the systemic global level. The partnership with its no limit is expected to help China counterbalance its perceived US containment and reshape the US dominated world order. By intensifying Sino-Russian economic and energy cooperation and trade in the framework of the partnership, China attempts to gain entry to Russia's markets and particularly its energy resources to sustain its economic growth that is viewed by Deng Xiaoping as the basis underlying China's hard power and particularly its military capabilities. By intensifying their military collaboration, China seeks to gain entry to Russia's military weaponry and technology for the modernization of the People's Liberation Army (PLA) and work together with Russia to contain their perceived US unilateralism, hegemonism and interventionism. The Chinese foreign policy elites increasingly view US unilateralism and hegemonism as detrimental to China's core interests, e.g. its territorial integrity and national rejuvenation. This sheds light on why the Chinese foreign policy elites conceive the China-Russia partnership as vital for China's peaceful development, commonly known as peaceful rise overseas and the ballast stone for global peace and strategic stability. This book will be of interest to sinologists and scholars of China's foreign policy.

Conquering the North John Man, 2025-05-01 A panoramic history of the roots of China and Mongolia's historic rivalry and why it matters now. A beguiling blend of history and intimate narrative and a delight to read. Colin Thubron, author of *Shadow of the Silk Road*. The Great Wall of China stretching from the arid rises of Gansu province to the cold waters of the Bohai Sea remains an enduring symbol of Chinese might. And yet for all its grandeur, the Wall also marks a vulnerability, an ever-present reminder of old battlelines and never-ending tension with China's northern neighbours. Travelling by sacred mountains and along forgotten trade routes, John Man journeys through China and Mongolia tracing the contours of their uneasy shared histories. From the tumult of the Warring States Period to the present day, Man weaves a thrilling tale of battling warlords, imperial power plays, Soviet interference and contemporary political manoeuvring. Looking to the future of the region, *Conquering the North* canvasses the still fractious interplay of two rival cultures and the continuing struggle for Mongolian sovereignty as China continues to edge north. **China, Russia and Central Asian Infrastructure** Peter

Krasnopolsky, 2022-08-17 This book evaluates Central Asian regionalism by analyzing the impact of Russia and China on physical infrastructure in the region. The narrative builds a picture of the nature of the two powers' influence on the development of regional connectivity in Central Asia. The study covers the 30-year period since the dissolution of the Soviet Union, with a focus on the last decade preceding the global pandemic. Qualitative research methods, i.e. documentary analysis, media analysis and elite interviews, are implemented to explore how activities of Russia and China impact regional cooperation among Central Asian states. and China's engagement influence regional connectivity The book is of interest to the scholars who study international relations in Eurasia major power relations Sino Russian relations China foreign policy international institutions in Asia multilateralism and regionalism The empirical depth of the book attracts attention of area studies scholars who focus on Central Asia Central Eurasia and any of the five Central Asian states Additionally the scholars who analyze the roles of hard infrastructure find the book particularly important The in depth cases on multilateral financial institutions and regional networks particularly energy transportation and telecommunication are of great value to those interested in these respective sectors
