The Literature of Education W. Kenneth Richmond, 2019-01-15 Original blurb The volume of writing on educational topics has increased so prodigiously in recent years that the student is likely to lose himself in a sea of print This may lead him to opt for the first book that comes to hand or waste time rifling through half a dozen when a thorough grasp of one key text is all that is needed Reading lists commonly look impressive not to say daunting In fact the multifarious titles conceal an enormous amount of duplication an endless raking over of other people s research findings It is a safe bet writes W Kenneth Richmond that less than 5 percent of the contents of any new book on education will be in any way original This critical bibliography originally published in 1972 is concerned with the noteworthy books and major official reports that had appeared in the English language during the twenty five years prior to publication In his introduction and in the commentaries prefacing each section the author explains the background to the genuinely new departures of the period and describes successive changes in the climate of educational opinion

Transcultural Flows of English and Education in Asian Contexts Tyler Andrew Barrett, Melissa Fellin, 2016-10-20. *Transcultural Flows of English and Education in Asian Contexts* examines issues concerning the potential of English learning and teaching to go beyond the classroom and affect the multicultural realities of Asian societies. Asian societies often carry long histories and traditions that influence beliefs about identities which are changing in our globalizing world. The authors in this volume explore the synthesis that occurs when culture is shared and re-constructed in different contexts. Specifically, the authors show how English is appropriated and refashioned through language and culture exchanges both inside and outside of traditional classrooms in East Asia, i.e. Japan, South Korea, China, and Southeast Asia, e.g. Indonesia, Thailand. Inside the classroom, transcultural flows have the potential to result in take-up, exchange, appropriation, and refashioning of language and cultural practices that can generate transcultural realities outside the classroom. Understanding transcultural flows may also require understanding circumstances outside of the classroom, for instance, transcultural exchanges that lead to friendships and professional relationships as companies embrace English and attempt to reach a global audience, as English facilitates access to global interaction in cyberspace, and as membership to nation-states, recognition, and identity often confront the politics of English as a global language. For both teachers and students of English, the impact of transcultural connections reaches far beyond the teaching and learning experience. English connects people around the globe even after students and teachers have finished their lessons or teachers have left the country. To examine the transcultural flows that result from English learning and teaching in Asia, this book addresses the following questions: What becomes of English when it is unmoored from local, national, and regional spaces and imaginatively reconceptualized? What are new forms of global consciousness and cultural competency? How is English rediscovered and reinvented in Asian countries where there are long traditions of cultural beliefs and language practices? How are teachers and students taking up and appropriating English inside and outside classrooms? How has English learning and teaching affected social, political, and business relationships? This book will be of interest to scholars in sociolinguistics, anthropology, and education.
