Bary,2014-05-12 A Treatise on Trigonometric Series Volume 1 deals comprehensively with the classical theory of Fourier series This book presents the investigation of best approximations of functions by trigonometric polynomials Organized into six chapters this volume begins with an overview of the fundamental concepts and theorems in the theory of trigonometric series which play a significant role in mathematics and in many of its applications This text then explores the properties of the Fourier coefficient function and estimates the rate at which its Fourier coefficients tend to zero Other chapters consider some tests for the convergence of a Fourier series at a given point This book discusses as well the conditions under which the series does converge uniformly The final chapter deals with adjustment of a summable function outside a given perfect set This book is a valuable resource for advanced students and research workers Mathematicians will also find this book useful *Russian Language Studies in North America* Veronika Makarova,2013-10-01 Russian Language Studies in North America New Perspectives from Theoretical and Applied Linguistics offers a unique collection of research papers representing current directions in Russian language studies in Canada and the United States Traditionally Slavic and Russian studies in these countries have centered around literature history politics and culture This volume reflects recent changes in Russian studies by focusing on language structure language use and teaching methodology The volume brings together several generations of scholars from young promising researchers to those with long established reputations in the field **The Publishers' Circular and Booksellers' Record** ,1929 East European Accessions Index ,1960 *Book Dealers' Weekly* ,1925 **The Bookseller** ,1915 Growth Strategies and Welfare Reforms ,2025-10-01 How have advanced capitalist democracies dealt with deindustrialization Did financialization affect these economies to the same degree How does digitalization transform them How do governments deal with the polycrises of Covid 19 inflation and climate change What roles did welfare systems and reforms play in these adaptations This book seeks to answer these questions by exploring the economic and social trajectories of advanced political economies in Europe the United States China and Russia in the twenty first century It focuses on the interaction between national growth and welfare regimes government growth strategies and welfare state reforms to explain these countries differing developments from the 1990s to the mid 2020s The chapters offer theoretical typological and empirical comparisons between advanced capitalist countries alongside detailed national case studies in order to further understand their general economic and social features and their developments Growth Strategies and Welfare Reforms features contributions from leading scholars in comparative political economy and comparative welfare state research and presents a sophisticated theoretical approach drawing on but also moving beyond varieties of capitalism and growth model approaches Alexander Solzhenitsyn: Cold War Icon, Gulag Author, Russian Nationalist? Kriza,2014-10-01 Neoliberal Authoritarianism: An Ethnography of Russian Universities Iuliia Gataulina,2025-09-01 This open access book delves into the politics of oppression and dispossession driven by global neoliberalism and state authoritarianism Challenging liberal biases it introduces the concept of neoliberal authoritarianism highlighting how the Russian state has transformed within the context of neoliberal globalization into a new state formation where authoritarianism is reinforced by neoliberal rationalities The book analyzes neoliberal authoritarianism through an ethnographic lens on universities and their governance which have become a new frontier of neoliberal economic development serving the imperatives of growth and competition *The Russian "House"* Jason C. Vaughn,2018-10-15 The Russian House An Examination of Post Soviet Russian Culture in the Times of Putin examines Russian society as considered by the Russian people This study recognizes the political economic and social structure of post Soviet Russia in the 2010s era given that the Russian citizenry the ethnic and the civil still desires and recognizes the need for reform while still relying on a host of ideas which Russian society and culture reflexively fall back on This book will examine categorizations as separated into five co equal constructs that this book will posit to be axiomatic of Russian culture and worthy of consideration in further view of the possibility for Russia to one day become a stable and prosperous country without authoritarianism bloodshed militarism or excess nationalism *Duelling, the Russian Cultural Imagination, and Masculinity in Crisis* Amanda DiGioia,2020-10-12 This book written from a feminist perspective uses the focus of duelling to discuss the nature of masculinity in Russia It traces the development of duelling and masculinity historically from the time of Peter the Great onwards considers how duelling and masculinity have been represented in both literature and film and assesses the high emphasis given in Soviet times to gender equality arguing that this was a failed experiment that ran counter to Russian tradition It examines how duelling continues to be a feature of life in contemporary Russia and relates the situation in Russia to wider scholarship on the nature of masculinity more generally Overall the book contends that Russia s valuing of a strong militaristic form of masculinity is a major problem *Environmental Radiation Effects on Mammals* Olga A. Smirnova,2010-12-17 The monograph is devoted to the theoretical studies of radiation effects on mammals It summarizes the results obtained by the author over the past 30 years most of them being of high priority In the course of these studies a single approach to the modeling of radiation effects on mammals has been elaborated Specifically in the framework of the developed deterministic mathematical models the effects of both acute and chronic irradiation in a wide range of doses and dose rates on vital body systems hematopoiesis small intestine and humoral immunity as well as on the development of autoimmune diseases are investigated The radiation effects on the mortality dynamics in homogeneous and nonhomogeneous in radiosensitivity mammalian populations are also studied by making use of the developed stochastic models The most appealing feature of these mortality models consists of the fact that they account for the intrinsic properties of the exposed organism Namely within these models the stochastic biometrical functions are calculated proceeding from statistical

characteristics and dynamics of the respective critical body system hematopoiesis or small intestine The performed theoretical investigations contribute to the development of the system and quantitative approaches in radiation biology and ecology These studies elucidate the major regulatory mechanisms of the damage and recovery processes running in the vital body systems of exposed mammals and reveal the key parameters characterizing the processes

Russian Nationalism, Foreign Policy and Identity Debates in Putin's Russia Marlene, 2014-04-15 The contributors to this book discuss the new conjunctions that have emerged between foreign policy events and politicized expressions of Russian nationalism since 2005 The 2008 war with Georgia as well as conflicts with Ukraine and other East European countries over the memory of the Soviet Union and the Russian interpretation of the 2005 French riots have all contributed to reinforcing narratives of Russia as a fortress surrounded by aggressive forces in the West and CIS This narrative has found support not only in state structures but also within the larger public It has been especially salient for some nationalist youth movements including both pro Kremlin organizations such as Nashi and extra systemic groups such as those of the skinheads These various actors each have their own specific agendas they employ different modes of public action and receive unequal recognition from other segments of society Yet many of them expose a reading of certain foreign policy events which is roughly similar to that of various state structures These and related phenomena are analyzed interpreted and contextualized in papers by Luke March Igor Torbakov Jussi Lassila Marl ne Laruelle and Lukasz Jurczyszyn
