Russian Society And The Greek Revolution:

Russian Society and the Greek Revolution Theophilus Christopher Prousis, 1994 *The Greek Revolution of 1821 and the Reaction of the Russian Society at the Time of Alexander I* Evan Vlachos, Indiana University. Russian and East European Institute, 1964 *The Greek Revolution and the Violent Birth of Nationalism* Yanni Kotsonis, 2025-01-14 A sweeping global history of the birth of modern Greece In 1821 a diverse territory in the southern Balkans on the fringe of the Ottoman Empire was thrust into a decade of astounding mass violence The Greek Revolution and the Violent Birth of Nationalism traces how something new emerged from an imperial mosaic of myriad languages religions cultures and localisms the world's first ethnic nation state one that was born from the destruction and the creation of whole peoples and which set the stage for the modern age of nationalism that was to come Yanni Kotsonis exposes the everyday chaos and brutality in the Balkan peninsula as the Ottoman regime unraveled He follows the future Greeks on the seaways to Odesa Alexandria Livorno and the Caribbean and recovers the stories of peasants merchants warriors aristocrats and intellectuals who navigated the great empires that crisscrossed the region Kotsonis recounts the experiences of the villagers and sailors who joined the armed battalions of the Napoleonic Wars and learned a new kind of warfare and a new practice of mass mobilization lessons that served them well during the revolutionary decade He describes how as the bloody 1820s came to a close the region's Muslims were no more and Greece was an Orthodox Christian nation united by a shared language and a claim to an ancient past This panoramic book shows how the Greek Revolution was a demographic upheaval more consequential than the overthrow of a ruler Drawing on Ottoman sources together with archival evidence from Greece Britain France Russia and Switzerland the book reframes the birth of modern Greece within the imperial history of the global nineteenth century **Russia and the Making of Modern Greek Identity, 1821-1844** Lucien J. Frary, 2015 Explores how Russian politics and religion were instrumental in the shaping of modern Greece providing a broad understanding of nineteenth century Russian foreign policy and religious enterprise and the relationship between religion nationalism and state building *The Greek Revolution in the Age of Revolutions (1776-1848)* Paschalis M. Kitromilides, 2021-09-09 The Greek Revolution in the Age of Revolutions 1776-1848 brings together twenty-one scholars and a host of original ideas revisionist arguments and new information to mark the bicentennial of the Greek Revolution of 1821 The purpose of this volume is to demonstrate the significance of the Greek liberation struggle to international history and to highlight how it was a turning point that signalled the revival of revolution in Europe after the defeat of the French Revolution in 1815 It argues that the sacrifices of rebellious Greeks paved the way for other resistance movements in European politics culminating in the spring of European peoples in 1848 Richly researched and innovative in approach this volume also considers the diplomatic and transnational aspects of the insurrection and examines hitherto unexplored dimensions of revolutionary change in the Greek world This book will appeal to scholars and students of the Age of Revolution as well as those interested in comparative and transnational history

This book is a comprehensive study of more than 200 years of the shared and interconnected histories of Greek Albanian relations a field of inquiry that has not attracted the international scholarly attention it deserves The book presents and analyses in detail topics including the contested borderland 1800 1912 the Greek Revolution 1821 1830 and Greek Albanian entanglements during the Greek Revolution Greek nationalism identity and narrative the Albanians pre modernism belated nationalism origin the rise of Albanian nationalism Albanian national identity and historical narrative Greek Albanian relations from the League of Prizren 1878 until Albania's declaration of independence 1912 Greek irredentism the Northern Epirus Question 1912 1920 and Albania's precarious independence Greek irredentism and Greek Albanian relations the Northern Epirus Question 1940 1971 the Greek minority in Albania the Cham Muslim Albanian issue the turbulent first part

of the 1990s the pending Greek Albanian issues and public opinion It concludes with a road map for an eventual Albanian Greek reconciliation This volume will interest scholars and students of Southeastern Europe Balkans international relations and history political science and sociology It will also be a valuable resource for diplomats journalists think tanks and other organizations and institutions involved in the Balkans Greek Albanian relations **Revolutionary Contagion and International Politics** Chad E. Nelson, 2022 A unique theory of what happens when leaders fear a revolution abroad will spread to their own country and how that affects international relations When do leaders fear that a revolution elsewhere will spread to their own polities and what are the international effects of this fear In *Revolutionary Contagion* Chad E Nelson develops and tests a theory that explains how states react to ideological driven revolutions that have occurred in other nations To do this he analyzes four key revolutionary movements over two centuries liberalism communism fascism and Islamism He further explains that the key to understanding the response to revolutions lies in focusing on the extent to which leaders fear upheaval in their own countries According to the theory Nelson argues fear of contagion is driven more by the characteristics of the host rather than the activities of the infecting agents In other words leaders will fear revolutionary contagion when they have significant revolutionary opposition movements that have an ideological affinity with the revolutionary state A powerful theory of the profound effects revolutions have on international relations this book shows why one simply cannot make sense of international politics including patterns of alliances and wars in certain situations without considering the fear of contagion **Containing Balkan Nationalism** Denis Vovchenko, 2016 *Containing Balkan Nationalism* highlights the efforts by ecclesiastics publicists and diplomats in Russia the Ottoman Empire Greece and Bulgaria to develop and implement various plans to reconcile ethnic differences within existing religious and dynastic frameworks Those arrangements were often inspired by modern visions of a political and cultural union of Orthodox Slavs and Greeks **Napoleon and Europe** Philip G. Dwyer, 2014-07-22 Two hundred years ago Napoleon was at the apogee of his power in Europe This broad ranging reassessment explores the key themes presented by his extraordinary career from his rise to power and the foundation of the imperial state to the final defeat of his grand vision following the doomed invasion of Russia It was a period of almost uninterrupted war in Europe the consequences of victory or failure repeatedly transforming the political map But Napoleon's impact reached much deeper than this achieving the ultimate destruction of the ancien regime and feudalism in Europe and leaving a political and juridical legacy that persists today **Selective Remembrances** Philip L. Kohl, Mara Kozelsky, Nachman Ben-Yehuda, 2008-11-15 When political geography changes how do reorganized or newly formed states justify their rule and create a sense of shared history for their people Often the essays in *Selective Remembrances* reveal they turn to archaeology employing the field and its findings to develop nationalistic feelings and forge legitimate distinctive national identities Examining such relatively new or reconfigured nation states as Iran Iraq Turkey Israel Russia Ukraine India and Thailand *Selective Remembrances* shows how states invoke the remote past to extol

the glories of specific peoples or prove claims to ancestral homelands Religion has long played a key role in such efforts and the contributors take care to demonstrate the tendency of many people including archaeologists themselves to view the world through a religious lens which can be exploited by new regimes to suppress objective study of the past and justify contemporary political actions The wide geographic and intellectual range of the essays in *Selective Remembrances* will make it a seminal text for archaeologists and historians

In the Cause of Humanity Fabian Klose, 2021-12-09 In the Cause of Humanity is a major new history of the emergence of the theory and practice of humanitarian intervention during the nineteenth century when the question of whether when and how the international community should react to violations of humanitarian norms and humanitarian crises first emerged as a key topic of controversy and debate Fabian Klose investigates the emergence of legal debates on the protection of humanitarian norms by violent means revealing how military intervention under the banner of humanitarianism became closely intertwined with imperial and colonial projects Through case studies including the international fight against the slave trade the military interventions under the banner of humanitarian aid for Christian minorities in the Ottoman Empire and the intervention of the United States in the Cuban War of Independence he shows how the idea of humanitarian intervention established itself as a recognized instrument in international politics and international law

Transnational Patriotism in the Mediterranean, 1800-1850 Konstantina Zanou, 2018 Transnational Patriotism in the Mediterranean charts the lives of those who lived along the shores of the Adriatic during the first half of the nineteenth century when the region was transformed from a Venetian lake into a battlefield between old and new imperial powers and where emerging nationalisms and nation states emerged

Writing at Russia's Border Katya Hokanson, 2008-01-01 It is often assumed that cultural identity is determined in a country's metropolitan centres Given Russia's long tenure as a geographically and socially diverse empire however there is a certain distillation of peripheral experiences and ideas that contributes just as much to theories of national culture as do urban centred perspectives *Writing at Russia's Border* argues that Russian literature needs to be reexamined in light of the fact that many of its most important nineteenth century texts are peripheral not in significance but in provenance Katya Hokanson makes the case that the fluid and ever changing cultural and linguistic boundaries of Russia's border regions profoundly influenced the nation's literature posing challenges to stereotypical or territorially based conceptions of Russia's imperial military and cultural identity A highly canonical text such as Pushkin's *Eugene Onegin* 1831 which is set in

European Russia is no less dependent on the perspectives of those living at the edges of the Russian Empire than is Tolstoy's *The Cossacks* 1863 which is explicitly set on Russia's border and has become central to the Russian canon. Hokanson cites the influence of these and other peripheral texts as proof that Russia's national identity was dependent upon the experiences of people living in the border areas of an expanding empire. Produced at a cultural moment of contrast and exchange, the literature of the periphery represented a negotiation of different views of Russian identity, an ingredient that was ultimately essential even to literature produced in the major cities. *Writing at Russia's Border* upends popular ideas of national cultural production and is a fascinating study of the social implications of nineteenth-century Russian literature. **Southern**

Europe in the Age of Revolutions Maurizio Isabella, 2025-06-17. An examination of revolutions in the Iberian and Italian peninsulas, Sicily and Greece in the 1820s that reveals a popular constitutional culture in the South. After the turbulent years of the Napoleonic Wars and the Congress of Vienna's attempt to guarantee peace and stability across Europe, a new revolutionary movement emerged in the southern peripheries of the continent. In this groundbreaking study, Maurizio Isabella examines the historical moment in the 1820s when a series of simultaneous uprisings took the quest for constitutional government to Portugal, Spain, the Italian peninsula, Sicily, and Greece. Isabella places these events in a broader global revolutionary context and decentering conventional narratives of the origins of political modernity reveals the existence of an original popular constitutional culture in southern Europe. Isabella looks at the role played by secret societies, elections, petitions, protests, and the experience of war, as well as the circulation of information and individuals across seas and borders in politicising new sectors of society. By studying the mobilisation of the army, the clergy, artisans, rural communities, and urban populations in favour of or against the revolutions, he shows that the uprisings in the South, although their ultimate fate was determined by the intervention of more powerful foreign countries, enjoyed considerable popular support in ideologically divided societies and led to the introduction of constitutions. Isabella argues that these movements informed the political life of Portugal and Spain for many decades and helped to forge a long-lasting revolutionary tradition in the Italian peninsula. The liberalism that emerged as a popular political force across southern Europe, he contends, was distinct from French and British varieties.

Mediterranean Diasporas Maurizio Isabella, Konstantina Zanou, 2015-11-19. *Mediterranean Diasporas* looks at the relationship between displacement and the circulation of ideas within and from the Mediterranean basin in the long 19th century. In bringing together leading historians working on Southern Europe, the Balkans, and the Ottoman Empire for the first time, it builds bridges across national historiographies, raises a number of comparative questions, and unveils unexplored intellectual connections and ideological formulations. The book shows that in the so-called age of nationalism, the idea of the nation-state was by no means dominant, as displaced intellectuals and migrant communities developed notions of double national affiliations, imperial patriotism, and liberal imperialism. By adopting the Mediterranean as a framework of analysis, the collection offers a fresh contribution to the growing field of transnational and global intellectual history, revising the

genealogy of 19th century nationalism and liberalism and reveals new perspectives on the intellectual dynamics of the age of revolutions
