**Russia's oil in America's future** , Presidents George Bush and Vladimir Putin will hold a summit at the end of September that will focus on economic and other ties between the United States and Russia The two presidents have long recognized the central position of energy in our bilateral relations and in that sphere nothing is as critical as oil Today Russia may again be the largest oil exporter in the world but very little yet comes to the United States Russia s oil industry is dominated by rich and aggressive young private companies Generally they are eager to deal with foreigners but despite significant state reforms they often are still inhibited by a dilapidated state controlled delivery system and a residue of traditional thinking and institutions Many of Russia s as yet unresolved post Soviet prob lems exploded in mid 2003 when the prosecutor general s office attacked Yukos the country s most modernized productive and pro American private oil company Thus even as Washington and American oil industry leaders actively sought alternatives to unstable sources in the Middle East Africa and Latin America basic questions re emerged in Russia about the privatizations of the 1990s the security of private property the mixing of law and politics and the exercise of power in the Kremlin Today Russians with the support of American and European allies must create conditions that will welcome the foreign funds technology and expertise needed to develop the critical oil industry but also to lay foundations of law and infrastructure that will help make Russia a stable member of the world community Americans must decide how much involvement Russia can constructively absorb to promote not only short term oil supplies but also long term Russian development and broader U S foreign policy goals Finally the critical long term lesson of 9 11 and other recent experiences for Americans is that even as we cultivate Russia as an ally and major source of oil we must actively develop alternative sources of energy In an unstable world the United States must not forever be held hostage by other nations with their often very different cultures institutions and interests Summary      **The Future of the Korean Peninsula and Northeast Asian Security** Hoi-Chang Lee,2005      **Undermining the Foundations of Organized Crime and Public Sector Corruption** ,      **The debate on China's exchange rate** Jialin Zhang,2004      Hoover Digest ,2006      **The Writers Directory 2008** Michelle Kazensky,2007-06 Features bibliographical biographical and contact information for living authors worldwide who have at least one English publication Entries include name pseudonyms addresses citizenship birth date specialization career information and a bibliography      **Contemporary Issues in International Politics** ,2004      *Library of Congress Catalogs* Library of Congress,1980      Energy Abstracts for Policy Analysis ,1975-07      Understandings of Social Investment in the Oil and Gas Sector Rafaela Costa Camões Rabello,2021-01-30 This book explores research that contributes to the current literature on the Oil and Gas Sector by analysing the multiple discourses that experts use to examine social investment This book explains how these discourses influence social investment practices and host communities in the O and where care instead of profit becomes the driver of O G social investment      Subject Catalog, 1979 Library of Congress,1979      **Subject Catalog** Library of Congress,
