Imperial Co-operation and Transfer, 1870-1930, 2015-08-27 Conflict and competition between imperial powers has long been a feature of global history but their co-operation has largely been a peripheral concern Imperial Co-operation and Transfer 1870-1930 redresses this imbalance providing a coherent conceptual framework for the study of inter-imperial collaboration and arguing that it deserves an equally prominent position in the field Using a variety of examples from across Asia Europe and Africa this book demonstrates the ways in which empires have shared and exchanged their knowledge about imperial governance including military strategy religious influence and political surveillance It asks how when and where these partnerships took place and who initiated them Not only does this book fill an empirical gap in the study of imperial history it traces ideas of empire from their conception in imperial contact zones to their implementation in specific contexts As such this is an important study for imperial and global historians of all specialisms

The Black Sea : A History Charles King, 2004-03-18 Based on extensive research in multiple languages this book is an innovative and indispensable guide to the history cultures and politics of the fascinating Black Sea area and its future at the heart of Europe and Eurasia Charles King breaks new ground in demonstrating how a region often thought of as a zone of timeless conflict has

experienced long periods of integration and co operation The area from the Balkans to the Caucasus is often seen as a zone of timeless conflict a frontier region at the meeting place of mutually antagonistic civilizations But in this pathbreaking work Charles King investigates the myriad of connections that have made the Black Sea more of a bridge than a boundary linking religious communities linguistic groups empires and later nations and states For some parts of the world the idea of waterways as defining elements in human history is uncontroversial Mention the Mediterranean or the South Pacific and images of mutual influence come to mind Those images come less readily for the Black Sea a region that has experienced ethnic conflict economic collapse and interstate rivalries over the last two decades But in the recent past the idea of the Black Sea as a distinct unit was self evident From its formation some seven or eight millennia ago to the political revolutions and environmental crisis of the late twentieth century the sea has been a zone of interaction sometimes cordial sometimes conflictual among the peoples and states around its shores To the ancient Greeks the sea lay literally at the edge of the known world In time the growth of Greek trading colonies linked all the coasts into a web of economic relationships In the Middle Ages the sea was tied to the great commercial cities of Venice and Genoa Later the Ottomans used the region s resources to build their own empire In the late eighteenth century the sea was opened to foreign commerce and the seacoasts were part of a genuinely global system of trade After the collapse of the Russian and Ottoman empires the coastline was carved up among a number of newly formed nation states with each asserting a right to a piece of the coast and a section of the coastal waters Today efforts to resurrect the idea of the Black Sea as a unified region are once again on the international agenda Based on extensive research in multiple languages this book is an indispensable guide to the history cultures and politics of this fascinating sea and its future at the heart of Europe and Eurasia Well footnoted and fluently written a useful and accessible work with the Sea itself quite properly at the centre of attention Robin Milner Gulland History Today In this timely book Charles King provides a stretchy timeline for the murky pool once a lake now a tideless sea which has always sat on the edge of everything Europe Asia civilisation barbarism us and other The Guardian Review This is an essential book for anyone who feels they ought to know about what used to be called the eastern question and worries secretly that it is too late to start finding out The Guardian A solid work by an academic historian writing for the general educated public He is particularly good on little known or forgotten episodes the part played by Westerners in the development of the area King is well placed to see through the myths of nationalists he has a good eye also for the victims of history Kings work has all the virtues of good American scholarship vast array of sources a transatlantic detachment and the recent and very welcome fashion for elegant prose Andrew Mango TLS The collapse of the Soviet Union restored two great geostrategic arenas long buried in now defunct empires or pushed to the margin by Cold War alignments The first is Inner Asia an immense hinterland stretching from the Chinese borderlands across the Siberian south to the Hindu Kush The second is the Black Sea a junction where the Balkans Central Asia and the Middle East meet Say no more To appreciate what this re

Enlightened Colonialism Damien Tricoire, 2017-08-11 This book further qualifies the postcolonial thesis and shows its limits To reach these goals it links text analysis and political history on a global comparative scale Focusing on imperial agents their narratives of progress and their political aims and strategies it asks whether Enlightenment gave birth to a new colonialism between 1760 and 1820 Has Enlightenment provided the cultural and intellectual origins of modern colonialism For decades historians of political thought philosophy and literature have debated this question On one side many postcolonial authors believe that enlightened rationalism helped delegitimize non European cultures On the other side some historians of ideas and literature are willing to defend at least some eighteenth century philosophers whom they consider to have been anti colonialists Surprisingly enough both sides have focused on literary and philosophical texts but have rarely taken political and social practice into account

Bremer,2015-12-11 This volume concentrates on the conceptual boundary through Europe which is determined by Western and Eastern Christianity The chapters show that the boundary has never been a stable and defined division but that it was also subject to change and development and a place of encounter and exchange between religions and cultures
