Sacred Summits:

Sacred Summits Peter Boardman, 2013-10-01 Mountaintops have long been seen as sacred places home to gods and dreams. In one climbing year Peter Boardman visited three very different sacred mountains. He began on the South Face of the Carstensz Pyramid in New Guinea. This is the highest point between the Andes and the Himalaya and one of the most inaccessible, rising above thick jungle inhabited by warring Stone Age tribes. During the spring Boardman made a four-man oxygen-free attempt on the world's third highest peak, Kangchenjunga. Hurricane-force winds beat back their first two bids on the unclimbed North Ridge, but they eventually stood within feet of the summit, leaving the final few yards untrodden in deference to the inhabiting deity. In October he climbed the mountain most sacred to the Sherpas, the twin summits Gauri Sankar. Renowned for its technical difficulty and spectacular profile, it is aptly dubbed the Eiger of the Himalaya. Boardman's first ascent took a gruelling twenty-three days. Three sacred mountains, three very different expeditions, all superbly captured by Boardman in *Sacred Summits*, his second book, first published shortly after his death in 1982. Combining the excitement of extreme climbing with acute observation of life in the mountains, this is an amusing, dramatic, poignant, and thought-provoking book. Peter Boardman and Joe Tasker died on Everest in 1982 whilst attempting a new and unclimbed line. Both men were superb mountaineers and talented writers. Their literary legacy lives on through the Boardman Tasker Prize for Mountain Literature, established by family and friends in 1983 and presented annually to the author or co-authors of an original work which has made an outstanding contribution to mountain literature. *Sacred Summits* Peter Boardman, 1983

Best Summit Hikes in Colorado James Dziezynski, 2012-08-07 Colorado has 53 14ers, more than 600 13ers, and hundreds of other peaks that can be reached without special equipment or expertise. Numerous guides dryly catalog these trails, but *Best Summit Hikes in Colorado* stands out from them all. Author James Dziezynski has meticulously selected 80 of the state's absolute best peaks in more than 50 superlative hikes, and his opinionated narrative brings each route to life. Each summit is included because of a notable feature: whether it's the site of a ghost mine or airplane wreckage, has thundering waterfalls or colorful floral meadows, is the best summit for spotting wildlife or bringing out of town friends, or is very accessible. Some peaks offer unique opportunities, such as a trailhead accessible only via a steam-powered railroad. Several summits are described in no other publication. Covering all Colorado's major mountain ranges, including the well-known Sangre de Cristo, Gore, Sawatch, Indian Peaks, and Maroon Bell wilderness areas, to the lesser-known Grenadiers, Medicine Bow, and Outer San Juan peaks, this distinctive guide makes it easy to select exactly the right hike for the right day, the right mood, and the right companions. *Holy Mountains* Sanjay Desai, 2025-02-27 *Holy Mountains* explores the profound religious and historical significance of mountains across diverse cultures, examining why these geological formations are consistently revered as sacred sites. Mountains often serve as axis mundi, connecting the earthly and divine realms, influencing religious rituals and artistic expression. It's intriguing how mountains, due to their physical grandeur and

perceived proximity to the divine have become central to the spiritual lives of millions The book adopts an interdisciplinary approach drawing from religious studies anthropology and geography to understand mountain veneration It progresses from establishing a theoretical framework to examining specific examples like Mount Sinai and Mount Kailash and finally analyzing the broader implications for environmental ethics and interfaith dialogue This study uniquely synthesizes scholarship to offer a comprehensive understanding of sacred landscapes and their cultural heritage **Sacred Summits**

Mountain Geography Martin F. Price,Alton C. Byers,Donald A. Friend,Thomas Kohler,Larry W. Price,2013-08-24

Mountains cover a quarter of the Earth s land surface and a quarter of the global population lives in or adjacent to these
 areas The global importance of mountains is recognized particularly because they provide critical resources such as water

food and wood contain high levels of biological and cultural diversity and are often places for tourism and recreation and of sacred significance This major revision of Larry Price s book *Mountains and Man* 1981 is both timely and highly appropriate The past three decades have been a period of remarkable progress in our understanding of mountains from an academic point of view Of even greater importance is that society at large now realizes that mountains and the people who reside in them are not isolated from the mainstream of world affairs but are vital if we are to achieve an environmentally sustainable future *Mountain Geography* is a comprehensive resource that gives readers an in depth understanding of the geographical processes occurring in the world s mountains and the overall impact of these regions on culture and society as a whole The volume begins with an introduction to how mountains are defined followed by a comprehensive treatment of their physical geography origins climatology snow and ice landforms and geomorphic processes soils vegetation and wildlife The concluding chapters provide an introduction to the human geography of mountains attitudes toward mountains people living in mountain regions and their livelihoods and interactions within dynamic environments the diverse types of mountain agriculture and the challenges of sustainable mountain development

College Geography Roderick Peattie,1926 **The Evangelical Repository** ,1852 *The Protestant Quarterly Review* ,1853 **Foodie Snob** Kevin Nelson,2017-04-03 A book for foodies Food lovers will enjoy this fun and lighthearted look at their obsession with trendy food and restaurants Food Snob is both be a send up of foodies and an affirmation of certain aspects of the foodie way of life While laughing at this satire of the habits attitudes and lifestyle of foodies foodies will laugh at themselves and also get solid advice and tips on the activity they love Chapters include The Community of Food Cooking and Other Acts of Self Invention Adventures in Food and more *Talking to the Ground* Douglas Preston,2019-06-04 From the author of the 1 New York Times bestseller *The Lost City of the Monkey God* comes an entrancing eloquent and entertaining account of the author s adventurous journey on horseback through the Southwest in the heart of Navajo desert country In 1992 author Douglas Preston and his wife and daughter rode horseback across 400 miles of desert in Utah Arizona and New Mexico They were retracing the route of a Navajo deity the Slayer of Alien Gods on his quest to restore beauty and balance to the Earth More than a travelogue Preston s account of their one tough journey luminously remembered Kirkus Reviews is a tale of two cultures meeting in a sacred land and is like traveling across unknown territory with Lewis and Clark to the Pacific Dee Brown author of *Bury My Heart At Wounded Knee* **MOUNTAINS AND MINDS** Robert Wheeler,2010-11-12 History and psychology indicate that people have inherent needs for stimulation and challenge meaning and goals social support moral authority explanation of existence and the possibility of transcendence Whether these needs result from physical evolution or intelligent design they produce a concern about ultimate cause meaning and purpose for existence known as the ontological imperative Since understanding ultimate concerns is beyond physical science elusive and mysterious people tend to attribute explanation to a metaphysical realm resulting in spirituality Mountains symbolize obstacles in meeting the needs and experiences in climbing mountains

provide a vehicle both actually and figuratively for exploring associated mechanisms and impacts Pursuit of the ontological imperative stimulates the attitude of spirituality that becomes conceptualized into personal religious systems forming beliefs that can be shared with others Shared religions acquire dogma structure ritual faith and worship that then become institutional religions As science develops physical explanations supplant metaphysical explanations that many times conflict with religion Faith in established belief competes with science producing a great dilemma A great paradox is that both are needed despite the conflict The first chapter relates a personal experience climbing Mount Fuji that nearly ended in disaster with the question of why people do such things Chapter 2 is a brief summary of research supporting the human need of stimulation and challenge Subsequent chapters alternate between mountain climbing experiences and brief summaries of research about why people continue to pursue difficult tasks progressing from stimulation emotions consciousness search for ultimate reality involving ontological imperative spirituality personal religion and institutional religion and finally to pragmatic reality involving science religion dilemma and need for both paradox This bottom up approach leads to the final chapter s proposal for ameliorating conflict and dilemma caused by some religious beliefs by accepting the great paradox and pursuing a seemingly unattainable goal recognizing personal characteristics of spirituality exemplified in the five factor model of personality adopting an attitude of agnosticism whereby the limitations of present knowledge are acknowledged and accepting ecumenical humanism whereby alternate beliefs are tolerated Such an approach might be classified as pragmatic pluralism A basic theme is that for life to be meaningful and manageable people need a sense of purpose and coherence that is best met by having a belief about the unknown and doubt of its validity Contact author at wheelerrj@junco.com
