## **Sacred Trust Ecology And Spiritual Vision:**

**A Sacred Trust** John Carey, 2002      Ecological Imaginations in the World Religions Tony Watling, 2011-10-20 The field of religion and ecology is an emerging and growing movement that is becoming relevant and influential in the world. It seeks to analyse, encourage, inspire, use, compare, and combine religious traditions to engage and shape environmental issues. Tony Watling seeks to ethnographically analyse this important field and its expressions. In particular, he analyses and compares its explorations of different world religions for ecological themes and the resulting expressions of ecological visions in what he terms religious ecotopias: idealized environmentally friendly reimaginings of nature and humanity and correspondingly religion which seek to influence environmental attitudes.      Seyyed Hossein Nasr's Ecological Ethics Muzzamel Hussain Imran, 2023-12-02 The book explores the profound insights of Seyyed Hossein Nasr, an Islamic scholar, on the ecological crisis and its underlying causes. Nasr argues that the dominance of scientism, which prioritizes contemporary science as the sole source of knowledge, has led to a destructive relationship between humans and nature. He proposes that restoring the religious perspective is crucial for finding a lasting solution to the ecological problem. The book delves into Nasr's comprehensive body of work covering diverse subjects such as Islamic philosophy, Islamic art, Islamic science, Sufism, and the ecological crisis. Nasr's approach advocates for a holistic and inclusive philosophy that draws inspiration from the perennial philosophy and the principles of Islam. He emphasizes the importance of reconnecting with our spiritual heritage and rediscovering reverence for the natural world. The book also discusses the relevance and applicability of Nasr's ideas to non-Islamic cultures and societies. This is a unique study into the work of an important Islamic scholar and ecologist. The key audience includes scholars and researchers interested in Islamic philosophy, environmental ethics, and the intersection of religion and ecology.      **Worldly Wonder** Mary Evelyn Tucker, 2011-04-15 History illustrates the power of religion to bring about change. Mary Evelyn Tucker describes how world religions have begun to move from a focus on God, human, and human relations to encompass human-earth relations. She argues that in light of the environmental crisis, religion should move from isolated orthodoxy to interrelated dialogue and use its authority for liberation rather than oppression.      On the Origin of Beauty John Griffin, 2011-10-01 In the light of the looming ecological crisis facing the world today, much of the stunning beauty of the natural world is being lost forever. *On the Origin of Beauty* seeks to confront this crisis through a philosophical enquiry into our perception of natural beauty. Through discussions of numerous fields including the philosophy of science, environmental ethics, rationalism, and Eastern and Western religion, Griffin asserts that Beauty itself may be the catalyst needed to save the globe from destruction.      **Seeing God Everywhere** Barry McDonald, 2003-07-30 This anthology, combining articles by Buddhist, Christian, Islamic, Jewish, and Native American scholars, looks at the environmental crisis through a spiritual lens.      *Wendell Berry* Jason Peters, 2010-06-11 A portrait of one of America's most profound and honest thinkers, this book combines biographical sketches, personal accounts, literary criticism, and social commentary to illuminate

Berry as he is a complex man of place and community with a depth of domestic intellectual filial and fraternal attributes
