Cities Beyond Borders Nicolas Kenny, Rebecca Madgin, 2016-05-23 Drawing on a body of research covering primarily Europe and the Americas but stretching also to Asia and Africa from the mid eighteenth century to the present this book explores the methodological and heuristic implications of studying cities in relation to one another Moving fluidly between comparative and transnational methods as well as across regional and national lines the contributors to this volume demonstrate the necessity of this broader view in assessing not just the fundamentals of urban life the way cities are occupied and organised on a daily basis but also the urban mindscape the way cities are imagined and represented In doing so the volume provides valuable insights into the advantages and limitations of using multiple cities to form historical inquiries *The Spatial Politics of the Sculptural* Euyoung Hong, 2016-10-04 Space is a formative factor in the production of sculpture Phenomenological thought interprets sculptural work in relation to the immersive experience of the viewer situating it within its environment But what possibilities lie beyond this unitary position What is the political potential of a sculptural object How can its spatial relations and movements be reconfigured beyond its immediate environment Spatial Politics of the Sculptural investigates the concept of space and its role in the production of the sculptural form from a multidimensional perspective Engaging with the work of Krauss Fried Merleau-Ponty Deleuze and Guattari and using case studies of urban development in Paris New York and Seoul it reinterprets and dislocates the sculptural form in terms of the

political dynamism of space proposing a new methodology for reading producing and expanding sculptural practice Drawing on David Harvey's theory of capital it scrutinizes the idea of the spatial in the process of urbanization It examines the interrelationship between capital flow and accumulation and explores the production and destruction of space in relation to the creation of three dimensional works of art In doing so it expands the idea of the sculptural object in relation to the urban environment
