Oliveira,Pamela Zave,2003-06-29 FME 2001 is the tenth in a series of meetings organized every eighteen months by Formal Methods Europe FME an independent association whose aim is to stimulate the use of and research on formal methods for software development It follows four VDM Europe Symposia four other Formal Methods Europe S posia and the 1999 World Congress on Formal Methods in the Development of Computing Systems These meetings have been notably successful in bringing gether a community of users researchers and developers of precise mathematical methods for software development FME 2001 took place in Berlin Germany and was organized by the C puter Science Department of the Humboldt Universit at zu Berlin The theme of the symposium was Formal Methods for Increasing Software Productivity This theme recognizes that formal methods have the potential to do more for industrial software development than enhance software quality they can also increase productivity at many di erent points in the software life cycle The importance of the theme is borne out by the many contributed papers showing how formal methods can make software development more e cient There is an emphasis on tools that nd errors automatically or with relatively little human e ort There is also an emphasis on the use of formal methods to assist with critical labor intensive tasks such as program design and test case generation *International Conference on Applications and Techniques in Cyber Security and Intelligence* Jemal Abawajy,Kim-Kwang Raymond Choo,Rafiqul Islam,2017-10-20 This book presents the outcomes of the 2017 International Conference on Applications and Techniques in Cyber Security and Intelligence which

focused on all aspects of techniques and applications in cyber and electronic security and intelligence research The conference provides a forum for presenting and discussing innovative ideas cutting edge research findings and novel techniques methods and applications on all aspects of cyber and electronic security and intelligence Tests and Proofs Catherine Dubois,2009-06-29 1 This volume contains the research papers and invited papers presented at the Third International Conference on Tests and Proofs TAP 2009 held at ETH Zurich Switzerland during July 2 3 2009 TheTAPconferenceisdevotedtotheconvergenceofproofsandtests Itc bines ideasfromboth sidesforthe advancementofsoftwarequality Toprovethe correctness of a program is to demonstrate through impeccable mathematical techniques that it has no bugs to test a program is to run it with the exp tation of discovering bugs The two techniques seem contradictory if you have proved your program it is fruitless to comb it for bugs and if you are testing it that is surely a sign that you have given up on any hope of proving its corre ness Accordingly proofs and tests have since the onset of software engineering research been pursuedby distinct communities using ratherdi erent techniques and tools And yet the development of both approaches leads to the discovery of common issues and to the realization that each may need the other The emergence of model checking has been one of the rst signs that contradiction may yield to complementarity but in the past few years an increasing number of research e orts have encountered the need for combining proofs and tests dropping earlier dogmatic views of incompatibility and taking instead the best of what each of these software engineering domains has to o er Towards a Service-Based Internet Witold Abramowicz,Ignacio M. Narrating Complexity Richard Walsh,Susan Stepney,2018-10-31 This book stages a dialogue between international researchers from the broad fields of complexity science and narrative studies It presents an edited collection of chapters on aspects of how narrative theory from the humanities may be exploited to understand explain describe and communicate aspects of complex systems such as their emergent properties feedbacks and downwards causation and how ideas from complexity science can inform narrative theory and help explain understand and construct new more complex models of narrative as a cognitive faculty and as a pervasive cultural form in new and old media The book is suitable for academics practitioners and professionals and postgraduates in complex systems narrative theory literary and film studies new media and game studies and science communication Conquering Complexity Mike Hinchey,Lorcan Coyle,2012-01-02 Software has long been perceived as complex at least within Software Engineering circles We have been living in a recognised state of crisis since the first NATO Software Engineering conference in 1968 Time and again we have been proven unable to engineer reliable software as easily cheaply as we imagined Cost overruns and expensive failures are the norm The problem is fundamentally one of complexity software is fundamentally complex because it must be precise Problems that appear to be

specified quite easily in plain language become far more complex when written in a more formal notation such as computer code Comparisons with other engineering disciplines are deceptive One cannot easily increase the factor of safety of software in the same way that one could in building a steel structure for example Software is typically built assuming perfection often without adequate safety nets in case the unthinkable happens In such circumstances it should not be surprising to find out that seemingly minor errors have the potential to cause entire software systems to collapse The goal of this book is to uncover techniques that will aid in overcoming complexity and enable us to produce reliable dependable computer systems that will operate as intended and yet are produced on time in budget and are evolvable both over time and at run time We hope that the contributions in this book will aid in understanding the nature of software complexity and provide guidance for the control or avoidance of complexity in the engineering of complex software systems Formal Methods and Software Engineering Jing Sun,Meng Sun,2018-11-05 This book constitutes the refereed proceedings of the 20th International Conference on Formal Engineering Methods ICFEM 2018 held in Gold Coast QLD Australia in November 2018 The 22 revised full papers presented together with 14 short papers were carefully reviewed and selected from 66 submissions The conference focuses on all areas related to formal engineering methods such as verification network systems type theory theorem proving logic and semantics refinement and transition systems and emerging applications of formal methods

Web Engineering Luciano Baresi,Piero Fraternali,Geert-Jan Houben,2007-08-13 With ever more commerce being done online and the complexity of the world wide web growing every day engineering the web has become a topic of growing contemporary relevance This book constitutes the refereed proceedings of the 7th International Conference on Web Engineering held in Como Italy in July 2007 The 26 revised full papers and 13 revised short papers presented together with 9 demonstration papers 4 industrial papers and 4 papers of the doctoral symposium were carefully reviewed and selected from 172 submissions **Engineering of Complex Computer Systems** Guangdong Bai,Fuyuki Ishikawa,Yamine Ait-Ameur,George A. Papadopoulos,2024-09-28 This book constitutes of the proceedings from the 28th International Conference on Engineering of Complex Computer Systems ICECCS 2024 held in Limassol Cyprus during June 19 21 2024 The 18 full papers and 4 short papers presented here were carefully reviewed and selected from 68 submissions These papers have been categorized into the following sections Machine Learning and Complex Systems Neural Network Verification A I for Software Engineering Smart Contract Formal Methods Security Program Analysis Cyber-Physical System Design from an Architecture Analysis Viewpoint Shin Nakajima,Jean-Pierre Talpin,Masumi Toyoshima,Huafeng Yu,2017-05-10 Providing a wide variety of technologies for ensuring the safety and dependability of cyber physical systems CPS this book offers a comprehensive introduction to the architecture centric modeling analysis and verification of CPS In particular it focuses on model driven engineering methods including architecture description languages virtual prototyping and formal analysis methods CPS are based on a new design paradigm intended to enable emerging software intensive

systems Embedded computers and networks monitor and control the physical processes usually with the help of feedback loops where physical processes affect computations and vice versa The principal challenges in system design lie in this constant interaction of software hardware and physics Developing reliable CPS has become a critical issue for the industry and society because many applications such as transportation power distribution medical equipment and tele medicine are dependent on CPS Safety and security requirements must be ensured by means of powerful validation tools Satisfying such requirements including quality of service implies having formally proven the required properties of the system before it is deployed The book is concerned with internationally standardized modeling languages such as AADL SysML and MARTE As the effectiveness of the technologies is demonstrated with industrial sample cases from the automotive and aerospace sectors links between the methods presented and industrial problems are clearly understandable Each chapter is self contained addressing specific scientific or engineering problems and identifying further issues In closing it includes perspectives on future directions in CPS design from an architecture analysis viewpoint *Nutritional Care of the Patient with Gastrointestinal Disease* Alan L Buchman,2015-08-06 This evidence based book serves as a clinical manual as well as a reference guide for the diagnosis and management of common nutritional issues in relation to gastrointestinal disease Chapters cover nutrition assessment macro and micronutrient absorption malabsorption food allergies prebiotics and dietary fiber probiotics and intestinal microflora nutrition and GI cancer nutritional management of reflux nutrition in IBS and IBD nutrition in acute and chronic pancreatitis enteral nutrition parenteral nutrition medical and endoscopic therapy of obesity surgical therapy of obesity pharmacologic nutrition and nutritional counseling Computer Performance Engineering Alessandro Aldini,Marco Bernardo,Luciano Bononi,Vittorio Cortellessa,2010-09-21 This volume contains the proceedings of the 7th European Performance En neering Workshop EPEW 2010 held in Bertinoro Italy on September 23 24 2010 The purpose of this workshop series is to gather academic and industrial researchers working on all aspects of performance engineering This year the workshop was structured around three main areas system and network p formance engineering software performance engineering and the modeling and evaluation techniques supporting them This edition of the workshop attracted 38 submissions whose authors we wish to thank for their interest in EPEW 2010 After a careful review process during which every paper was refereed by at least three reviewers the Program Committee selected 16 papers for presentation at the workshop We warmly thank all the members of the ProgramCommittee and all the reviewersfor their fair and constructive comments and discussions The workshop program was enriched by two keynote talks given by Marco Roccetti and Ralf Reussner We conclude by expressing our gratitude to all the people who contributed to the organization of EPEW 2010 in particular the sta of the University Residential Center of Bertinoro We are also grateful to the EasyChair team for having allowed us to use their conference system and Springer for the continued editorial support of this workshop series
