

THE PAPER TIGERS

Secondary Fiber Process

The secondary fiber recycling process involves the following steps:

01 | Collection

We collect secondary fiber from sources such as mixed paper, box board cuttings, old newspaper, groundwood fly leaf shavings, books and sorted office paper.

02 | Chopping

Next, we shred the paper and cardboard materials into smaller pieces.

03 | Baling

Baler machines compress the secondary fiber pieces into tight bundles, making them easier to ship.

04 | Resale

After baling the secondary fiber, we send them to paper mills for re-pulping.
