Through Strangers' Eyes Sylvie Romanowski,2005 Considering the stranger as a figure of ambiguity Sylvie Romanowski explains why the genre was so useful to the Enlightenment The question of why showing ambiguous strangers is

important in that period is addressed in the book's introduction by setting the Enlightenment in the historical context of the seventeenth century. Romanowski then examines Montaigne's *Des Cannibales* showing how these first outsiders relate to their eighteenth century successors. She next considers Montesquieu's *Lettres persanes* in its entirety studying the voices of the men, the women and the eunuchs. She also studies other examples of the genre. Jacket

Journeys to the Other Shore
Roxanne L. Euben, 2008-07-01

The contemporary world is increasingly defined by dizzying flows of people and ideas. But while Western travel is associated with a pioneering spirit of discovery, the dominant image of Muslim mobility is the jihadi who travels not to learn but to destroy. *Journeys to the Other Shore* challenges these stereotypes by charting the common ways in which Muslim and Western travelers negotiate the dislocation of travel to unfamiliar and strange worlds. In Roxanne Euben's groundbreaking excursion across cultures, geography, history, genre and genders, travel signifies not only a physical movement across lands and cultures but also an imaginative journey in which wonder about those who live differently makes it possible to see the world differently. In the book we meet not only Herodotus but also Ibn Battuta, the fourteenth century Moroccan traveler. Tocqueville's journeys are set against a five year sojourn in nineteenth century Paris by the Egyptian writer and translator Rifa'a Rafi al-Tahtawi, and Montesquieu's novel *Persian Letters* meets with the memoir of an East African princess, Sayyida Salme. This extraordinary book shows that curiosity about the unknown, the quest to understand foreign cultures, critical distance from one's own world and the desire to remake the foreign into the familiar are not the monopoly of any single civilization or epoch. Euben demonstrates that the fluidity of identities, cultures and borders associated with our postcolonial globalized world has a long history, one shaped not only by Western power but also by an Islamic ethos of travel in search of knowledge.

Journeys to the Other Shore Euben, 2007-09 **Foreign Bodies**
Madeleine Dobie, 2001

Building on the critical foundations established by Edward Said in *Orientalism*, *Foreign Bodies* examines the relationship between the Orientalist tradition in French art and literature and France's colonial history. It focuses on a central dimension of this exchange: the prevalent figure of the oriental woman and the interplay of race and gender in both domestic and colonial history. It also offers a genealogy of contemporary French attitudes to Islamic culture in which beliefs about sexuality and gender relations continue to occupy a privileged place. The author examines the extent to which the rhetorical status and political implications of Orientalism register the changing circumstances of French colonial activity, tracing the convergence or divergence of colonial practice and the literary record. She also argues against the tendency in both historical and theoretical writing on colonialism to divide center from margins, metropolitan from colonial. Instead, she shows how colonial products and ideas permeated the domestic culture and shaped its evolution. Finally, the book proposes that the feminine figures of Orientalist texts are often interwoven with representations of language and more specifically with representations of language as an alien and resistant code, something other than the transparent medium of ideas. It suggests that in promoting awareness that language is not simply the neutral medium of thought and experience

these veiled figures of language function as foreign bodies creating disruptive effects within an economy orchestrated toward the production of knowledge of the other However the book also argues against the view espoused by certain critics that the self reflexivity of Orientalist writing fully counteracts its polarizing political effects arguing instead for a process of double reading that acknowledges both the geopolitical power encoded within Orientalist representation and the ways in which specific texts resist this power
