**The Geopolitical Power Shift in the Indo-Pacific Region** Randall Doyle, 2013-12-11 As the twenty first century progresses the Indo Pacific theater is experiencing an unprecedented transformation involving economic development military build ups political reforms social changes and technological advancements The region now reflects a multitude of geopolitical challenges factors and complicated realities Although America is still recognized as the most powerful force in the Indo Pacific region the challenge to America s hegemonic role is quite real and unrelenting The ongoing global financial crisis has left a changed world with unanswered questions in its wake Is America s post WWII dominance of the Indo Pacific region finally coming to an end Can the United States and China work together to manage the region s hegemonic responsibilities In **The Geopolitical Power Shift in the Indo-Pacific Region** Randall Doyle provides analysis and insights on the transformational changes and the epochal history unfolding in this part of the world and America s increasingly precarious political and economic position

**In a Sunburned Country** Bill Bryson, 2012-05-15 Deliciously funny fact filled and adventurous In a Sunburned Country takes us on a grand tour of Australia It s a place where interesting things happen all the time from a Prime Minister lost yes lost while swimming at sea to Japanese cult members who may entirely unnoticed have set off an atomic bomb on their 500 000 acre property in the great western desert Australia is the only island that is also a continent and the only continent that is also a country Its aboriginal people a remote and mysterious race with a tragic history have made it their home for millennia And despite the fact that it is the most desiccated infertile and climatically aggressive of all inhabited continents it teems with life In fact Australia has more things that can kill you in extremely nasty ways than anywhere else sharks crocodiles the planet s ten most deadly poisonous snakes fluffy yet toxic caterpillars sea shells that actually attack you and the unbelievable box jellyfish don t ask The dangerous riptides of the sea and the sun baked wastes of the outback both lie in wait for the unwary Australia is an immense and fortunate land and it has found in Bill Bryson its perfect guide In a Sunburned Country offers the best of all possible introductions to what may well be the best of all possible nations Even with those jellyfish

**America's Space Sentinels** Jeffrey T. Richelson, 2012-11-20 Originally published in 1999 America s Space Sentinels won the American Astronautical Society s prestigious Eugene Emme Astronautical Literature Award and quickly established itself as the definitive book for understanding a crucial component of our national defense capabilities It focused on the emergence and evolution of the Air Force s Defense Support Program DSP satellite system which came on line in 1970 and continued to perform at a high level through the turn of this century and beyond For this new edition Jeffrey Richelson covers significant developments during the last dozen years relating to the deployment of these satellites especially the struggles to develop and launch the follow on Space Based Infrared System SBIRS beginning in the late 1990s and continuing up to the present The result is a book that remains the first and best source of information regarding these vital programs As Richelson notes SBIRS like its aging but still functioning

predecessor has been designed primarily to provide instant early warning of missile launches from around the globe particularly China Russia North Korea Pakistan India and Iran through the infra red sensors carried on each satellite But the new system beset by hardware software fiscal and political problems has only managed to move forward in fits and starts While it has done so the DSP system has continued to monitor the skies above the earth two key ground stations in Australia and Germany have closed nuclear powers Russia and the United States conferred extensively over the so called Y2K problem concerned that a computer malfunction might produce false alarms of a missile attack and worries over potential launches from nations perceived as hostile to American interests have increased substantially

**The Untouchable Tree** Peter C. Stone,2008-10-17 An artist shares his love of trees with his brilliant paintings and thoughtful words According to Peter Stone any book about trees can't help but be a book about people and so his book is about our connection to the magnificence the transcendence and the essential nature of trees Throughout human history they have served as shelter and as symbol And today more than ever our destiny is tied to theirs The Untouchable Tree is a unique exploration of our relationship with these amazing plants It covers everything from our exploitation of trees for material gain to our unique love of woodlands parks and forests Peter C Stone is an artist in the best sense of the word His paintings and his words remind us of why we love trees and forests and why they are important 30 color illustrations

*The Australian Nexus* Randall Doyle,2018-06-18 In 2018 Australia finds itself at the center of a geopolitical storm within the Indo Pacific region With the meteoric rise of China and the perceived decline of U S influence and power in East Asia Australia is faced with some rather difficult and uncomfortable questions concerning its economic future and its national security Historically Australia has always had a major power as its key ally especially in terms of its national security In 1901 Australia became a self governing nation However Great Britain continued to protect Australia from potential external enemies because Australia remained an important and valued commonwealth nation within the British empire However at the beginning of the Pacific War during WWII Australia reached out to America after the British colony Singapore collapsed in the face of the oncoming and powerful Japanese imperial military forces in February 1942 With the empire of Japan marching southward in the Pacific region Australian prime minister John Curtin anxiously requested in late December 1941 that America come save the nation from being invaded by the Japanese imperial army and naval forces Due to its own strategic needs against Japan the U S agreed to send its military forces to Australia Thus began a geostrategic relationship that has lasted for seventy five years Hence Australia has remained one of America's most reliable allies throughout the post WWII era But at the end of the second decade of the 21st century the geostrategic dynamics of the Indo Pacific have changed dramatically China's unprecedented rise to power economically militarily and diplomatically has forced Australia to reevaluate its policies and position within the East Asian hemisphere And to further complicate Australia's current predicament America itself is experiencing a major political upheaval with the stunning election of Donald Trump as its new president in 2016 Henceforth Australia increasingly

finds itself in uncharted waters geopolitically Australians are confronted with the irrefutable reality that they are living not only in the most pivotal region of the world but one that is in the midst of an historic transformation In essence Australia finds itself at the center of a geostrategic storm      **Strangers, Aliens, Foreigners** Marissa Sonnis-Bell, David E. Bell, Michelle Ryan, 2018-12-24 This book examines the other from experiences of migrants and refugees to terrorist labels to constructions of the local We find that inclusive and exclusive identities are often arbitrarily defined along ambiguous lines yet with tangible and deeply political consequences      *Spymaster* Martin Pearce, 2016-09-01 I cannot think of a better biography of a spy chief Richard Davenport Hines The Spectator Sir Maurice Oldfield was one of the most important British spies of the Cold War era \_\_\_\_\_ A farmer's son from a provincial grammar school who found himself accidentally plunged into the world of espionage Sir Maurice was the first Chief of MI6 who didn't come to the role via the traditional public school and Oxbridge route Oldfield was the voice of British Intelligence in Washington at the time of the Cuban Missile Crisis and the assassination of JFK and was largely responsible for keeping the UK out of the Vietnam War Working his way to the top of the secret service he took on the job of rebuilding confidence in the British Secret Service in the wake of the Philby Burgess and Maclean spy scandals This is the fascinating life story told in detail for the first time of a complex likeable character as well as a formidable intelligence chief      *Writing Australian History On-screen* Jo Parnell, Julie Anne Taddeo, 2023-02-15 Writing Australian History On screen Television and Film Period Dramas Down Under reveals the depths of Australian history from convict times to the present day The essays in this book are thematically driven and take a rounded historical cultural sociological psychological approach in analyzing the various selected productions In their analyses and interpretations of the topic the contributors interrogate the intricacies in Australian history as represented in Australian filmic period drama taken from an Australian perspective Individually and together as a body of authors they highlight past issues that despite the society's changing attitudes over time still have relevance for the Australia of today In speaking to the subject the contributing writers show a keen awareness that addressing new areas arising from the humanities is key to learning and hence to developing an understanding of the Australian culture the society and sense of the ever unfurling flag of an Australian something that is not yet a national identity      *Blood Brothers* B. Lintner, 2016-04-30 From pirates singing Ricky Martin to mob hits carried out with samurai swords Bertil Lintner offers a fascinating look at organized crime in the Asia Pacific Both Western and Asian pundits assert that shady deals are an Asian way of life Some argue that corruption and illicit business ventures gambling prostitution drug trafficking gun running oil smuggling are entrenched parts of the Asian value system Yet many Asian leaders maintain that their cities are safer than Sydney Amsterdam New York and Los Angeles Making use of expertise gained from twenty years of living in Asia Lintner exposes the role crime plays in the countries of the Far East In Blood Brothers he takes you inside the criminal fraternities of Asia examining these networks and their past histories in order to answer one question How are civil societies all over the world to be protected from the worst excesses of

increasingly globalised mobsters      Inside Agitators Hester Eisenstein,1996 Is a woman friendly state possible Can women achieve full social citizenship At a time when backlash against people of color women and the poor is accelerating this account of the experiences of Australian feminists is illuminating Australian feminists succeeded in making women s issues like child care and domestic violence part of the main stream political agenda Inside Agitators is the first full length study of the Australian femocrats published in the United States Hester Eisenstein herself a former femocrat chronicles the efforts of a cohort of women feminist bureaucrats who changed the gender landscape from the initial invitation to enter government by Labor in 1973 to the rise of neo liberalism and the contemporary attack on the public sector Connecting the femocrats to specifically Australian features of political culture and political economy this book analyzes the implicit political theory of the femocrats Eisenstein addresses the issues of strategies for social change class race and racism sexuality and sexual politics gendered experience and accountability to the women s movement This important study explores the possibilities and limits of the contemporary attempt by the women s movement to constitute women as a gender interest and to use state power as an instrument for social change Author note Hester Eisenstein Professor in the Department of American Studies at the State University of New York at Buffalo held posts at both the Office of Equal Opportunity in Public Employment and the Education Department in New South Wales Australia She is the author of several books including Contemporary Feminist Thought

*Australian National Bibliography: 1992* National Library of Australia,1988      **Biomapping Indigenous Peoples**,2012-01-01 Where do our distant ancestors come from and which routes did they travel around the globe as hunter gatherers in prehistoric times Genomics provides a fascinating insight into these questions and unlocks a mass of information carried by strands of DNA in each cell of the human body For Indigenous peoples scientific research of any kind evokes past and not forgotten suffering racial and racist taxonomy and finally dispossession Survival of human cell lines outside the body clashes with traditional beliefs as does the notion that DNA may tell a story different from their own creation story Extracting and analysing DNA is a new science barely a few decades old In the medical field it carries the promise of genetically adapted health care However if this is to be done genetic identity has to be defined first While a narrow genetic definition might be usable by medical science it does not do justice to Indigenous peoples cultural identity and raises the question of governmental benefits where their genetic identity is not strong enough People migrate and intermix and have always done so Genomics trace the genes but not the cultures Cultural survival or revival and Indigenous group cohesion are unrelated to DNA explaining why Indigenous leaders adamantly refuse genetic testing This book deals with the issues surrounding biomapping the Indigenous seen from the viewpoints of discourse analysts historians lawyers anthropologists sociologists museum curators health care specialists and Native researchers      Fighting Evil Haim Gordon,1997-02-28 What can we learn from the novels of Graham Greene This book argues that Greene s writings have much to teach us about fighting evil here and now and about endeavoring to live a worthy life In novels that span half of the twentieth century Greene related

stories of evil persons who destroyed the freedom of others and of a few simple people who fought them Through these stories he showed us three basic truths first evil exists second it is possible to fight it and third one may attain wisdom and sometimes a very limited glory by undertaking such a struggle Gordon s study sets forth its own important lesson thinking and assuming responsibility for the world guided by the reading of great literature are keystones of any worthy life

**Chasing Wrongs and Rights** Elaine Pearson,2022-09-07 The Australia Director at Human Rights Watch shares her experiences defending human rights from human trafficking in Nepal to the drug war in the Philippines to treatment of detainees in Papua New Guinea and in Australia offering an extremely involving personal account of how far we ve come and how far we ve got to go Growing up in Perth Elaine Pearson always dreamt of the wider world Her British father and Singaporean Chinese mother meant that her family extended beyond our shores but it wasn t until later in life that she fully understood how her professional calling might have been influenced by personal history she learned that her beloved maternal grandmother had been sold to an opera troupe as a child to save the family from starvation As soon as she could Elaine followed her interest in women s rights and people trafficking interviewing sex workers and victims of trafficking on the streets of Bangkok and Amsterdam s red light district Her experiences in Nepal and Nigeria profoundly shaped her understanding of how governments and NGOs need to protect the rights of victims as well as how poverty corruption and war drive trafficking in the first place Elaine s story takes us on a panoramic survey of human rights across the world into the UN committee rooms of New York and Geneva as well as to the front lines of Sri Lanka s search for those who disappeared in the country s civil war examining death squad killings on the Philippines island of Mindanao and the detention of asylum seekers in Papua New Guinea And her work on the appalling treatment of prisoners many of whom are Aboriginal vividly demonstrates that human rights abuses are something that happens at home as well as out in that wider world In exploring human rights abuses and governments failure to address them Chasing Wrongs and Rights sometimes shows humanity at its worst Just as often though we see people at their best compassionate resilient determined Deeply informative and inspiring Elaine Pearson s story will leave you understanding how much needs to change and how individuals can make a difference

*Journalism from Print to Platform* Robert Hassan,2024-05-08 Through a synthesis of philosophical anthropology and media theory this book examines the human relationship with technology progressing from analogue to digital to give a new perspective on journalism in the digital age Journalism from Print to Platform takes a fresh look at the relationship between journalism as a craft shaped by its tools and considers anew the tools themselves This book demonstrates that with the emergence of digitality what analogue print culture made possible and seemingly natural has now become unworkable Digital logic constitutes a wholly different category of technology with a framework that makes fidelity in one to one exchange of analogue to digital in communication problematic In short the technology based forms and practices that journalism developed as a fourth estate public sphere enabler are like us irreducibly analog Whilst we have mostly assumed

that these would either adapt to or carry over with the shift to digitality this book challenges that assumption and considers the important consequences of that realisation for the practice of journalism today This challenging study is an insightful resource for students and scholars in journalism media and technology studies **A Secret Country** John Pilger,1993-06-01

**Hidden Agendas** John Pilger,2010-09-02 In this powerful book journalist and film maker John Pilger strips away the layers of deception dissembling language and omission that prevent us from understanding how the world really works From the invisible corners of Tony Blair s Britain to Burma Vietnam Australia South Africa and the illusions of the media age power he argues has its own agenda Unchallenged it operates to protect its interests with a cynical disregard for people shaping and often devastating millions of lives By unravelling the hidden histories of contemporary events Pilger allows us to read between the lines He also celebrates the eloquent defiance and courage of those who resist oppression and give us hope for the future Tenaciously researched and written with passion and wit Hidden Agendas will change the way you see the world

*Quicksand* Hayim Gordon,1995 In this thoroughly researched carefully argued work Haim Gordon explores the existence and employment of what he calls evil as a political tool First he identifies attitudes and deeds that help to sustain a stupid secrecy about evil Second he illustrates how democratic societies Israel among them support and encourage the existence of such practices Finally he suggests ways that individuals and groups can counter this kind of activity Throughout Quicksand Gordon demonstrates his own personal commitment his passion for justice and his rage against the increasingly widespread forms of political evil that can be found in most democracies He understands this book to be one means of inspiring enlightening and empowering those who struggle to retain human values and humane sensibilities in our increasingly violent impersonal world *American Empire and the Fourth World* Anthony J. Hall,2003-11-10 In The American Empire and the

Fourth World Anthony Hall presents a sweeping analysis of encounters between indigenous people and the European empires national governments and global corporations on the moving frontiers of globalization since Columbus discovered America How should we respond to the emergence of the United States as the military commercial and cultural centre of a global empire How can we elaborate a global rule of law based on equality and democracy when the world s most powerful polity acknowledges no higher authority in the international arena than its own domestic priorities For Hall the answer lies in the concept of the Fourth World an inclusive intellectual tent covering a wide range of movements whose leaders seek to implement alternative views of globalization Larger than any earlier political movement the Fourth World embraces basic principles that include the inherent rights of self determination and a more just approach to the crafting and enforcement of international law *The American Empire and the Fourth World* Anthony J. Hall,Tony Hall,2005 In a book that Naomi Klein says could change the world Anthony Hall shows that the globalization debate actually began in 1492
