**Royal Navy Strategy in the Far East 1919-1939** Andrew Field, 2004-05-20 Between the ending of the Great War and the start of the Second World War in 1939 the Royal Navy remained the largest in the world But with the League of Nations seeming to offer a solution to all future conflicts a country weary of war and without an obvious enemy there seemed no need for a large battlefleet The strategic focus shifted eastwards to Japan with its growing battlefleet as the new threat to the British Empire and to the Royal Navy's supremacy From 1924 a strategic plan War Memorandum Eastern was written and refined The plan called for the Royal Navy still the largest in the world even after the Washington Naval Treaties to move eastwards to a defended base at Singapore cut off Japan and force her battlefleet into a decisive fleet battle As a strategy War Memorandum Eastern had many flaws Its real importance lay in the fact that it provided a justification for the Royal Navy to maintain its leading position in the world and to be in the forefront of the development of new tactical thinking Through planning for a war with Japan the Royal Navy was able to test its readiness for a future war Many of the lessons learnt during this period were ultimately put to good use against a different foe in 1939

Naval Coalition Warfare Bruce A. Elleman, S.C.M. Paine, 2007-08-23 This is the first scholarly book examining naval coalition warfare over the past two centuries from a multi-national

perspective. Containing case studies by some of the foremost naval historians from the US, Great Britain and Australia, it also examines the impact of international law on coalitions. Together, these collected essays comprise a comprehensive examination of the most important naval coalitions of the nineteenth and twentieth centuries. Chapters are arranged chronologically, beginning with the Napoleonic Wars and ending with the second Gulf War, and each makes use of new research and methodologies to address the creation of the coalition, its actions, and its short and long term repercussions. The editors draw contemporary lessons from the book's historical case studies. These findings are used to discuss the likelihood and character of future naval coalition, for example, the likelihood and possible outcome of an anti-PRC coalition in defence of Taiwan. Naval Coalition Warfare will be of great interest to students of naval history, strategic studies, international history and international relations in general.

**Seapower** Geoffrey Till, 2013-02-21. This is the third revised and fully updated edition of Geoffrey Till's *Seapower: A Guide for the 21st Century*. The rise of the Chinese and other Asian navies, worsening quarrels over maritime jurisdiction, and the United States maritime pivot towards the Asia Pacific region remind us that the sea has always been central to human development as a source of resources and as a means of transportation, information exchange, and strategic dominion. It has provided the basis for mankind's prosperity and security, and this is even more true in the early 21st century with the emergence of an increasingly globalized world trading system. Navies have always provided a way of policing and sometimes exploiting the system. In contemporary conditions, navies and other forms of maritime power are having to adapt in order to exert the maximum power ashore in the company of others and to expand the range of their interests, activities, and responsibilities. While these new tasks are developing, fast traditional ones still predominate. Deterrence remains the first duty of today's navies, backed up by the need to fight and win, if necessary. How navies and their states balance these two imperatives will tell us a great deal about our future in this increasingly maritime century. This book investigates the consequences of all this for the developing nature, composition, and functions of all the world's significant navies and provides a guide for anyone interested in the changing and crucial role of seapower in the 21st century. *Seapower* is essential reading for all students of naval power, maritime security, and naval history, and highly recommended for students of strategic studies, international security, and International Relations.
