Houk, 2010-01-15 In this book Vivian Houk acknowledges that parenting is really hard work There is no getting around that It just is While many books have been written about all major areas of development she brings light to what may be the least understood and most confusing area of parenting today the spiritual lives of their children Parenting by Developmental Design was written for interested and engaged parents who need affirmation and want to know more about the pathway of spiritual formation for their children For those who don t know how to begin it offers hope and encouragement God has given us some amazing and powerful tools writes Houk which are useful and effective in providing direction for those of us who suffer from the fear of failure or incompetence We have the gift of imagination the use of symbol ritual and celebration and the tools for calming fears and healing wounds And above all the gift of the Holy Spirit You are not alone or incapable Anyone who values the stories of both the adult and child who walk with God will find this book enjoyable engaging and challenging **It Takes a Child to Raise a Parent** Janis Clark Johnston, 2013-04-04 While advice abounds from a variety of sources before parents embark on their parenting journeys the only parent preparation we actually receive comes from our family and peer stories Yet most adults do not realize that in day to day challenges of guiding our children something interesting happens As we steer our children through life we reopen our own childhood roads Just when our child most needs us we become needy ourselves as adults and parents we find that we have unresolved raising issues basic needs that were not met in our childhoods Our needs and memories echo and influence many of the parenting decisions we make even though we re unaware of those influences at times Fortunately children help parents reach their needs as much as their parents help them fulfill their own Our child ends up guiding us by connecting us to some earlier time in our life when we encountered distress We dredge up a lesson and we adapt by adhering to or changing the story that we tell ourselves about who we are We re negotiate the five basic needs that surface from our childhood memories as our youngsters pass through each of the developmental phases The self aware parent focuses on creative problem solving by focusing on one interaction at a time It Takes a Child to Raise a Parent offers an exploration of how our own childhood memories and needs influence and shape our parenting decisions in our adult lives Offering tips stories from a variety of

families and step by step exercises Janis Johnston helps parents better understand and grasp the tools necessary to face parenting challenges head on and to explore new ways of understanding ourselves our children and our family interactions Expectant parents and current parents interested in understanding their own personality development as well as the many moods of childhood and their own children will find clear guidelines for understanding their roles in their children's lives as well as concrete suggestions for how to navigate the choppy waters of raising children **Future Memory** P.M.H.

New Perspectives in Philosophy of Education David Lewin, Alexandre Guilherme, Morgan White, 2014-10-23 *New Perspectives in Philosophy of Education* seeks to build a bridge between philosophical reflection and socio political action by developing a range of critical discussions in the areas of ethics politics and religion This volume brings together established authorities and a new generation of scholars to ask whether philosophy of education can contribute to political and social discourse or whether it is destined to remain the marginal gadfly of

mainstream ideology The philosophy of education stands in danger of becoming a neglected field at precisely the moment we need to be able to reflect upon the increasingly apparent costs of the technocratic attitude to education While many of the educational policy discussions of recent years seem far reaching and radical critical debate surrounding these initiatives remain largely at a populist level New Perspectives in Philosophy of Education provides contemporary responses to philosophical issues that bear upon educational studies policies and practices contributing to the debate on the role of philosophy of education in an increasingly fractured intellectual milieu The Children of Now Meg Blackburn

Losey,2007-01-01 The Children of Now is a groundbreaking work that shows that a large number of kids come into the world bearing inherent gifts that are beyond strange they are telepathic understand subtle energies and or have amazing psychic abilities Many of them remember where they were before they came to Earth and often can describe past lives Many doctors mislabel them as autistic ADD ADHD or suggest other behavioral difficulties More than half the time these doctors are wrong The Children of Now are not defective they are differently functional We are doing ourselves and the world a great disservice by not acknowledging these amazing children and their special gifts A surprising percentage of these children carry within themselves wisdom far beyond most adults The phenomenon is very real and more and more of these highly evolved children enter our world every day The Children of Now offers not only genuine stories of many children who have brought amazing talents into our world but also practical easy solutions to assist society in supporting and nurturing these gifted not defective children and their families rather than labeling segregating and condemning them Fascinating to anyone with an open mind and life illuminating for parents with these incredible kids Dr Meg Blackburn Losey offers detailed answers derived from counseling real kids in real families Global Perspectives on Spirituality and Education Jacqueline Watson,Marian de

Souza,Ann Trousdale,2013-12-04 In recent decades and around the world much attention has been given to the role of spirituality in the education of children and young people While educationalists share many common goals and values in nurturing the spiritual lives of children and young people national and regional cultures religions and politics have impacted on the approaches scholars and practitioners have adopted in their investigations and practices The different contexts across nations and regions mean that educators face quite distinct conditions in which to frame their approaches to spiritual education and research and the nature and impact of these differences is not yet understood This book brings together thinkers from around the globe and sets them the task of explaining how their research on children s spirituality and education has been shaped by the historical cultural religious and political contexts of the geographic region in which they work The book presents contributions in three sections Europe and Israel Australasia and The Americas and concludes with a chapter highlighting what is common and what is contextually unique about global approaches to spirituality and education

The Pursuit of Wisdom and Happiness in Education Sean Steel,2014-05-21 Explores the nature and role of wisdom in education Modern scholarship has struggled to come to terms with the meaning of wisdom and its significance in the field of education This book examines the importance of pursuing wisdom in schools by turning to ancient and medieval sources for clarification concerning the nature of wisdom Sean Steel argues that our current emphasis on the development of rigorous critical analytic thinking skills on assessment and on accountability in education has negatively impacted the ability of schools to foster an environment in which both students and teachers might pursue wisdom Although in recent times efforts have been made to incorporate the pursuit of wisdom into schools through Philosophy for Children P4C and contemplative education programming such initiatives have missed their mark Steel therefore recommends not more accountability in education for the purpose of ensuring global competitiveness but rather the institutional promotion of periods of leisure or scholē in the school day Drawing upon his own experiences as a teacher who has tried to encourage students to search for wisdom the author discusses some of the challenges and pitfalls of wisdom seeking He also offers examples of various wisdom seeking activities that might bear fruit in the classroom
