Sectes Et Da Mocratie:

The New Heretics of France Susan Palmer, 2011-09-30 Since the Age of Enlightenment France has upheld clear constitutional guidelines that protect human rights and religious freedom Today however intolerant attitudes and discriminatory practices towards unconventional faiths have become acceptable and even institutionalized in public life Susan Palmer offers an insightful examination of France's most stigmatized new religions or sectes and the public management of religious and philosophical minorities by the state The New Heretics of France tracks the mounting government sponsored anti cult movement in the wake of the shocking mass suicides of the Solar Temple in 1994 an event that ushered France's most visible religious minorities onto a blacklist of 172 sectes commissioned by the National Assembly Drawing on extensive interviews and field research Palmer describes the controversial histories of well known international New Religious Movements including the Church of Scientology Raelian Movement and Unificationism as well as esoteric local groups Palmer also reveals the partisanship of Catholic priests journalists village mayors and the passive public who support La R publique's efforts to control minority faiths all in the name of Liberty Equality and Fraternity Through historical and sociological theory Palmer analyzes France's war on sectes as a strategic response to social pressures arising from globalization and immigration Her study addresses the impact of these social pressures on traditional cultures and national character as well as important issues of religious freedom and public tolerance , *Democracy and Human Rights in Multicultural Societies* Matthias Koenig, Paul F. A. Guchteneire, 2007 Published in association with UNESCO this volume examines the political governance of cultural diversity Interdisciplinary to comparative social sciences it assesses public policy responses to ethnic linguistic and religious diversity and addresses the conditions forms and consequences of democratic and human rights based governance of multi ethnic multi lingual and multi faith societies New Religions and Globalization Armin Geertz, Margit Warburg, 2008-08-01 Globalization is a predominant theme in contemporary educational and political circles Research on globalization has become a political priority because the world has become a single place as Roland Robertson formulated it where events in any particular part of the world can and often do have political economical and military consequences for the rest of the world Discourse on globalization however has generally ignored the cultural consequences Recent waves of violence that seem to be religiously fueled if not motivated among immigrants and refugees in Europe and their home regions in the Middle East have demonstrated that we can only ignore culture values and religion at our own peril Globalization and new religions is the theme of this book It is argued here that studying new religions in a globalization perspective offers theoretical and methodological advantages both for the general study of religion and the general study of globalization Religions are often cosmopolitan and universal in their overall message yet they may at the same time be utterly immersed in local interactions This is often clearly expressed among minority religions The contrast of the local and the global is accentuated by globalization and in particular many new religions have followed suit This book

draws together a selection of top quality papers given at a conference held in Aarhus in 2002 under the auspices of the Research Network on New Religions RENNER The papers which have been edited and up dated represent the work of leading scholars in the history of religions sociology of religion psychology of religion and other disciplines They address questions that are vital for everyone in the modern world whether approached as a reflection of world economy and power dynamics new possibilities of communication and cultural exchange in the light of mass media and technology increased cultural plurality in the wake of migration or as a combination of any of these globalization challenges the academic study of religion to renewed theoretical and methodological reflection

the Catholic church However the religious disaffiliation of a significant proportion of the French strengthened state secularism which gradually became more consensual despite some persisting tensions in the school context Yet in the last decades several factors have revived public debate on laicity the quarrel over sects and new religious movements controversies over Islam today the second largest religion in France and more recently dispute over bioethics Faced with these challenges laicity as well as the religious groups involved have been changing The authors of this book ranking amongst the best French experts in the study of religion and secularism introduce the reader to a living and lived laicity influenced by the social and religious dynamics of contemporary France They demonstrate that the configurations of French secularism are both more flexible and complex than they appear to be The volume investigates the extent to which the French idea of secularization has been pushed to be more thorough and radical in its interaction with its other European counterparts A key work on French political thought this volume will be of great interest to scholars and researchers of international politics political philosophy political sociology and religion and politics
