Challenges to the Enlightenment Academy of Humanism, Academy of Humanism Staff, 2010-10-05 The Enlightenment was an intellectual movement which began in seventeenth century Europe and espoused an optimistic project an end to human ignorance and the slavish adherence to ancient texts and dogma the application of scientific principles to solving the world's problems the elimination of inequality between the sexes and the advocacy of political rights for all citizens Modern western society with its democratic institutions

and its reliance on science as the basis of technology and industry is largely an outgrowth of Enlightenment ideals Yet today the entire Enlightenment agenda is being challenged not only by members of the religious orthodoxy but also by a group of academics loosely described under the label of postmodernism Whereas the Enlightenment project has always been at odds with religious orthodoxy which has traditionally been suspicious of efforts to achieve human progress without supernatural support today it must deal with a very different type of attack from postmodernist intellectuals Critics of this school question the very ability of human reason to grasp objective reality and they raise serious objections to the reliability and efficiency of the scientific method and the tyranny of democratic elites Is the Enlightenment project still worth pursuing The distinguished members of the Academy of Humanism who have contributed to this important collection of essays are united in their conviction that the ideals of the Enlightenment must be preserved Editors Paul Kurtz and Timothy J Madigan have grouped the diverse perspectives represented in this volume into three major sections dealing with philosophical issues scientific issues and social issues These cogently argued and vigorous responses to traditional and postmodernist criticisms of the Enlightenment make it clear that reason science and the political and social ideals of the Enlightenment are indispensable for the welfare and future of our planet

Secondary Education University of Pittsburgh Johnstown Chair NCSS Issues Centered Education Community Challenging the New Atheism Aaron Shepherd, 2020-08-31 This book presents a pragmatic response to arguments against religion made by the New Atheism movement. The author argues that analytic and empirical philosophies of religion, the mainstream approaches in contemporary philosophy of religion, are methodologically unequipped to address the Threefold Challenge made by popular New Atheist thinkers such as Richard Dawkins, Sam Harris, Christopher Hitchens, and Daniel Dennett. The book has three primary motivations. First, it provides an interpretation of the New Atheist movement that treats their claims as philosophical arguments and not just rhetorical exercises or demagoguery. Second, it assesses and responds to these claims by elaborating four distinct contemporary philosophical perspectives: analytic philosophy, empirical philosophy, continental philosophy, and pragmatism, as well as contextualizing these perspectives in the history of the philosophy of religion. Finally, the book offers a metaphilosophical critique, returning again and again to the question of method. In the end, the author settles upon a modified version of pragmatism that he concludes is best suited for articulating the terms and stakes of the God Debate. Challenging the New Atheism will be of interest to scholars and students of American philosophy and philosophy of religion.
