Sacred and Secular Pippa Norris, Ronald Inglehart, 2011-10-17 This book develops a theory of existential security It demonstrates that the publics of virtually all advanced industrial societies have been moving toward more secular orientations during the past half century but also that the world as a whole now has more people with traditional religious views than ever before This second edition expands the theory and provides new and updated evidence from a broad perspective and in a wide range of countries This confirms that religiosity persists most strongly among vulnerable populations especially in poorer nations and in failed states Conversely a systematic erosion of religious practices values and beliefs has occurred among the more prosperous strata in rich nations

Social Identities Between the Sacred and the Secular Abby Day, 2013 Focusing on the important relationship between the sacred and the secular this book demonstrates that it is not paradoxical to think in terms of both secular and sacred or neither in different times and places International experts from a range of disciplinary perspectives draw on local national and international contexts to provide a fresh analytical approach to understanding these two contested poles Social Identities between the Sacred and the Secular provides an essential resource for continued research into these concepts challenging us to re think where the boundaries of sacred and secular lie and what may lie between

Edward Said's Rhetoric of the Secular Mathieu E. Courville, 2011-10-20 Edward Said's Rhetoric of the Secular provides an important new reading of Edward W Said's work emphasizing not only the distinction but also the fuzzy borders between representations of the religious and the secular found within and throughout his oeuvre and at the core of some of his most customary rhetorical strategies Mathieu Courville begins by examining Said's own reflections on his life before moving on to key debates about Said's work within Religious Studies and Middle Eastern Studies and his relationship to French critical theorists Through close attention to Said's use of the literal and the figurative when dealing with religious national and cultural matters Courville discerns a pattern that illuminates what Said means by secular Said's work shows that the secular is not the utter opposite of religion in the modern globalized world but may exist in a productive tension with it

and highly regarded contemporary theologians Draws on a sweep of ideas and thinkers to argue that modern secularism is a form of Christian heresy that developed from the Middle Ages and can only be overcome by a renewed account of Christendom Shows how this heresy can be transformed into a richer blend of religion, modernity and politics Reveals how there is a fundamental homology between modern ideas about ontology and knowledge and modern ideas about political action expressed in both theory and practice **Religion and International Relations Theory** Jack L. Snyder, 2011

Annotation Through models that integrate religion into the study of international politics the essays in this collection offer a guide to updating the field *Radical Secularization?* Stijn Latré, Walter Van Herck, Guido Vanheeswijck, 2014-12-18 What does it mean for a society to be secular Answering this question from a philosophical angle Radical Secularization delves into the philosophical presuppositions of secularization Which cultural evolutions made secularization possible International scholars from different disciplines assess the answers given by many leading philosophers such as among others L with Blumenberg and Habermas Germany Gauchet and Nancy France Taylor and Bellah North America They examine the theory that secularization cannot only be regarded as a cultural change that was forced upon religion from an external source e.g. science but should also be considered as a phenomenon triggered by motives internal to religion If religions are indeed capable of inner transformations the question arises whether religions can persist in the secular societies they inadvertently helped to bring about and how secular societies may accommodate religion **Religion in International Relations**

Theory Nukhet Sandal, Jonathan Fox, 2013-06-19 There is a growing realization among international relations scholars and practitioners that religion is a critical factor in global politics The Iranian Revolution the September 11 attacks the ethno-religious conflicts such as the ones in the former Yugoslavia and Sri Lanka are among the many reasons for this increased focus on religion in international affairs The rise of religious political parties across the world ranging from the Christian Democrats in Europe to Bharatiya Janata Party in India similarly illustrated religion's heightened international profile Despite all this attention it is challenging to situate religion within a discipline which has been dominantly secular from its inception Only a few existent works have ventured to integrate religion into core international relations theories such as Classical Realism Neorealism Neoliberalism Constructivism and the English school This work is the first systematic attempt to comparatively assess the place of religion in the aforementioned theoretical strands of international relations with contemporary examples from around the world Written in an accessible and systematic fashion this book will be an important addition to the fields of both religion and international relations Nukhet A Sandal is Assistant Professor in the Political Science Department at Ohio University Jonathan Fox is Professor in the Department of Political Studies at Bar Ilan University Israel Cultural Approaches to Studying Religion M. Theology and Social Theory John Milbank, 2008-04-15 This is a revised edition of John Milbank's masterpiece which sketches the outline of a specifically theological social theory The Times Higher Education Supplement wrote of the first edition that it was a tour de force of systematic theology It would be churlish not to acknowledge its provocation and brilliance Featured in The Church Times 100 Best Christian Books Brings this classic work up to date by reviewing the development of modern social thought Features a substantial new introduction by Milbank clarifying the theoretical basis for his work Challenges the notion that sociological critiques of theology are scientific Outlines a specifically theological social theory and in doing so engages with a wide range of thinkers from Plato to Deleuze Written by one of the world's most influential contemporary theologians and the author of numerous books

Global Religious and Secular Dynamics José Casanova, 2019-08-12 Global Religious and Secular Dynamics offers a global historical perspective that integrates European theories of modern secularization and competing theories of global religious revival as interrelated dynamics In the first section Casanova examines the emergence of the modern religious secular binary system of classification within a critical review of mile Durkheim's and Max Weber's divergent theories of religion The modern system of classification is contrasted with the pre axial one in which all reality was organized according to the binary sacred profane and with the post axial one which was organized according to the binary transcendent immanent The second and third sections contrast the internal European road of secularization without religious pluralization with the external colonial road of global intercultural and religious encounters particularly in Asia that led to the global system of religious pluralism The final section examines the contemporary intertwinement of religious and secular dynamics through the globalization of the immanent frame and the expansion of global denominationalism

Sacred and Secular Pippa Norris, 2004 The belief that religion was dying became the conventional wisdom in the social sciences during most of the 20th

century However religion has not disappeared and is unlikely to do so and the secularization thesis needs updating This text develops a theory of secularization and existential security
