Benny Moerdani, 1994 **Asia-Pacific Security** Joanne Wallis, Andrew Carr, 2016-10-01 This new textbook gathers an international roster of top security studies scholars to provide an overview of Asia Pacific's international relations and pressing contemporary security issues It is a suitable introduction for undergraduate and masters students use in international relations and security studies courses Merging a strong theoretical component with rich contemporary and historical empirical examples Asia Pacific Security examines the region's key players and challenges as well as a spectrum of proposed solutions for improving regional stability Major topics include in depth looks at the United States relationship with China Security concerns presented by small and microstates the region's largest group of nations threats posed by terrorism and insurgency the region's accelerating arms race and the potential for an Asian war the possible roles of multilateralism security communities and human security as part of solutions to regional problems **The Security Environment of the Asia Pacific Region at the Beginning of the 21st Century and Japan's New Security Strategy** Koichiro Bansho, 2000 After the end of the Cold War a great number of changes occurred in the Asia Pacific region not only politically and economically but also within the security environment In some ways the end of the Cold War has not been as kind to the Asia Pacific region as it was to most of Europe However it is obviously moving towards a new dimension For Japan's security strategy to cope with those changes long range planning and more drastic changes are needed This paper will evaluate strategic changes in the coming new century and to discuss effective measures to facilitate the peace and stability stressing the significance of the Japan U S security relationship and a possible security framework for the region Finally I will discuss Japan's new security strategy its basic concepts and the role of the Japan's Self Defense Forces The Security Environment of the Asia Pacific Region at the Beginning of the 21st Century and Japan's New Security Strategy Koichiro Bansho, Army War College (U.S.), 2000 **Comprehensive Security in Asia**, 2000-04-27 The term comprehensive security was first used by the late Japanese prime minister Ohira but the concept as such can be traced back to Japanese thinking on security during the fifties Its meaning goes far beyond requirements of military defence against a particular enemy and stresses the need to take into account other aspects vital to national stability food energy environment communication and social security While not denying the importance of military security it explicitly encompasses a wide range of other aspects

the search for environmental security for instance which requires cooperation with other countries including hypothetical enemies The concept stresses the need for confidence building methods as a requirement for its attainment and pertains to issues such as preventive diplomacy energy security second order cybernetics greater transparency of international financial markets as means to enhance overall stability It is a notion that goes beyond simplifications such as us and them Since the word has been first coined in Japan it has caught on in other Asian countries as well It has become clear that the concept is particularly suited for a continent where large and powerful countries such as China Korea Japan and Indonesia are unlikely to enter into close cooperation along the model of the European Union In short in this volume a team of scholars from Asia Europe and the United States provide clear analyses of issues vital to Asian politics an important contribution to one of the key issues of contemporary Asian politics

The Transformation of Security in the Asia/Pacific Region Desmond Ball, 2013-10-14 The security architecture of the Asia Pacific region is in a profound transformation Such changes are not without problems which are discussed here

Australian Security After 9/11 Derek McDougall, 2020-07-24 Debates on security became more intense following the unanticipated end of the Cold War conflict and took on added force after the terrorist attacks on the US on September 11 2001 Generally viewed as a part of the wider West despite its separation by enormous geographical distances from both Europe and the United States Australia is a regional power in its own right It has been an active and loyal member of the US led coalitions of the willing first in Afghanistan and then in Iraq The terrorist attacks in Bali one year after the attacks in the United States brought home to Australia the direct nature of the new global terrorist threats to its own security This volume brings together leading experts on international security and Australia s foreign and security policies in a critical examination of Australia s adaptations to the new security challenges It is the first in depth and comprehensive analysis of Australia s defence and security policies as well as the country s role in countering regional and global challenges to international security since the war on terrorism began

The Security Environment in the Asia-Pacific Sanu Kainikara, RAAF Air Power Development Centre, 2012 Post 2008 the international community has once again experienced a period of heightened volatility with a number of nations struggling to contain the fall out of the global financial crisis Although comparatively less affected than some European nations the Asia Pacific also is witnessing a certain amount of instability Australia as a trading nation is not immune to these changes The undeniable fact is that the security environment in the Asia Pacific will be impacted by the economic stability or otherwise of its constituent nations Australia s security and prosperity is underwritten by its economic stability and its ability to develop its trade and commerce further This can only be ensured through making its trade routes especially the sea lanes through which its trade flourishes safe and open In other words Australia s continued security is dependent on the safety and security of the ocean commons It is therefore not surprising that Australia s defence strategy has always been built on a national maritime strategy whether articulated in so many words or not This paper examines Australia s strategic interests and outlook from a strategic

perspective and puts forward some views on its security perceptions In contextualising Australia's maritime strategy within the ongoing developments in the Asia Pacific region this paper serves a useful purpose P iv

The Economy-security Nexus in Northeast Asia T. J.
