Security and Privacy in the Age of Ubiquitous Computing Ryoichi Sasaki, Eiji Okamoto, Hiroshi Yoshiura, 2010-06-03

Even in the age of ubiquitous computing the importance of the Internet will not change and we still need to solve conventional security issues In addition we need to deal with new issues such as security in the P2P environment privacy issues in the use of smart cards and RFID systems Security and Privacy in the Age of Ubiquitous Computing addresses these issues and more by exploring a wide scope of topics The volume presents a selection of papers from the proceedings of the 20th IFIP International Information Security Conference held from May 30 to June 1 2005 in Chiba Japan Topics covered include cryptography applications authentication privacy and anonymity DRM and content security computer forensics Internet and web security security in sensor networks intrusion detection commercial and industrial security authorization and access control information warfare and critical protection infrastructure These papers represent the most current research in information security including research funded in part by DARPA and the National Science Foundation

Encyclopedia of Cryptography, Security and Privacy Sushil Jajodia, Pierangela Samarati, Moti Yung, 2005-01-10 A rich stream of papers and many good books have been written on cryptography security and privacy but most of them assume a scholarly reader who has the time to start at the beginning and work his way through the entire text The goal of Encyclopedia of Cryptography Security and Privacy Third Edition is to make important notions of cryptography security and privacy accessible to readers who have an interest in a particular concept related to these areas but who lack the time to study one of the many books in these areas The third edition is intended as a replacement of Encyclopedia of Cryptography and Security Second Edition that was edited by Henk van Tilborg and Sushil Jajodia and published by Springer in 2011 The goal of the third edition is to enhance on the earlier edition in several important and interesting ways First entries in the second edition have been updated when needed to keep pace with the advancement of state of the art Second as noticeable already from the title of the encyclopedia coverage has been expanded with special emphasis to the area of privacy Third considering the fast pace at which information and communication technology is evolving and has evolved drastically since the last edition entries have been expanded to provide comprehensive view and include coverage of several newer topics

Computer Security John S. Potts, 2002 We live in a wired society with computers containing and passing around vital information on both personal and public matters Keeping this data safe is of paramount concern to all Yet not a day seems able to pass without some new threat to our computers Unfortunately the march of technology has given us the benefits of computers and electronic tools while also opening us to unforeseen dangers Identity theft electronic spying and the like are now standard worries In the effort to defend both personal privacy and crucial databases computer security has become a key industry A vast array of companies devoted to defending computers from hackers and viruses have cropped up Research and academic institutions devote a considerable amount of time and effort to the study of information systems and computer security Anyone with access to a computer needs to be aware of the developing trends and growth of computer security To that end this book presents a comprehensive and carefully selected bibliography of the literature most relevant to

understanding computer security Following the bibliography section continued access is provided via author title and subject indexes With such a format this book serves as an important guide and reference tool in the defence of our computerised culture

security Drawing on critical literature in international relations security studies political theory and social theory this is the first book that describes how these visions of future cyber security are sustained in the communities that articulate them Specifically it shows that conceptions of time and temporality are foundational to the politics of cyber security It explores how cyber security communities understand the past present and future thereby shaping cyber security as a political practice Integrating a wide range of conceptual and empirical resources this innovative book provides insight for scholars practitioners and policymakers

Security Management, Integrity, and Internal Control in Information Systems

Steve Furnell,Paul Dowland,Bhavani Thuraisingham,X. Sean Wang,2006-06-03 This is the first joint working conference between the IFIP Working Groups 11 1 and 11 5 We hope this joint conference will promote collaboration among researchers who focus on the security management issues and those who are interested in integrity and control of information systems Indeed as management at any level may be increasingly held answerable for the reliable and secure operation of the information systems and services in their respective organizations in the same manner as they are for financial aspects of the enterprise there is an increasing need for ensuring proper standards of integrity and control in information systems in order to ensure that data software and ultimately the business processes are complete adequate and valid for intended functionality and expectations of the owner i e the user organization As organizers we would like to thank the members of the international program committee for their review work during the paper selection process We would also like to thank the authors of the invited papers who added valuable contribution to this first joint working conference Paul Dowland X Sean Wang December 2005 Contents Preface vii Session 1 Security Standards Information Security Standards Adoption Drivers Invited Paper 1 JEAN NOEL EZINGEARD AND DAVID BIRCHALL Data Quality Dimensions for Information Systems Security A Theoretical Exposition Invited Paper 21 GURVIRENDER TEJAY GURPREET DHILLON AND AMITA GOYAL CHIN From XML to RDF Syntax Semantics Security and Integrity Invited Paper 41 C FARKAS V GowADiA A JAIN AND D
