Security The Middle East:

The Future Security Environment in the Middle East Nora Bensahel, Daniel Byman, 2004-03-12 This report identifies several important trends that are shaping regional security It examines traditional security concerns such as energy security and the proliferation of weapons of mass destruction as well as newer challenges posed by political reform economic reform civil military relations leadership change and the information revolution The report concludes by identifying the implications of these trends for U S foreign policy Regional Security in the Middle East , **Security and Insecurity in the Middle East** Imad El-Anis, Sahra Joharchi, Natasha Underhill, 2018-10-09 This volume draws together a number of research papers presented at a conference titled Security Insecurity and Prospects for Peace in the Middle East and North Africa organised by Nottingham Trent University s Middle East and North Africa Research cluster in April 2016 The conference focused on questions pertinent to what may be termed the post Arab Spring era in which the Middle East is experiencing unprecedented national and transnational challenges Conflict instability radicalisation and the mass displacement of people have become increasingly salient features of the political and economic landscape of the region The contributions here analyse a range of political economic security and socio cultural issues that the authors argue lie at the heart of the instability that the region is currently experiencing Re thinking issues of security and insecurity in the Middle East not only allows us to explain what might have led to current instability but also allows us to posit possible solutions to these security issues In doing so this book goes beyond the concepts of security and insecurity as a standard account of perpetrator versus victim in a state centric and violence centric manner to a broader and more complex understanding of the underlying processes informing security and insecurity in the region The contributors include scholars from around the world working in a variety of different fields including Middle Eastern studies international relations and international political economy providing an eclectic discussion of the state of the region **Building Regional Security in the Middle East** Emily B. Landau, Tamar Malz, Zeev Maoz, 2004-11-23 Discussions on regional security were initiated in the Middle East in 1992 as part of the Middle East peace process The collapse of the Oslo process and other regional developments in the latter half of the 1990s have diminished hopes that the initial gains made in this direction might further develop as violence has again become the primary mode of effecting political changes in the region On the backdrop of this somewhat dismal current reality in the Middle East the rationale for this volume is that research into regional security structures should nevertheless be pursued When looking at the long term process of creating regional security setbacks are not unlikely The articles that make up this collection focus on the problems that have been encountered and possible directions for getting regional efforts back on track A special issue of the Journal of Strategic Studies Human Security in the Middle East and North Africa Alaa Al-Din Arafat, 2024-12-20 This book analyzes major human security threats in the MENA region including food water energy climate and health security It also examines sectarian conflict terrorism and poverty in the region The author highlights the relationship

between human security concerns and conventional or military security threats He demonstrates how MENA nations failed to respond to the region's human security threats and to develop a human security formula and regional security architecture that included both human and conventional security threats Therefore this book concludes that the MENA region's future will be determined by its governments ability to address human security threats **Regional Security in the Middle East**
