German Cinema to his formative years as a student and production assistant in France and to his roots in the Weimar cinema's tradition. It reveals how Schlöndorff entered into the German film production system in the 1960s, how he came to rely on German public television in the 1970s and then moved to the international and American financing in the 1980s, attempting to redevelop the Babelsberg studios in a 1990s post-Wall Germany while continuing to make his own films into the 21st century. The book captures how Schlöndorff's nearly half-century of ongoing creativity and productivity ties together. The authors analyze the artistry of each Schlöndorff movie, arguing that his output as a whole embodies a provocative and sometimes contradictory set of balances. Schlöndorff combines commercial interest with significant artistic ambition, blends the kinesthetic pleasures of moving images with the seriousness of fine literature, links the intensity of individualized personal experience to an awareness of broader political issues, and represents a specifically German sensibility even as he reaches out to the international audiences. The authors demonstrate the cyclical recurrence in his cinema of certain themes: individual and collective rebellion, fascist suppression, masochistic love, narrative patterns, the Western, the thriller, the subjective mood piece, and stylistic approaches. Brechtian *Verfremdung*, the creation of careful leitmotif structures, the use of the grotesque. In over thirty years of filmmaking, Schlöndorff has produced a remarkable unified body of work that deserves the attention of a book-length study. Authors Hans Bernhard Moeller and George Lellis offer the first such study of its kind.

The essays contained in this volume address some of the most visible, durable, and influential of African American musical styles as they developed from the mid-1960s into the 21st century. Soul, funk, pop, R&B, and hip-hop practices are explored both singly and in their many convergences, and in writings that have often become regarded as landmarks in black musical scholarship. These works employ a wide range of methodologies, and taken together they show the themes and concerns of academic black musical study developing over three decades. While much of the writing here is focused on music and musicians in the United States, the book also documents important and emergent trends in the study of these styles as they have spread across the world. The volume maintains the original publication format and pagination of each essay, making for easy and accurate cross-reference and citation. Tom Perchard's introduction gives a

detailed overview of the book's contents and of the field as a whole situating the present essays in a longer and wider tradition of African American music studies In bringing together and contextualising works that are always valuable but sometimes difficult to access the volume forms an excellent introductory resource for university music students and researchers
