Community Biodiversity Management Walter Simon de Boef, Abishkar Subedi, Nivaldo Peroni, Marja Thijssen, Elizabeth O'Keeffe, 2013-03-12 The conservation and sustainable use of biodiversity are issues that have been high on the policy agenda since the first Earth Summit in Rio in 1992 As part of efforts to implement in situ conservation a methodology referred to as community biodiversity management CBM has been developed by those engaged in this arena CBM contributes to the empowerment of farming communities to manage their biological resources and make informed decisions on the conservation and use of agrobiodiversity This book is the first to set out a clear overview of CBM as a methodology for meeting socio environmental changes CBM is shown to be a key strategy that promotes community resilience and contributes to the conservation of plant genetic resources The authors present the

underlying concepts and theories of CBM as well as its methodology and practices and introduce case studies primarily from Brazil Ethiopia France India and Nepal Contributors include farmers leaders of farmers organizations professionals from conservation and development organizations students and scientists The book offers inspiration to all those involved in the conservation and use of agrobiodiversity within livelihood development and presents ideas for the implementation of farmers rights The wide collection of experiences illustrates the efforts made by communities throughout the world to cope with change while using diversity and engaging in learning processes It links these grassroots efforts with debates in policy arenas as a means to respond to the unpredictable changes such as climate change that communities face in sustaining their livelihoods The Wealth of India ,1959 **Seed World** ,1929 Saving More Than Seeds Catherine Phillips,2016-04-01 *Saving More Than Seeds* advances understandings of seed people relations with particular focus on seed saving The practice of reusing and exchanging seeds provides foundation for food production and allows humans and seed to adapt together in dynamic socionatural conditions But the practice and its practitioners are easily taken for granted even as they are threatened by neoliberalisation Combining original ethnographic research with investigation of an evolving corporate seed order this book reveals seed saving not only as it occurs in fields and gardens but also as it associates with genebanking genetic engineering intellectual property rights and agrifood regulations Drawing on diverse social sciences literatures Phillips illustrates ongoing practices of thinking feeling and acting with seeds raising questions about what seed people relations should accomplish and how different ways of relating might be pursued to change collective futures *New Seeds and Poor People* Michael Lipton,Richard Longhurst,2010-11-29 First published in 1989 this book deals with the impact of cereal production upon the Third World specifically Modern Varieties MVs Using evidence from plant breeding economics and nutrition science the authors seek to pinpoint what has been achieved what has gone wrong and what needs to be done in future Although the technical innovations of MVs mean more employment cheaper food and less risk for small farmers the reduction in crop diversity increases the risk of danger from pests and though MVs enlarge cereal stocks many are too poor to afford them The book concludes that technical breakthroughs alone won't solve deep rooted social problems and that only new policies and research priorities will increase the choices assets and power of the rural poor **The Garden** ,2003
