Communication in the Presidential Primaries Kathleen E. Kendall, 2000-01-30
 In a comparison of communication in the U.S. presidential primaries of the twentieth century Kendall examines the role of the candidates and the media during the period of primary elections. Drawing upon information from a broad array of sources Kendall uncovers communication patterns that transcend time regarding political image, horse race coverage and negative campaigning. She takes a strong communication perspective arguing that the verbal context of the presidential primaries is an important factor overlooked in traditional studies. Topics covered include the effect of party rules on communication, the role of speeches and debates, the role of political advertising and the media's construction of the primaries in the pre-television era and the age of television. Kendall examines the 1996 primaries in light of patterns discovered in earlier years and she makes predictions and recommendations regarding the 2000 primaries. With its century-wide scope and the variety of research methods used, the book will be of considerable value to researchers, scholars, journalists and students involved with political communication and American presidential elections.

Social Emotions and Their Influences Huiyan Lin, Giorgio Coricelli, Chunliang Feng, Siyang Luo, Steven Young, 2023-06-06
 The common dimensional model of emotion has emphasized that emotional information is generally processed from two dimensions: valence from negative to positive and arousal from low to high. Recently, several theories have proposed that emotions also vary along a sociality dimension ranging from non-social emotions (i.e. basic biological drives) to social emotions (i.e. complex social interactions). Specifically, non-social emotions (e.g. fear) are derived from incentives or aversive emotions that have direct physiological relevance, whereas social emotions (e.g. guilt) are elicited within the context of social information processing or social cognition. Multiple empirical studies have investigated the processing of non-social emotions and the influences of these emotions on other cognitive processes. However, questions regarding social emotion processes and their influences are still open. For example, little is known about psychological and neural mechanisms underlying different social emotions, processes (e.g. guilt, shame, love, envy and pride), the development and individual differences of social emotions, or the influences of social emotions on social behaviors and decision making. Therefore, this Research Topic aims to gain a deeper understanding of how different social emotions are processed among different populations and how these social emotions influence other cognitive processes. We aim to have a collection of studies which extend the theoretical, technical and empirical knowledge about psychological and neural mechanisms underlying social emotions, processes as well as the influences of these processes on other cognitive processes, in particular on social decision making. We encourage studies from different domains (e.g. emotion, behavioural economics and decision making) implemented by different techniques (e.g. behaviour, electrophysiology, neuroimaging and brain stimulations) among different populations (e.g. healthy adults, children and elderly persons) with psychological traits and personalities and psychiatric patients.

for Hire Dennis W. Johnson, 2017 This book is a history of political consulting in America examining how the consulting business developed highlighting the major figures in the consulting industry and assessing the impact of professional consulting on elections and American democracy A key focus is on presidential elections beginning in 1964 and the important role played by consultants and political operatives

Truth in Advertising? Barbara Allen, Daniel Stevens, 2018-10-18 This book represents the first systematic effort to examine 1 the factual accuracy of the claims made in an entire political advertising campaign 2 the visuals and sound cues used in that advertising and their relationship with the tone and accuracy of ads and 3 the impact of the accuracy of claims on what people know and how they vote in a real campaign The research is based on several years of labor intensive coding of the factual accuracy of every claim made in the presidential ads in the 2008 election as well as the ads for the races for the US Congress in Minnesota We show how the accuracy of political ad claims the visuals and sound of ads and ad tone particularly negativity are related to voting behavior We argue that understanding how the accuracy of political ad claims affects voters is now more important than ever This research has steered clear of the normative question of what such putative gains in knowledge represent however Does the content of negative advertising enhance voter capacities such as the ability to locate candidates issue positions accurately or state reasons to like or dislike candidates based on accurate information about the candidates traits or issue stands Does the accuracy of the information in political advertising matter to voting behavior or vote choice whether turnout goes up or down Would voting more while knowing less that is true be sufficient in a democracy In studying the effects of advertising tone such questions about advertising tone have not been asked Our book redresses this lacuna We show that negative advertising is more likely to make inaccurate claims We show that ads making inaccurate claims also use a larger number of visual and sound distortions perhaps tying up more cognitive capacities while pressing their untruthful arguments We show links between inaccurate advertising and aggregate turnout individual turnout and individual political knowledge The news is not good in an age of post factual democracies

Johnson* Benjamin W. Quail, 2022-01-01 This book looks broadly at how the contentious relationships between the media and US President Lyndon B Johnson affected the national consciousness during the turbulent period of his leadership Johnson had to deal with a particularly difficult and divisive period in American history and his relationship with the press undoubtedly contributed to an atmosphere of friction within the United States A more specific purpose of this research monograph is ultimately to shine a light on the trials and tribulations that Johnson faced as a president dealing with new forms of communication in the 1960s It aims to show the difficulties that he had in adapting a very personal style of leadership which had served him well in the Senate in the role he undertook as leader of a nation Further to this it builds on this foundation to argue that Johnson developed a reactive passive stance to dealing with the media one that ultimately contributed to a loss in popularity and status as leader a blow he never recovered from during his time in office **Break It Up** Richard Kreitner, 2020-08-18 From journalist and historian Richard Kreitner a powerful revisionist account of the most persistent idea in American history these supposedly United States should be broken up Eric Foner The novel and fiery thesis of Break It Up is simple The United States has never lived up to its name and never will The disunionist impulse may have found its greatest expression in the Civil War but as Break It Up shows the seduction of secession wasn't limited to the South or the nineteenth century It was there at our founding and has never gone away With a scholar's command and a journalist's curiosity Richard Kreitner takes readers on a revolutionary journey through American history revealing the power and persistence of disunion movements in every era and region Each New England town after Plymouth was a secession from another the thirteen colonies viewed their Union as a means to the end of securing independence not an end in itself George Washington feared separatism west of the Alleghenies Aaron Burr schemed to set up a new empire John Quincy Adams brought a Massachusetts town's petition for dissolving the United States to the floor of Congress and abolitionist William Lloyd Garrison denounced the Constitution as a pro slavery pact with the devil From the cold civil war that pits partisans against one another to the modern secession movements in California and Texas the divisions that threaten to tear America apart today have centuries old roots in the earliest days of our Republic Richly researched and persuasively argued Break It Up will help readers make fresh sense of our fractured age *The International Encyclopedia of Political Communication*, 3
