States United States. Superintendent of Documents,1896 **Museum Informatics** Paul F. Marty,Katherine
Jones,2012-07-26 Museum Informatics explores the sociotechnical issues that arise when people information and technology
interact in museums It is designed specifically to address the many challenges faced by museums museum professionals and
museum visitors in the information society It examines not only applications of new technologies in museums but how
advances in information science and technology have changed the very nature of museums both what it is to work in one and
what it is to visit one To explore these issues Museum Informatics offers a selection of contributed chapters written by
leading museum researchers and practitioners each covering significant themes or concepts fundamental to the study of
museum informatics and providing practical examples and detailed case studies useful for museum researchers and
professionals In this way Museum Informatics offers a fresh perspective on the sociotechnical interactions that occur
between people information and technology in museums presented in a format accessible to multiple audiences including
researchers students museum professionals and museum visitors Museums in Motion Juilee Decker,2024-08-06 This book
explores the histories and functions of museums while also looking at the current standing of museums and their ongoing
efforts toward relevance resiliency and future proofing Section I examines the beginnings of museums with chapters
dedicated to art and design museums natural history and anthropological museums science museums museums focused
history and the past and gardens zoos and children s museums Emphasis is on museums in the United States with some
historical framing beyond the U S Section II explores the primary functions of museums including conservation exhibition
interpretation engagement and service Section III examines museums from within by exploring critical issues and
contemporary movements facing museums and our society transparency and openness labor and equity belonging and
coalition building risk taking and risk aversion and sustainability and empathy Advocating for change rather than death to
museums Museums in Motion demonstrates the very premise that museums have been in motion all along as they have
shifted from their rather simple form of a treasury storehouse and tomb to something much more complex by deeply
considering where museums have come from where they are today and where they are going Entirely new to this edition
Section III Museum Aspirations features five new chapters each centered around topics rather than a museum type or
museum function Each topic is meant to be a micro narrative and springboard for a conversation about museums today and

their sustainability in the future The chapters examine museums from the inside museum workers and their voices especially as well as power held by people and institutions and DEIA without using those individual words as chapter headings On their own or in conjunction with the chapters in the previous sections of this book these chapters serve as vignettes that can help readers to understand where how and why we need to apply critical lenses to institutions and articulate how doing so helps us to understand this historical moment and ultimately how we can realize resiliency and sustainability for museums and those who make their existence possible
