Seeking The Center Politics And Policymaking At The New Century:

Seeking the Center Martin A. Levin, Marc K. Landy, Martin Shapiro, 2001-08-03 During the past decade Democrats and Republicans each have received about fifty percent of the votes and controlled about half of the government but this has not resulted in policy deadlock Despite highly partisan political posturing the policy regime has been largely moderate Incremental yet substantial policy innovations such as welfare reform deficit reduction the North American Free Trade Agreement and the deregulation of telecommunications banking and agriculture have been accompanied by such continuities as Social Security and Medicare the maintenance of earlier immigration reforms and the persistence of many rights based policies including federal affirmative action In *Seeking the Center* twenty one contributors analyze policy outcomes in light of the frequent alternation in power among evenly divided parties They show how the triumph of policy moderation and the defeat of more ambitious efforts such as health care reform can be explained by mutually supporting economic intellectual and political forces Demonstrating that the determinants of public policy become clear by probing specific issues rather than in abstract theorizing they restore the politics of policymaking to the forefront of the political science agenda A successor to Martin A Levin and Marc K Landy s influential *The New Politics of Public Policy* Johns Hopkins University Press 1995 this book will be vital reading for advanced undergraduate and graduate students in political science and public policy as well as a resource for scholars in both fields [Transatlantic Policymaking in an Age of Austerity](#) Flor Aarts, 2004-11-11

Transatlantic Policymaking in an Age of Austerity integrates the study of politics and public policy across a broad spectrum of regulatory and social welfare policies in the United States and several nations of Western Europe The editors and a sterling list of contributors look at policymaking in the 1990s through the present providing a comparative politics framework stressing both parallel development and the differences between and among the nations Similar prevailing ideas and political factors can be identified and transatlantic comparisons made providing for a clearer understanding of the policymaking process Faith in regulated markets and the burden of rising welfare costs are concerns found on both sides of the Atlantic Western democracies also share political climates colored by economic austerity low trust in government pressures from interest groups and a sharply divided electorate Because of differing political processes and differing policy starting points a variety of disparate policy decisions have resulted Real world policymaking in the areas of welfare health labor immigration reform disability rights consumer and environmental regulation administrative reforms and corporate governance are compared Ultimately the last decade is best characterized as one of drift sluggish changes with little real innovation and much default to the private sector In general policymakers on both sides of the ocean constrained by economic necessity have been unable to produce policy outcomes that satisfy the key segments of the electorate The contributors examine the United States Great Britain France and Germany as well as a number of other European countries and study the European Union itself as a policymaking institution *Transatlantic Policymaking in an Age of Austerity* distills the prominent issues

politics and roles played by governmental institutions into a new understanding of the dynamics of policymaking in and among transatlantic nations *Redefining European Economic Integration* Dariusz Adamski, 2018-04-19 European economic integration has relied on policies intended to make the European Union strong and resilient economically socially and politically The Eurozone crisis and Brexit have demonstrated however how fragile this hope was and how contested reforms to the major European economic policies have become Dariusz Adamski explains the evolution of these policies from the Economic and Monetary Union to the internal market international trade the EU's climate policy as well as its redistributive policies and demonstrates how this evolution has made European economic integration increasingly frail He shows how erroneous economic and political assumptions regarding the direction of the European integration project have interplayed with the EU's constitutional context Arguing that flaws in individual policies contributing to European economic integration can be remedied in compliance with the existing constitutional setup he explains why such solutions would be economically beneficial and politically feasible **Governing Uncertainty** Christopher Bosso, 2012-06-25 Nanotechnology promises to transform the materials of everyday life leading to smaller and more powerful computers more durable plastics and fabrics cheap and effective water purification systems more efficient solar panels and storage batteries and medical devices capable of tracking down and killing cancer cells or treating neurological diseases Policy analysts predict a radical change in the industrial sector at present the U S government spends nearly 2 billion annually on nanotechnology research and development Yet the nanotechnology revolution is not straightforward Enthusiasm about nanotechnology's future is tempered by recognition of the hurdles to its responsible development including the capacity of government to support technological innovation and economic growth while also addressing potential environmental and public health impacts This is the first volume to engage scholarly perspectives on environmental regulation in light of the challenges posed by nanotechnology Contributors focus on the overarching lessons of decades of regulatory response while posing a fundamental question How can government regulatory systems satisfy the desire for scientific innovation while also taking into account the direct and indirect effects of 21st century emerging technologies particularly in the face of scientific uncertainties With perspectives from economics history philosophy and public policy this new resource illuminates the various challenges inherent in the development of nanotechnology and works towards a reconceptualization of government regulatory approaches The European Union in Crisis Desmond Dinan, Neill Nugent, William E. Paterson, 2017-09-09 The European Union EU is in crisis The crisis extends beyond Brexit the fluctuating fortunes of the eurozone and the challenge of mass migration It cuts to the core of the EU itself Trust is eroding power is shifting politics are toxic disillusionment is widespread and solidarity has frayed In this major new text leading academics come together to unpack all dimensions of the EU in crisis and to analyse its implications for the EU its member states and the ongoing study of European integration **Building Coalitions, Making Policy** Martin A. Levin, Daniel DiSalvo, Martin M. Shapiro, 2012-06-04 This collection of essays examines

the efforts of policymakers from three presidential administrations to produce lasting policy changes Re-Forming Capitalism Wolfgang Streeck, 2010-03-04 Wolfgang Streeck has written extensively on comparative political economy and institutional theory In this book he addresses some of the key issues in this field the role of history in institutional analysis the dynamics of slow institutional change the limitations of rational design and economic functionalist explanations of institutional stability and the recurrent difficulties of restraining the effects of capitalism on social order In the classification of the Varieties of Capitalism school Germany has always been taken as the chief exemplar of a European coordinated market economy Streeck explores to what extent Germany actually conforms to this description His argument is supported by original empirical research on wage setting and wage structure the organization of business and labor in business associations and trade unions social policy public finance and corporate governance From this evidence Bringing Capitalism Back In traces the current liberalization of the postwar economy of democratic capitalism by means of an historically grounded approach to institutional change This is an important book in comparative political economy and key reading across the social sciences for academics researchers and advanced students of Political Economy Sociology comparative business systems *How Will Capitalism End?* Wolfgang Streeck, 2025-08-26 One of the Best Books of the Year Guardian Financial Times Times Higher Education A major collection of essays that questions whether contemporary capitalism will end with a bang or a whimper from a leading political economist and the author of *Buying Time* After years of ill health capitalism is now in a critical condition Growth has given way to stagnation inequality is leading to instability and confidence in the money economy has all but evaporated In *How Will Capitalism End* the acclaimed analyst of contemporary politics and economics Wolfgang Streeck argues that the world is about to change The marriage between democracy and capitalism ill suited partners brought together in the shadow of World War II is coming to an end The regulatory institutions that once restrained the financial sector's excesses have collapsed and after the final victory of capitalism at the end of the Cold War there is no political agency capable of rolling back the liberalization of the markets Ours has become a world defined by declining growth oligarchic rule a shrinking public sphere institutional corruption and international anarchy and no cure to these ills is at hand **To Fulfill These Rights** Amaka Okechukwu, 2019-09-03 In 2014 and 2015 students at dozens of colleges and universities held protests demanding increased representation of Black and Latino students and calling for a campus climate that was less hostile to students of color Their activism recalled an earlier era in the 1960s and 1970s widespread campus protest by Black and Latino students contributed to the development of affirmative action and open admissions policies Yet in the decades since affirmative action has become a magnet for conservative backlash and in many cases has been completely dismantled In *To Fulfill These Rights* Amaka Okechukwu offers a historically informed sociological account of the struggles over affirmative action and open admissions in higher education Through case studies of policy retrenchment at public universities she documents the protracted but not always successful rollback of inclusive policies in

the context of shifting race and class politics Okechukwu explores how conservative political actors liberal administrators and legislators and radical students have defined challenged and transformed the racial logics of colorblindness and diversity through political struggle She highlights the voices and actions of the students fighting policy shifts in on the ground accounts of mobilization and activism alongside incisive scrutiny of conservative tactics and messaging To Fulfill These Rights provides a new analysis of the politics of higher education centering the changing understandings and practices of race and class in the United States It is timely and important reading at a moment when a right wing Department of Justice and Supreme Court threaten the end of affirmative action

After Civil Rights John D. Skrentny, 2015-11-24 A provocative new approach to race in the workplace What role should racial difference play in the American workplace As a nation we rely on civil rights law to address this question and the monumental Civil Rights Act of 1964 seemingly answered it race must not be a factor in workplace decisions In After Civil Rights John Skrentny contends that after decades of mass immigration many employers Democratic and Republican political leaders and advocates have adopted a new strategy to manage race and work Race is now relevant not only in negative cases of discrimination but in more positive ways as well In today's workplace employers routinely practice racial realism where they view race as real as a job qualification Many believe employee racial differences and sometimes immigrant status correspond to unique abilities or evoke desirable reactions from clients or citizens They also see racial diversity as a way to increase workplace dynamism The problem is that when employers see race as useful for organizational effectiveness they are often in violation of civil rights law After Civil Rights examines this emerging strategy in a wide range of employment situations including the low skilled sector professional and white collar jobs and entertainment and media In this important book Skrentny urges us to acknowledge the racial realism already occurring and lays out a series of reforms that if enacted would bring the law and lived experience more in line yet still remain respectful of the need to protect the civil rights of all workers

Government Against Itself Daniel DiSalvo, 2015 Daniel DiSalvo contends that the power of public sector unions is too often inimical to the public interest

The Oxford Handbook of Public Policy Michael Moran, Martin Rein, Robert E. Goodin, 2008-06-12 This is part of a ten volume set of reference books offering authoritative and engaging critical overviews of the state of political science This work explores the business end of politics where theory meets practice in the pursuit of public good

Debating the Presidency: Conflicting Perspectives on the American Executive, 2nd Edition Richard J. Ellis, Michael Nelson, 2010 The study of the presidency the power of the office the evolution of the executive as an institution the men who have served has generated a great body of research and scholarship What better way to get students to grapple with the ideas of the literature than through conflicting perspectives on some of the most pivotal issues facing the modern presidency Richard Ellis and Michael Nelson have once again assembled a cadre of top scholars to offer a series of pro con essays that will inspire spirited debate beyond the pages of the book Each essay written in the form of a debate resolution offers a compelling yet concise view on

the American executive In essays that are new to this edition contributors debate the repeal of the 22nd Amendment the abolition of the vice presidency the extent to which presidential signing statements threaten the separation of powers and whether the fighting of the war on terror should require relaxing checks on presidential power Ellis and Nelson introduce each pair of essays giving students context and preparing them to read each argument critically so they can decide for themselves which side of the debate they find most persuasive

State and Nation Making in Latin America and Spain: Volume 3 Miguel A. Centeno, Agustin E. Ferraro, 2023-08-17 Neoliberalism is often studied as a political ideology a government program and even as a pattern of cultural identities However less attention is paid to the specific institutional resources employed by neoliberal administrations which have resulted in the configuration of a neoliberal state model This accessible volume compiles original essays on the neoliberal era in Latin America and Spain exploring subjects such as neoliberal public policies power strategies institutional resources popular support and social protest The book focuses on neoliberalism as a state model a configuration of public power designed to implement radical policy proposals This is the third volume in the State and Nation Making in Latin America and Spain series which aims to complete and advance research and knowledge about national states in Latin America and Spain

Fiscal Sociology at the Centenary Ann Mumford, 2019-09-27 This book discusses the socio legal tax state and its relationship to development inequality and the transnational Fiscal Sociology commenced in 1918 when Joseph A Schumpeter examined the links between capitalism and taxation arguing that fiscal pressures on governments led directly to the development of tax collection and the burgeoning growth of capitalist economies The identification of taxation as an important component of capitalism has continued to change the way that theoretical sociologists conceptualise tax This book documents the history of this literature to provide a summary of the topic for scholars seeking a bridge between taxation law and contextual historical and anthropological analyses of the development of the state more generally Whilst Schumpeter's insights have been celebrated over the past one hundred years taxation has slipped from the agenda of many scholarly disciplines in relation to analyses of poverty globalisation and equality Fiscal Sociology at the Centenary fills this gap The implications of this literature for taxation law in the United Kingdom in particular are considered

Buying Time Wolfgang Streeck, 2014-07-22 The financial crisis keeps us on edge and creates a diffuse sense of helplessness Well nigh unfathomable problems lead to measures that seem like emergency operations on the open heart of the Western world performed with no knowledge of the patient's clinical history The gravity of the situation is matched by the paucity of our understanding of it and of how it came about in the first place In this book compiled from his Adorno Lectures given in Frankfurt Wolfgang Streeck lays bare the roots of the present financial fiscal and economic crisis seeing it as part of the long neoliberal transformation of postwar capitalism that began in the 1970s Linking up with the crisis theories of that decade he analyses the subsequent tensions and conflicts involving states governments voters and capitalist interests a process in which the defining focus of the European state system has shifted

from taxation through debt to budgetary consolidation The book then ends by exploring the prospects for a restoration of social and economic stability Buying Time is a model of enlightenment It shows that something deeply disturbing underlies the current situation a metamorphosis of the whole relationship between democracy and capitalism **The**

Transformation of Citizenship, Volume 1 Juergen Mackert, Bryan S. Turner, 2017-03-16 The Transformation of Citizenship addresses the basic question of how we can make sense of citizenship in the twenty first century These volumes make a strong plea for a reorientation of the sociology of citizenship and address serious threats of an ongoing erosion of citizenship rights Arguing from different scientific perspectives rather than offering new conceptions of citizenship as supposedly more adequate models of rights membership and belonging they deal with both the ways citizenship is transformed and the ways it operates in the face of fundamentally transformed conditions This volume Political Economy discusses manifold

consequences of a decades long enforcement of neo liberalism for the rights of citizens As neo liberalism not only means a new form of economic system it has to be conceived of as an entirely new form of global regional and national governance that radically transforms economic political and social relations in society Its consequences for citizenship as a social institution are no less than dramatic Against the background of both manifest and ideological processes the book looks at if citizenship has lost the basis it has rested upon for decades or if the institution itself is in a process of being fundamentally transformed and restructured thereby changing its meaning and the significance of citizens rights This book will appeal to academics working in the field of political theory political sociology and European studies *Greenhouse Governance* Barry

George Rabe, 2010-01-01 Examines national and international laws and institutions governing human mediated climate change Issues examined include public perceptions and economic effects of climate change and policies to mitigate it renewable electricity standards vehicle fuel economy standards cap and trade regimes carbon taxes and the adaptation versus mitigation debate Provided by publisher **Diversity in America** Peter H. Schuck, 2003 America is the first society

in history to make ethno racial diversity an affirmative social ideal rather than viewing it as a fearful menace as almost all other societies still do Since the 1960s America has pursued this ideal in many forms not only to remedy past discrimination against minorities but also to increase diversity for its own sake It is high time for an accounting How diverse are we now and what can we expect in the future Why do we unlike the rest of the world think that diversity is desirable and that more of it is better What risks does diversity pose What are the roles of law politics and informal social controls in promoting diversity How can we manage diversity better In this magisterial book Peter H Schuck explains how Americans have understood diversity how we came to embrace it how the government regulates it now and how we can do better He mobilizes a wealth of conceptual historical legal political and sociological analysis to argue that diversity is best managed not by the government but by families ethnic groups religious communities employers voluntary organizations and other civil society institutions Analyzing some of the most controversial policy arenas where politics and diversity intersect immigration

multiculturalism language affirmative action residential neighborhoods religious practices faith based social services and school choice Schuck reveals the conflicts trade offs and ironies entailed by our commitment to the diversity ideal He concludes with recommendations to help us manage the challenge of diversity in the future **The Oxford Handbook of American Political History** Paula Baker,Donald T. Critchlow,2020 This collection of essays by twenty nine distinguished scholars provides readers with a complete overview of American politics and policy that can be found in any single volume These essays reveal that American politics historically is volatile not given easily to civility and polarizing at the same time they explore important political developments in addressing real issues confronting the nation and the world
