exciting and challenging pursuit of making classical guitars a craft that the author reveals to be surprisingly accessible by following his instructions. The book is unique in that it includes nine separate detailed plans of instruments constructed by internationally famous guitar makers. The author has had the rare opportunity of examining these instruments in detail and has made many replicas of each one. Superbly illustrated by Adrian Lucas. Part one: The Master Makers and their Guitars is devoted to separate chapters on each famous maker including Antonio de Torres, Hermann Hauser, Santos Hernandez y Aguado, Ignacio Fleta, Robert Bouchet, Daniel Friederich, and Jose Romanillos. The reader will find historical information about the life of and influences on each maker, as well as detailed sets of working drawings for their guitars. Also included are rare photographs of the guitars. Part two: Workshop Tools and Materials provides essential information about the tools, working environment, and material needed by the guitar maker. Part three: Guitar Construction: The Spanish Method comprises a step-by-step method of guitar construction illustrated by numerous photographs and drawings. The method of making a guitar is presented with great clarity so that even the newcomer to this fascinating craft will be able to produce a superb instrument. This book will be essential for the guitar maker and the historian, providing as it does a unique record of the different methods of guitar design and strutting systems that have evolved since Antonio de Torres first defined the essential characteristics of the modern classical guitar in the 1850s.

*Practicing Music by Design* Christopher Berg, 2019-06-14

*Practicing Music by Design: Historic Virtuosi on Peak Performance* explores pedagogical practices for achieving expert skill in performance. It is an account of the relationship between historic practices and modern research, examining the defining characteristics and applications of eight common components of practice from the perspectives of performing artists, master teachers, and scientists. The author presents research past and present designed to help musicians understand the abstract principles behind the concepts. After studying *Practicing Music by Design*, students and performers will be able to identify areas in their practice that prevent them from developing. The tenets articulated here are universal, not instrument-specific, borne of modern research and the methods of legendary virtuosos and teachers. Those figures discussed include luminaries Franz Liszt and Frederic Chopin, renowned performers Anton Rubinstein, Mark Hambourg, Ignace Paderewski, and Sergei Rachmaninoff. Extraordinary teachers Theodor Leschetizky, Rafael Joseffy, Leopold Auer, Carl Flesch, and Ivan Galamian. Lesser-known musicians who wrote perceptively on the subject such as violinists Frank Thistleton Rowsby Woof, Achille Rivarde, and Sydney Robjohns. *Practicing Music by Design* forges old with new connections between research and practice, outlining the practice practices of some of the most virtuosic concert performers in history while ultimately addressing the question: How does all this work to make for better musicians and artists?
