Latin America and the

Caribbean Regional Overview of Food Security and Nutrition 2018 Food and Agriculture Organization of the United Nations, Pan American Health Organization, World Food Program, United Nations Children's Fund, 2019-08-30 Latin America and the Caribbean deviates from its path toward the achievement of the Sustainable Development Goal 2 Zero Hunger. The number of undernourished people increased for the third consecutive year reaching 39.3 million, 6.1% of the population. The social and economic inequalities that characterize the region aggravate the problem of malnutrition. Vulnerable groups such as the population living in poverty, children, women, indigenous peoples and rural inhabitants tend to experience more severe problems of hunger and malnutrition. Inequality of malnutrition is also seen in gender. The problems of malnutrition in the region are the result of the profound changes that have affected its food systems which determine the quantity, quality and diversity of food available for consumption. A transformation that has been driven by growing urbanization, changes in diets and new ways of producing and processing food. The solution to the problems of hunger and malnutrition in the region requires changes to its food systems.

Alimentación y derecho internacional. Normas, instituciones y procesos Pons Rafols, Xavier, 2013-01-01 La satisfacción de las necesidades alimentarias de los seres humanos constituye un objetivo crucial que depende de múltiples variables de carácter económico, social y político que operan tanto a nivel estatal como internacional. En tanto que objetivo crucial de clara dimensión internacional la lucha contra el hambre y la garantía del acceso a los alimentos debe constituir un fin prioritario de la sociedad internacional contemporánea. Mientras que todos los especialistas coinciden en señalar que el hambre es un mal evitable ya que se trata esencialmente de un problema de desigualdad en la distribución. Sin embargo, el alejamiento en la consecución de los Objetivos de Desarrollo del Milenio relacionados con el hambre ha evidenciado las deficiencias del sistema de gobernanza global de la seguridad alimentaria y constituye una constatación del fracaso y del limitado alcance desde la perspectiva internacional de las políticas de desarrollo de las políticas de cooperación y de las políticas agroalimentarias.
