Selected Correspondence 1911 1946 Of Karl Mannheim Scientist Philosopher And Sociologist:

Selected Correspondence (1911-1946) of Karl Mannheim, Scientist, Philosopher, and Sociologist Karl Mannheim, 2003 A selection of the correspondence of scientist philosopher and sociologist Karl Mannheim There are nearly 300 letters altogether showing the wide range of European and American thought and representing Mannheim's dealings with Georg Lukacs Alfred Weber Harold Laski Herbert Read and others **Karl Mannheim and the Legacy of Max Weber** David Kettler, Colin Loader, Volker Meja, 2016-04-22 This book focuses on the important work of Karl Mannheim by demonstrating how his theoretical conception of a reflexive sociology took shape as a collaborative empirical research programme The authors show how contemporary work along these lines can benefit from the insights of Mannheim and his students into both morphology and genealogy It returns Mannheim's sociology of knowledge inquiries into the broader context of a wider project in historical and cultural sociology whose promising development was disrupted and then partially obscured by the expulsion of Mannheim's intellectual generation This inspired volume will appeal to sociologists concerned with the contemporary relevance of his work and who are prepared for a fresh look at Weimar sociology and the legacy of Max Weber *Research Handbook on the Sociology of Knowledge* Fran Collyer, 2025-07-15 This timely Handbook celebrates and contributes to the recent revitalisation of the sociology of knowledge A diverse group of leading experts from the global North and South provide a state of the art overview of a field which is developing rapidly with the growth of poststructuralist postcolonial and feminist approaches *Michael Polanyi and His Generation* Mary Jo Nye, 2011-09-16 In *Michael Polanyi and His Generation* Mary Jo Nye investigates the role that Michael Polanyi and several of his contemporaries played in the emergence of the social turn in the philosophy of science This turn involved seeing science as a socially based enterprise that does not rely on empiricism and reason alone but on social communities behavioral norms and personal commitments Nye argues that the roots of the social turn are to be found in the scientific culture and political events of Europe in the 1930s when scientific intellectuals struggled to defend the universal status of scientific knowledge and to justify public support for science in an era of economic catastrophe Stalinism and Fascism and increased demands for applications of science to industry and social welfare At the center of this struggle was Polanyi who Nye contends was one of the first advocates of this new conception of science Nye reconstructs Polanyi's scientific and political milieu in Budapest Berlin and Manchester from the 1910s to the 1950s and explains how he and other natural scientists and social scientists of his generation including J D Bernal Ludwik Fleck Karl Mannheim and Robert K Merton and the next such as Thomas Kuhn forged a politically charged philosophy of science one that newly emphasized the social construction of science [The Sociology of Radical Commitment](#) Gary Backhaus, George Psathas, 2007-01-01 This is the first volume to present commentaries on the existential sociology of Kurt H Wolff including autobiographical biographical exegetical and creative developmental articulation of his radical thought The theme of the book connects Wolff to the sociological tradition while at

the same time explicates his profound departure from the tradition *Max Weber in Politics and Social Thought* Joshua Derman, 2012-10-18 A comprehensive account of the wide ranging impact of Max Weber's ideas on German and American intellectuals in the twentieth century *The Emergence of Globalism* Or Rosenboim, 2017-03-28 How competing visions of world order in the 1940s gave rise to the modern concept of globalism During and after the Second World War public intellectuals in Britain and the United States grappled with concerns about the future of democracy the prospects of liberty and the decline of the imperial system Without using the term globalization they identified a shift toward technological economic cultural and political interconnectedness and developed a globalist ideology to reflect this new postwar reality *The Emergence of Globalism* examines the competing visions of world order that shaped these debates and led to the development of globalism as a modern political concept Shedding critical light on this neglected chapter in the history of political thought Or Rosenboim describes how a transnational network of globalist thinkers emerged from the traumas of war and expatriation in the 1940s and how their ideas drew widely from political philosophy geopolitics economics imperial thought constitutional law theology and philosophy of science She presents compelling portraits of Raymond Aron Owen Lattimore Lionel Robbins Barbara Wootton Friedrich Hayek Lionel Curtis Richard McKeon Michael Polanyi Lewis Mumford Jacques Maritain Reinhold Niebuhr H G Wells and others Rosenboim shows how the globalist debate they embarked on sought to balance the tensions between a growing recognition of pluralism on the one hand and an appreciation of the unity of humankind on the other An engaging look at the ideas that have shaped today's world *The Emergence of Globalism* is a major work of intellectual history that is certain to fundamentally transform our understanding of the globalist ideal and its origins *Education for Political Life* Iaan Reynolds, 2023-07-27 Through a detailed reading of Karl Mannheim's early explorations in the sociology of knowledge this book argues for Mannheim's relevance for contemporary social and political theory As a philosophical project of self reflection the early sociology of knowledge is distinctive for its blend of Marxist social theory and phenomenological investigation making it a valuable resource for current philosophical attempts to relate thought to its social conditions Furthermore the struggle documented in the early days of this project against social critique's tendency to obscure its own perspective provides the best standard by which to assess its own limitations **Science Studies during the Cold War and Beyond** Elena Aronova, Simone Turchetti, 2016-09-24 This book examines the ways in which studies of science intertwined with Cold War politics in both familiar and less familiar battlefields of the Cold War Taken together the essays highlight two primary roles for science studies as a new field of expertise institutionalized during the Cold War in different political regimes Firstly science studies played a political role in cultural Cold War in sustaining as well as destabilizing political ideologies in different political and national contexts Secondly it was an instrument of science policies in the early Cold War the studies of science were promoted as the underpinning for the national policies framed with regard to both global geopolitics and local national priorities As this book demonstrates however the wider we cast our net

extending our histories beyond the more researched developments in the Anglophone West the more complex and ambivalent both the science studies and the Cold War become outside these more familiar spaces The national stories collected in this book may appear incommensurable with what we know as science studies today but these stories present a vantage point from which to pluralize some of the visions that were constitutive to the construction of Cold War as a juxtaposition of the liberal democracies in the West and the communist East

Dead Men's Propaganda Terhi Rantanen, 2024-05-07 In *Dead Men's Propaganda: Ideology and Utopia in Comparative Communications Studies* Terhi Rantanen investigates the shaping of early comparative communications research between the 1920s and 1950s notably the work of academics and men of practice in the United States Often neglected this intellectual thread is highly relevant to understanding the 21st century's challenges of war and rival streams of propaganda Borrowing her conceptual lenses from Karl Mannheim and Robert Merton Rantanen draws on detailed archival research and case studies to analyse the extent and importance of work outside and inside the academy illuminating the work of pioneers in the field Some of these were well known academics such as Harold Lasswell and the authors of the seminal book *Four Theories of the Press* Others operated in the world of news agencies such as Associated Press's Kent Cooper or were marginalised as migr scholars notably Paul Kecskemeti and Nathan Leites Her study shows how comparative communications from its very beginning can be understood as governed by the Mannheimian concepts of ideology and utopia and the power play between them The close relationship between these two concepts resulted in a bias in knowledge production contributed to dominant narratives of generational conflicts and to the demarcation of Insiders and Outsiders By focusing on a generation at the forefront of comparative communications at this pivotal time in the 20th century this book challenges orthodoxies in the intellectual histories of communication studies
