Selected Educational Heresies:

Selected Educational Heresies William F. O'Neill, 1969 *Selected Letters. (On Education and Entering on Life.-On Difficulties in Religion.-On Character and Conduct in Private Life.-On Public Duties: chiefly Historical.)* Edited by the Rev. T. Chamberlain Thomas CHAMBERLAIN, 1842 **Philosophical Psychology** William F. O'Neill, George D. Demos, 2012-09-18 Philosophical Psychology contains many provocative and profound ideas some of which may be sensed as offensive by those with rather thin intellectual skins Some readers in capitalistic societies may take offense at any suggestion that Marx had some good insights about a healthier way to achieve self actualization Others may find it bizarre to read that perhaps Hitler and Stalin were in some ways happier and more self actualized in their roles as brutal tyrants than they would have been in more normal roles The range of ideas and thinkers included in this work is extensive Authors Dr William F O'Neill and Dr George Demos examine essential life issues such as pain pleasure society ethics and love culminating in a careful look at the various aspects of peak experience The chapters build toward a better understanding of the concepts of self actualization and peak experience This is essential reading for upper division and graduate level students seeking to deepen their understanding and apply the concepts of Abraham Maslow's theory of self actualization and its inherent role in education

theory feminist pedagogy and values education critical humanism combines the holistic psychological concerns of humanistic education with the sociopolitical contextualization of critical pedagogy Developed over the past seventeen years in one of North America s most experimental postsecondary programs The New School of Dawson College this theory and practice responds to both the personal and the political needs of students Reconstructing Education is at once a review of this century s educational theories an account of the work at the school and an empowering illustration of the way in which schools can incite the motivation of students and encourage them to become active members in a truly democratic society The case study chapters on The New School give concrete examples of how this philosophy is manifested in the school s methodology structure and pedagogy and draws heavily on the written work of teachers and students To formulate a similar approach for a specific school it is essential to combine a rigorous analysis of existing educational models with the dialectical process of creating and recreating a new model defined by the articulation of both learners and teachers affective cognitive and socially constructed needs This is a valuable book for anyone concerned with alternative approaches to education and for courses on educational theory or the philosophy of education
